-----NOTE-----6/08/98--4:33pm-----

David, should either of these project titles reflect that they pertain to telecommunications? Kay

I assume you are referring to 980000A-SP and 980000B-SP? I had not thought about the point you raise, but the nomenclature for the pseudo-dockets was approved by MAB via memo.

Shall I ask Mary?

If you wish, but I don't really see any pressing need to modify the titles, in that interested parties are fully cognizant of the situation. Your call....

Good morning, Mary. As you can gather from this correspondence, I'm wondering if we might want to add a reference to "telecommunications" in these project titles. The subject matter is of course self-explanatory to the companies involved, but other industries/individuals (I'm also thinking of people who routinely review our website) might not be as cognizant. What do you think? Kay

I agree with Dave that the interested persons know what we mean. However, you may revise the official titles, as follows, for your purposes:

For 98000A-SP Fair and Reasonable Residential Basic Local Telecommunications Rates

for 98000B-SP Access by Telecommunications Companies to Customers in Multi-Tenant Environments
