.....
This to inform you that the above is really a ALEC application. In conversation with the applicant yesterday I was informed that the intent of the applicant was to provide ALEC service and not IXC service.

The company did submit a price list instead of tariff and the application does indicated ALEC status in places.

Could we change the docket title and company code to reflect this. Thanks

.....
Will assign a ALEC company code for this company per the above info. Are they going to file an amended application showing that they are requesting ALEC service, as all the info on the 1st page of their application reflects that they are filing for an IXC? Think there should be some document placed in the docket file for future reference advising of this change from the original application filed. Linda will handle updating the docket title, suffix for the docket. Thanks, Nonnye
