ORIGINAL

I am a bedridden handicapped person.

I am unable to attend a public hearing in person hence this communication.

I just have basic service. This is my lifeline to the outside world. I think it is necessary for you to keep basic service affordable for many of us who cannot afford more than what is charged now. As it is, the FCC has allowed two additional charges every month which are compulsory making the basic bill already more expensive to us. The Florida Public Service Commission must protect the public, all of us, rather than allow the phone companies unfettered increases in rates.
