 power cost recovery :  
 clause and generating :  
 performance incentive :  
 factor. :  
 -----

PROCEEDINGS: HEARING

BEFORE: COMMISSIONER SUSAN F. CLARK  
 COMMISSIONER JOE GARCIA  
 Videoconferencing from Miami, Florida  
 COMMISSIONER E. LEON JACOBS, JR.

DATE: Wednesday, August 26, 1998

TIME: Commenced at 9:30 a.m.  
 Concluded at 9:35 a.m.

PLACE: Betty Easley Conference Center  
 Room 148  
 4075 Esplanade Way  
 Tallahassee, Florida

REPORTED BY: JOY KELLY, CSR, RPR  
 Chief, Bureau of Reporting

DOCUMENT NUMBER DATE

09322 AUG27 98

1 **APPEARANCES:**

2                   **KENNETH A. HOFFMAN**, Rutledge, Ecenia,  
3 Underwood, Purnell and Hoffman, P. O. Box 511, 215  
4 South Monroe Street, Suite 420, Tallahassee, Florida  
5 32302-0551, appearing on behalf of **Florida Public**  
6 **Utilities Company (FPUC)**.

7                   **JAMES A. MCGEE**, Post Office Box 14042, 3201  
8 34th Street South, St. Petersburg, Florida 33733,  
9 appearing on behalf of **Florida Power Corporation**.

10                   **JAMES D. BEASLEY**, Ausley & McMullen, Post  
11 Office Box 391, Tallahassee, Florida 32302, appearing  
12 on behalf of **Tampa Electric Company (TECO)**.

13                   **JOHN ROGER HOWE**, Deputy Public Counsel,  
14 Office of Public Counsel, 111 West Madison Street,  
15 Room 812, Tallahassee, Florida 32399-1400, appearing  
16 on behalf of the **Citizens of the State of Florida**.

17                   **LESLIE J. PAUGH**, Florida Public Service  
18 Commission, Division of Legal Services, 2540 Shumard  
19 Oak Boulevard, Tallahassee, Florida 32399-0870,  
20 appearing on behalf of the **Commission Staff**.

**P R O C E E D I N G S**

(Hearing convened at 9:30 a.m.)

**COMMISSIONER CLARK:** We'll call the hearing to order. Will you please read the notice.

**MS. PAUGH:** Pursuant to notice issued July 14th, 1998, this time and place have been set for hearing in Docket 980001-EI, fuel and purchased power cost recovery clause and generating performance incentive factor and Docket No. 980007-EI, environmental cost recovery clause.

**COMMISSIONER CLARK:** Thank you. We'll take appearances.

**MR. BEASLEY:** James D. Beasley with the law firm of Ausley & McMullen, in Tallahassee. I'm representing Tampa Electric Company in both the 01 and 07 dockets.

**MR. MCGEE:** James McGee, P. O. Box 14042, St. Petersburg, 33733, appearing on behalf of Florida Power Corporation in the 01 docket.

**MR. HOFFMAN:** Kenneth A. Hoffman. My address is P. O. Box 551, Tallahassee, Florida 32302. I'm here this morning on behalf of Florida Public Utilities Company in the 01 docket. And Florida Public Utilities is not in the 07 docket.

**MR. HOWE:** I'm Roger Howe with the Office of

1 Public Counsel appearing on behalf of the Citizens of  
2 the State of Florida in the 01 and 07 dockets.

3 **MS. PAUGH:** Leslie Paugh on behalf of Staff  
4 in the 01 and 07 dockets.

5 **COMMISSIONER CLARK:** I would note for the  
6 record that Jeffry Stone and Vicki Gordon Kaufman were  
7 excused from attending this hearing.

8 **MS. PAUGH:** That's correct.

9 **COMMISSIONER CLARK:** Any preliminary matters  
10 we need to take up?

11 **MS. PAUGH:** Just one, Commissioners. The  
12 question has been raised with respect to Paragraph 4  
13 of both prehearing orders, whether the language is  
14 appropriate in this proceeding.

15 I have spoken with the -- I'm sorry, not  
16 Paragraph 4 but Section 4. I have spoken with the  
17 attorney who has asked the question, and indicated to  
18 him that that section is intended for proceedings in  
19 which there is not a bench vote. In this proceeding I  
20 anticipate that there will be a bench vote and that  
21 this section would, therefore, be negated.

22 **COMMISSIONER CLARK:** Paragraph 4?

23 **MS. PAUGH:** Section 4, posthearing  
24 procedures. It calls for filing posthearing  
25 statements that will not be necessary in the event of

1 a bench vote.

2 **COMMISSIONER CLARK:** Okay. And how do you  
3 suggest we proceed?

4 **MS. PAUGH:** In both dockets all issues, with  
5 the exception of Issue 10 in the 07 docket, have been  
6 stipulated.

7 I propose that we insert the testimony into  
8 the record as though read in the 01 docket. You will  
9 find that testimony on Page 5.

10 **COMMISSIONER CLARK:** Ms. Kelly, let me ask  
11 you a question. If we stipulate into the record the  
12 testimony of the witnesses listed on Page 5 of the  
13 Prehearing Order, and then give the proffered exhibits  
14 exhibit numbers in this proceeding, can we do it in  
15 bulk, so to speak?

16 **THE REPORTER:** What you can do is put in all  
17 of the prefiled testimony first, and then you can  
18 identify the exhibits and give them numbers.

19 **MS. PAUGH:** We'll have to mark the exhibits,  
20 Commissioner.

21 **COMMISSIONER CLARK:** Is it your  
22 recommendation that we proceed with stipulating the  
23 testimony and evidence exhibits into the record?

24 **MS. PAUGH:** The testimony, yes. We'll move  
25 the exhibits into the record as soon as we have them

1 marked, which we'll do next.

2           **COMMISSIONER CLARK:** All right. Then the  
3 prefiled -- it's all direct testimony. Is there no  
4 rebuttal?

5           **MS. PAUGH:** No.

6           **COMMISSIONER CLARK:** All right. The  
7 prefiled direct testimony of Mr. George M. Bachman,  
8 Mr. John Scardino, Jr., Mr. Karl Wieland -- is it  
9 Mr. Dario B. Zuloago, M.F. Oaks, Mr. M. W. Howell,  
10 Ms. S. D. Cranmer. I assume tha Mr. G. D. Fontaine,  
11 Ms. Karen Zwolak, Mr. G. A. Keselowsky, and  
12 Mr. Rod Burkhardt will be stipulated into the record  
13 without objection.

14           **MS. PAUGH:** Thank you, Commissioner. On  
15 Page 20 of the Prehearing Order you will find the  
16 exhibits. I propose that they be marked as follows:  
17 JS-1, Exhibit 1. JS-2, Exhibit 2. KHW-1, Exhibit 3.  
18 KHW-2, Exhibit 4. DBZ-1, Exhibit 5. DBZ-2,  
19 Exhibit 6. GMB-1, Exhibit 7. MF0-1, Exhibit 8.  
20 MF0-2, Exhibit 9. MWH-1, Exhibit 10. SDC-1,  
21 Exhibit 11. SDC-2, Exhibit 12. GDF-1, Exhibit 13.  
22 GDF-2, Exhibit 14. KOZ-1, Exhibit 15. KOZ-2,  
23 Exhibit 16. KOZ-3, Exhibit 17.

24           Staff recommends that the exhibits as marked  
25 be moved into the record and cross examination be

1 waived.

2 **COMMISSIONER CLARK:** There's another page.

3 **MS. PAUGH:** I'm sorry, Commissioner.

4 KOZ-4, Exhibit 18. KOZ-5, Exhibit 19.

5 GAK-1, Exhibit 20. RB-1, Exhibit 21.

6 Staff now recommends that the exhibits as  
7 marked be moved into the record and cross examination  
8 be waived.

9 **COMMISSIONER CLARK:** They will be moved into  
10 the record and it's noted that cross examination has  
11 been waived.

12 **MS. PAUGH:** Staff recommends that the  
13 Commissioners vote to approve all of the stipulations  
14 contained in the 01 Prehearing Order.

15 **COMMISSIONER CLARK:** Is there a motion?

16 **COMMISSIONER GARCIA:** So moved.

17 **COMMISSION JACOBS:** I second.

18 **COMMISSIONER CLARK:** Show the stipulation  
19 unanimously approved.

20 **MS. PAUGH:** Thank you Commissioners.

21 (Exhibits 1 through 21 marked for  
22 identification and received in evidence.)

24

25

BEFORE THE  
FLORIDA PUBLIC SERVICE COMMISSION  
DOCKET NO. 980001-EI  
CONTINUING SURVEILLANCE AND REVIEW OF  
FUEL COST RECOVERY CLAUSES OF ELECTRIC UTILITIES

Direct Testimony of  
George M. Bachman  
On Behalf of  
Florida Public Utilities Company

- 1 Q. Please state your name and business address.  
2 A. George M. Bachman, 401 South Dixie Highway, West Palm Beach, FL  
3 33401.  
4 Q. By whom are you employed?  
5 A. I am employed by Florida Public Utilities Company.  
6 Q. Have you previously testified in this Docket?  
7 A. Yes.  
8 Q. What is the purpose of your testimony at this time?  
9 A. I will briefly describe the basis for the computations that were  
10 made in the preparation of the various Schedules that we have  
11 submitted in support of the October 1998 - December 1998 fuel cost  
12 recovery adjustments for our two electric divisions. In addition,  
13 I will advise the Commission of the projected differences between  
14 the revenues collected under the levelized fuel adjustment and the  
15 purchased power costs allowed in developing the levelized fuel  
16 adjustment for the period April 1998 - September 1998 and to  
17 establish a "true-up" amount to be collected or refunded during  
18 October 1998 - December 1998.  
19 Q. Were the schedules filed by your Company completed under your  
20 direction?  
21 A. Yes.  
22 Q. Which of the Staff's set of schedules has your company completed  
23 and filed?

1 A. We have filed Schedules E1, E1A, E1-B, E1B-1, E2, E7, and E10 for  
2 Marianna and E1, E1A, E1-B, E1B-1, E2, E7, E8, and E10 for  
3 Fernandina Beach. They are included in Composite Prehearing  
4 Identification Number GMB-1.

5 These schedules support the calculation of the levelized fuel  
6 adjustment factor for October 1998 - December 1998. Schedule E1-B  
7 shows the Calculation of Purchased Power Costs and Calculation of  
8 True-Up and Interest Provision for the period April 1998 -  
9 September 1998 based on 2 Months Actual and 4 Months Estimated  
10 data.

11 Q. In derivation of the projected cost factor for the October 1998 -  
12 December 1998, period, did you follow the same procedures that were  
13 used in the prior period filings?

14 A. Yes, with the exception of a shorter period of time. The period  
15 covered has been changed to three months.

16 Q. Why has the GSLD rate class for Fernandina Beach been excluded from  
17 these computations?

18 A. Demand and other purchased power costs are assigned to the GSLD  
19 rate class directly based on their actual CP KW and their actual  
20 KWH consumption. That procedure for the GSLD class has been in use  
21 for several years and has not been changed herein. Costs to be  
22 recovered from all other classes is determined after deducting from  
23 total purchased power costs those costs directly assigned to GSLD.

24 Q. How will the demand cost recovery factors for the other rate  
25 classes be used?

26 A. The demand cost recovery factors for each of the RS, GS, GSD and  
27 OL-SL rate classes will become one element of the total cost  
28 recovery factor for those classes. All other costs of purchased  
29 power will be recovered by the use of the levelized factor that is

1 the same for all those rate classes. Thus the total factor for each  
2 class will be the sum of the respective demand cost factor and the  
3 levelized factor for all other costs.

4 Q. Please address the calculation of the total true-up amount to be  
5 collected or refunded during the October 1998 - December 1998.

6 A. We have determined that at the end of September 1998 based on two  
7 months actual and four months estimated, we will have over-  
8 recovered \$172,930 in purchased power costs in our Marianna  
9 division. Based on estimated sales for the period October 1998 -  
10 December 1998, it will be necessary to subtract .27422¢ per KWH to  
11 refund this over-recovery.

12 In Fernandina Beach we will have over-recovered \$247,128 in  
13 purchased power costs. This amount will be refunded at .42695¢ per  
14 KWH during the October 1998 - December 1998 period (excludes GSLD  
15 customers). Page 3 and 12 of Composite Prehearing Identification  
16 Number GMB-1 provides a detail of the calculation of the true-up  
17 amounts.

18 Q. Looking back upon the October 1997 - March 1998 period, what were  
19 the actual End of Period - True-Up amounts for Marianna and  
20 Fernandina Beach, and their significance, if any?

21 A. The Marianna Division experienced an over-recovery of \$256,324 and  
22 Fernandina Beach Division over-recovered \$390,750. The amounts  
23 both represent fluctuations of less than 10% from the total fuel  
24 charges for the period and are not considered significant variances  
25 from projections.

26 Q. What are the final remaining true-up amounts for the period October  
27 1997 - March 1998 for both divisions?

28 A. In Marianna the final remaining true-up amount was an over-recovery  
29 of \$125,045. The final remaining true-up amount for Fernandina

1 Beach was an over-recovery of \$121,303.

2 Q. What are the estimated true-up amounts for the period of April 1998  
3 - September 1998?

4 A. In Marianna, there is an estimated over-recovery of \$47,885.  
5 Fernandina Beach has an estimated over-recovery of \$125,825.

6 Q. What will the total fuel adjustment factor, excluding demand cost  
7 recovery, be for both divisions for the period  
8 October 1998 - December 1998.

9 A. In Marianna the total fuel adjustment factor as shown on Line 33,  
10 Schedule E1, is 2.112¢ per KWH. In Fernandina Beach the total fuel  
11 adjustment factor for "other classes", as shown on Line 43,  
12 Schedule E1, amounts to 2.006¢ per KWH.

13 Q. Please advise what a residential customer using 1,000 KWH will pay  
14 for the period October 1998 - December 1998 including base rates  
15 (which include revised conservation cost recovery factors) and fuel  
16 adjustment factor and after application of a line loss multiplier.

17 A. In Marianna a residential customer using 1,000 KWH will pay \$63.91,  
18 an decrease of \$.94 from the previous period. In Fernandina Beach  
19 a customer will pay \$55.96, a decrease of \$4.34 from the previous  
20 period.

21 Q. Does this conclude your testimony?

22 A. Yes.

23  
24

DOCKET No. 980001-EI

Re: Fuel and Capacity Cost Recovery  
Final True-up Amounts for  
October 1997 through March 1998

DIRECT TESTIMONY OF  
JOHN SCARDINO, JR.

1 Q. Please state your name and business address.

2 A. My name is John Scardino, Jr. My business address is P. O. Box  
3 14042, St. Petersburg, Florida 33733.

4

5 Q. By whom are you employed and in what capacity?

6 A. I am employed by Florida Power Corporation (FPC) in the capacity of  
7 Vice President and Controller. In addition, I also hold the position of  
8 Vice President and Controller of Florida Progress Corporation, the  
9 holding company of Florida Power Corporation.

10

11 Q. Have your duties and responsibilities with FPC remained the same since  
12 you last testified in this proceeding?

13 A. Yes.

14

15 Q. What is the purpose of your testimony?

16 A. The purpose of my testimony is to describe the Company's Fuel Cost  
17 Recovery final true-up amount for the period of October 1997 through

1 March 1998, and the Company's Capacity Cost Recovery final true-up  
2 amount for the same period.

3  
4 **Q. Have you prepared exhibits to your testimony?**

5 **A.** Yes, I have prepared a four-page true-up variance analysis which  
6 examines the difference between the estimated fuel true-up and the  
7 actual period-end fuel true-up. This variance analysis is attached to my  
8 prepared testimony and designated Exhibit No. 1 (JS-1). Also attached  
9 to my prepared testimony and designated Exhibit No. 2 (JS-2) are  
10 the Capacity Cost Recovery Clause true-up calculations for the October  
11 1997 through March 1998 period. My third exhibit will present the  
12 revenues and expenses associated with the purchase of the Tiger Bay  
13 facility approved in Docket 970096-EQ and the corresponding  
14 amortization. This presentation is also attached to my prepared  
15 testimony and designated Exhibit No. \_\_\_\_ (JS-3). Also, I will sponsor  
16 the applicable Schedules A1 through A9 for the period to date through  
17 March 1998, which have been previously filed with the Commission,  
18 and are also attached to my prepared testimony for ease of reference  
19 and designated as Exhibit No. \_\_\_\_ (JS-4). The "A" Schedules  
20 contained in my exhibit include a revision to those previously filed  
21 which excludes a true-up of CR3 replacement fuel costs for the month  
22 of September 1997 that was booked in October 1997. The amount of  
23 this September true-up was included in my prior true-up testimony for  
24 the April - September 1997 period.

1 Q. What is the source of the data that you will present by way of  
2 testimony or exhibits in this proceeding?

3 A. Unless otherwise indicated, the actual data is taken from the books and  
4 records of the Company. The books and records are kept in the regular  
5 course of business in accordance with generally accepted accounting  
6 principles and practices, and provisions of the Uniform System of  
7 Accounts as prescribed by this Commission.

8  
9 **FUEL COST RECOVERY**

10 Q. What is the Company's jurisdictional ending balance as of March 31,  
11 1998 for fuel cost recovery?

12 A. The actual ending balance as of March 31, 1998 for true-up purposes  
13 is an underrecovery of \$27,189,765.

14  
15 Q. How does this amount compare to the Company's estimated ending  
16 balance included in the April 1998 through September 1998 period?

17 A. When the estimated overrecovery of \$2,007,311 to be collected during  
18 the period of April 1998 through September 1998 along with half of the  
19 estimated recoverable CR3 replacement fuel from September through  
20 November 1996 is taken into account, the final true-up attributable to  
21 the six-month period ended March 31, 1998 is an underrecovery of  
22 \$10,825,869.

23  
24 Q. How was the final true-up ending balance determined?

1 A. The amount was determined in the manner set forth on Schedule A2 of  
2 the Commission's standard forms previously submitted by the Company  
3 on a monthly basis but revised to exclude a true-up of estimated  
4 September 1997 CR3 replacement fuel booked in October 1997, but  
5 reflected in my prior testimony in accordance with the conditions set  
6 forth and approved in Docket 970261-EI.

7  
8 Q. What factors contributed to the period-ending jurisdictional under-  
9 recovery of \$27.2 million as shown on your Exhibit No. 1 (JS-1)?

10 A. The factors contributing to the underrecovery are summarized on Sheet  
11 1 of 4. The actual jurisdictional KWH sales were lower than the original  
12 estimate by 101,550,433 KWH. This decrease in KWH sales,  
13 attributable to abnormally mild weather, resulted in lower jurisdictional  
14 fuel revenues of \$3.9 million. The \$11.2 million favorable variance in  
15 jurisdictional fuel and purchased power expense was primarily  
16 attributable to \$8.0 million of CR3 non-recoverable replacement fuel,  
17 and lower oil and gas costs during the period.

18 When the differences in jurisdictional revenues and jurisdictional  
19 fuel expenses are combined, the net result is an overrecovery of \$7.3  
20 million related to the October 1997 through March 1998 time period.  
21 Other factors not directly related to the period include a \$33.6 million  
22 recovery of previously deferred CR3 replacement fuel related to  
23 September 1996 through November 1996 and \$.9 million in interest.  
24 This results in the actual ending underrecovery balance of \$27.2 million,  
25 as of March 31, 1998.

1           The replacement fuel costs associated with the CR3 outage were  
2 excluded from fuel, as presented on schedule A2 page 3 of 4 line  
3 D12A, and absorbed by FPC or recorded as a regulatory asset in  
4 accordance with the terms and conditions set forth in Docket 970261-  
5 EI. Going forward the replacement fuel costs for CR3 will no longer  
6 require exclusion since Florida Power Corporation satisfied the  
7 operational requirements on March 1, 1998 pursuant to the stipulation  
8 approved by the Commission in Docket No. 970261-EI. Florida Power  
9 under the stipulation is entitled to recover certain replacement fuel costs  
10 from September 1996 through November 1996 and related interest  
11 specified in the stipulation over a 12-month period, which will begin  
12 with the first billing cycle for April, 1998.

- 13
- 14 **Q. Please explain the components shown on Exhibit No. 1 (JS-1),**  
15 **Sheet 2 of 4 which produced the \$1.6 million favorable system variance**  
16 **from the projected cost of fuel and net purchased power transactions.**
- 17 **A. Sheet 2 of 4 shows an analysis of the system variance for each energy**  
18 **source in terms of three interrelated components: (1) changes in the**  
19 **amount (MWH's) of energy required; (2) changes in the heat rate, or**  
20 **efficiency, of generated energy (BTU's per KWH); and (3) changes in**  
21 **the unit price of either fuel consumed for generation (\$ per million BTU)**  
22 **or energy purchases and sales (cents per KWH).**
- 23
- 24 **Q. What effect did these components have on the system fuel and net**  
25 **power variance for the true-up period?**

1 A. As can be seen from Sheet 2 of 4, variances in the amount of MWH  
2 requirements from each energy source (column B) combined to produce  
3 a cost increase of \$17.7 million. I will discuss this component of the  
4 variance analysis in greater detail below.

5 The heat rate variance for each source of generated energy  
6 (column C) reflected a favorable variance of \$1.0 million. This variance  
7 was the direct result of using higher amounts of efficient fuel sources  
8 such as gas to make up for the nuclear unit's unavailability for dispatch.

9 A cost decrease of \$18.3 million resulted from the price variance  
10 (column D), which was caused by a number of sources detailed on lines  
11 1 through 19 of Sheet 2 of 4, of exhibit(JS-1). The most significant  
12 factors contributing to the favorable variance were the larger than  
13 expected decrease in winter heavy oil prices of \$9.5 million and the  
14 decrease in QF energy costs due to lower as available pricing which is  
15 influenced by lower oil prices.

16  
17 Q. What were the major contributors to the \$17.7 million cost increase  
18 associated with the variance in MWH requirements?

19 A. The effect that generation mix has on total net system fuel and  
20 purchased power cost as a result of the Crystal River Unit 3 outage is  
21 the primary reason for the unfavorable variance in MWH requirements.  
22 Although this interrelationship is generally understood to exist, it is not  
23 readily apparent from the individual variances contained in the  
24 Commission's "A" Schedules or in the analysis presented on Sheet 2 of  
25 4. For example, a decrease in the MWH requirements of nuclear

1 generation shows up on Schedule A3 and on Sheet 2 of my exhibit as  
2 a cost decrease of \$2.3 million. While this may be correct in isolation,  
3 the true effect of decreased nuclear generation is obviously a  
4 corresponding increase in the MWH requirements of a number of other  
5 more costly energy sources, as can be seen on Sheet 3 of 4, Columns  
6 C through G. Sheet 3 of 4, Column B, also identifies the higher net  
7 system cost of \$37.4 million which results from the change in  
8 generation mix, even if total system MWH requirements had remained  
9 unchanged.

10  
11 **Q. Please explain the analysis shown on Sheet 3 of 4 of your Exhibit No.**  
12 **1 (JS-1).**

13 **A. This analysis quantifies the replacement fuel cost of CR3, computed**  
14 **using the production cost program PROMOD. Actual data for load, fuel**  
15 **and purchased power prices, and unit availability were used in the**  
16 **calculations. PROMOD computes the difference in system costs with**  
17 **and without the nuclear unit. Crystal River 3 was assumed to operate**  
18 **at originally projected GPIF targets. The procedure used to compute**  
19 **replacement cost is the same as has been used in previous replacement**  
20 **cost determinations before this Commission.**

21  
22 **Q. Does the true-up period's ending balance include any noteworthy**  
23 **adjustments to fuel expense, as shown on Exhibit JS-4, Schedule A2,**  
24 **page 1 of 4, footnote to line 6b?**

1 A. Yes, the exhibit shows other jurisdictional adjustments to fuel expense.  
2 Noteworthy adjustments include recovery of the Company's  
3 Intercession City P7-10, Debary P7 and P9, Bartow P2 and P4, and  
4 Suwannee P1 gas conversion projects previously approved by the  
5 Commission.

6  
7 **Q. Did FPC's ratepayers benefit from the investment in these gas  
8 conversion projects?**

9 A. Yes. For this true-up period, the estimated system fuel savings related  
10 to the gas conversion projects was \$3,106,128. The total system  
11 depreciation and return was \$1,668,770, resulting in a net system  
12 benefit to ratepayers of \$1,437,358. A schedule of depreciation and  
13 return by gas conversion unit relating to the aforementioned system  
14 totals is included in Exhibit No. 1 (JS - 1), Sheet 4 of 4.

15  
16 **Q. Has the Company passed any sulfur dioxide emission allowance  
17 transactions through the current or prior periods fuel adjustment clause?**

18 A. Yes. In prior fuel adjustment periods, the Company has passed through  
19 \$956,804 in proceeds from the mandated EPA Sulfur Dioxide Emission  
20 Allowance Auction as a credit to fuel expense. This amount represents  
21 the auction proceeds for the years 1993 through 1997. Additionally,  
22 the Company has incurred \$951,350 of expense for the purchase of  
23 10,900 SO<sub>2</sub> allowances. Under the provisions of the Clean Air Act  
24 Amendments of 1990, a percentage of FPC's allowances are withheld  
25 each year to populate a pool of allowances which EPA offers for sale

1 at auction. Anyone can purchase but the real intent of the allowance  
2 pool was to ensure that allowances would be available for new units or  
3 new entrants to the energy market. Once these allowances are sold,  
4 proceeds are returned to the company which provided the allowances.

5 In the current true-up period, the Company did not purchase or sell  
6 any EPA Sulfur Dioxide Emission Allowances. In the future, FPC may  
7 purchase additional allowances depending on market conditions and the  
8 Company's SO<sub>2</sub> compliance status.

9  
10 **Q. Were there any other unusual costs included in the current true-up**  
11 **period?**

12 **A. Yes.** On January 20, 1997, FPC entered into an agreement with Tiger  
13 Bay Limited Partnership to purchase the Tiger Bay cogeneration facility  
14 and terminate the five related purchase power agreements. The  
15 purchase agreement approved in Docket No. 970096-EQ was closed on  
16 July 15, 1997, at which time Tiger Bay became one of FPC's  
17 generating facilities. Pursuant with the terms and conditions of the  
18 approved stipulation, FPC will continue to collect revenues from its  
19 ratepayer's as if the five related purchase power agreements were still  
20 in effect. The revenues collected would then be used to offset all fuel  
21 expenses relating to the Tiger Bay facility and interest applicable to the  
22 unamortized balance of the retail portion of the Tiger Bay regulatory  
23 asset, with any remaining balance used to amortize the regulatory  
24 asset. Approximately \$75 million of the purchase price was included  
25 in the existing rate base. The remaining amount was set up as a

1 regulatory asset for both the wholesale and retail jurisdictions,  
2 according to FPC's jurisdictional separation at that time.

3 The method approved in the stipulation for amortizing the Tiger  
4 Bay regulatory asset, using PPA revenues minus fuel expense and  
5 interest, results in the retail regulatory asset being fully amortized by  
6 January 2008. For the period ending March 31, 1998, the Tiger Bay  
7 retail regulatory asset balance, as computed in accordance with the  
8 approved stipulation and presented on Exhibit (JS-3), stands at  
9 \$344,691,567.

#### 10 11 CAPACITY COST RECOVERY

12 **Q. What is the Company's jurisdictional ending balance as of March 31,**  
13 **1998 for capacity cost recovery?**

14 **A. The actual ending balance as of March 31, 1998 for true-up purposes**  
15 **is an overrecovery of \$1,695,400.**

16  
17 **Q. How does this amount compare to the Company's estimated ending**  
18 **balance included in the April 1998 through September 1998 period?**

19 **A. When the estimated overrecovery of \$4,007,164 to be collected during**  
20 **the period of April 1998 through September 1998 is taken into account**  
21 **the final true-up attributable to the six month period ended March 1998**  
22 **period is an underrecovery of \$2,311,764**

23  
24 **Q. Is this true-up calculation consistent with the true-up methodology used**  
25 **for the other cost recovery clauses?**

1 A. Yes. The calculation of the final net true-up amount follows the  
2 procedures established by this Commission as set forth on FPSC  
3 Schedule A2 "Calculation of True-Up and Interest Provision" for the  
4 Fuel Cost Recovery Clause but adjusted to remove the costs incurred  
5 by FPC related to the change in capacity rates and the buyout  
6 payments to Lake Cogen Limited that amounted to \$1.1 million. Also  
7 excluded were the costs incurred by FPC for the buyout payments to  
8 Orlando Cogen, Ltd. In the amount of \$5.0 million, based on the  
9 Commission's decision in Docket No. 961184-EQ to deny approval of  
10 the buyout.

11  
12 **Q. What factors contributed to the actual period-end overrecovery of \$1.7**  
13 **million?**

14 A. Exhibit No. 2 (JS-2), sheet 1 of 3, entitled "Capacity Cost Recovery  
15 Clause Summary of Actual True-Up Amount," compares the summary  
16 items from sheet 2 of 3 to the original forecast for the period. As can  
17 be seen from sheet 1, the actual jurisdictional capacity cost revenues  
18 were in line with forecasted revenues, and net capacity expenses were  
19 \$1.7 million lower due to the failure of several cogenerators to meet  
20 their contractual capacity factors.

21  
22 **Q. Does this conclude your testimony?**

23 A. Yes, it does.

**FLORIDA POWER CORPORATION  
DOCKET NO. 980001-EI**

**Levelized Fuel and Capacity Cost Factors  
October 1998 through December 1998**

**DIRECT TESTIMONY OF  
KARL H. WIELAND**

1 **Q. Please state your name and business address.**

2 A. My name is Karl H. Wieland. My business address is Post Office Box  
3 14042, St. Petersburg, Florida 33733. I am employed by Florida Power  
4 Corporation as Manager of Financial Analysis.

5

6 **Q. Have you previously testified in this proceeding?**

7 A. Yes, I have.

8

9 **Q. What is the purpose of your testimony?**

10 A. The purpose of my testimony is to present for Commission approval the  
11 Company's levelized fuel and capacity cost factors for the period of  
12 October 1998 through December 1998. In accordance with Commission  
13 Order No. PSC-98-0691-FOF-PU, fuel adjustment filings will be prepared  
14 on a 12-month calendar year basis for submission in October 1998, with  
15 the approved factors effective in January 1999. To bridge the transition  
16 period between the expiration of the currently approved factors for the April  
17 - September 1998 period and the effectiveness of the new 12-month factors

1 in January 1999, Florida Power proposes that the Commission approve a  
2 continuation of the current April - September factors through December  
3 1998. In support of this proposal, my testimony provides a full projection  
4 of costs for the entire October 1998 - March 1999 period. I also project  
5 true-up balances for fuel and capacity costs at the end of the three-month  
6 transition period under the proposed continuation of the current factors and  
7 compare them with the December ending balances that would result if  
8 factors based on the full October - March projections were adopted.

9  
10 **Q. Why is the Company proposing to continue the currently effective**  
11 **factors rather than adopting factors based on projected cost as is**  
12 **normally the case?**

13 A. The Company is proposing this course of action in order to reduce the  
14 number of rate changes that customers experience. As shown below,  
15 continuing current factors leads to an over-recovery of fuel costs, but a  
16 nearly equal under-recovery of capacity costs, with the total true-up  
17 balance remaining substantially the same. This indicates that the current  
18 factors, in combination, closely match total costs for the three-month  
19 transition period from October through December 1998.

20  
21 **Q. What are the projected December-ending true-up balances under**  
22 **Florida Power's proposal?**

23 A. As shown in Part E, Sheet 1 of 2, of my exhibit, continuing the existing  
24 factors will result in a combined true-up over-recovery for fuel and capacity  
25 costs of \$4,361,745 at the end of December 1998. Using factors based on

1 full October 1998 - March 1999 projections would result in a combined  
2 December ending over-recovery of \$3,023,869. The difference of  
3 \$1,337,876 represents only 0.3% of combined fuel and capacity costs for  
4 the six-month projection period. The difference is so small because of the  
5 fact that fuel factors tend to be lower in the winter period than in the  
6 summer, whereas capacity cost factors act in the opposite manner. As a  
7 result, while rate components differ from season to season, total costs and  
8 the combined factors remain fairly constant.

9  
10 **2. Do you have an exhibit to your testimony?**

11 A. Yes. I have prepared an exhibit attached to my prepared testimony  
12 consisting of Parts A through E and the Commission's minimum filing  
13 requirements for these proceedings, Schedules E1 through E10 and H1,  
14 which contain levelized fuel cost factors and the supporting data derived  
15 from cost projections for the October 1998 - March 1999 period. Parts A  
16 through C contain the assumptions which support these projections, Part  
17 D contains capacity cost recovery factors and supporting data for the same  
18 period. Part E compares projected true-up balances at the end of  
19 December, 1998 under the Company's proposal to continue the current  
20 factors, with projected December ending true-up balances using factors  
21 based on costs for the six-month October - March projection period.

**FUEL COST RECOVERY**

1  
2 **Q. Please describe the levelized fuel cost factors based on cost**  
3 **projections for the full six-month October 1998 through March 1999**  
4 **period.**

5 A. Schedule E1, page 1, of the "E" Schedules section of my exhibit, shows the  
6 calculation of the basic fuel cost factor of 1.782 ¢/kWh (before line loss  
7 adjustment). The basic factor consists of a fuel cost for the projection  
8 period of 1.76147 ¢/kWh (adjusted for jurisdictional losses), a GPIF penalty  
9 of 0.00288 ¢/kWh, nuclear replacement cost of 0.11028 ¢/kWh, and an  
10 estimated prior period true-up credit of (0.08883) ¢/kWh.

11 Factors for secondary, primary, and transmission metering tariffs as  
12 well as time of use factors are shown on Schedules E1-D and E1-E.

13  
14 **Q. How does this factor compare with the factor currently in effect?**

15 A. The fuel factor in effect for the current April - September period is 2.122  
16 ¢/kWh. This reduction from the current factor is normal, since fuel costs are  
17 typically lower during the winter period than they are in the summer.

18  
19 **Q. Would you give a brief overview of the procedure used in developing**  
20 **the projected fuel cost data from which the October 1988 through**  
21 **March 1999 fuel cost recovery factor was calculated?**

22 A. Yes. The methodology employed to produce the forecast for the projection  
23 period is the same methodology used in all of the Company's previous  
24 filings. The process begins with the fuel price forecast and the system  
25 sales forecast. These forecasts are input into PROMOD, along with

1 purchased power information, generating unit operating characteristics,  
2 maintenance schedules, and other pertinent data. PROMOD then  
3 computes system fuel consumption, replacement fuel costs, and energy  
4 purchases and costs. This data is input into a fuel inventory model, which  
5 calculates average inventory fuel costs. This information is the basis for  
6 the calculation of the Company's levelized fuel cost factors and supporting  
7 schedules.

8  
9 **Q. What is the estimated true-up balance at the end of December 1998 if**  
10 **the reduced fuel factor based on the October - March projections were**  
11 **to be implemented?**

12 **A.** As shown on my Exhibit E, the projected balance is an over-recovery of  
13 \$3,675,827. This balance was calculated using an actual May, 1998  
14 under-recovery balance of \$18,850,757, and projecting it to the end of  
15 December 1998, including interest estimated at the May ending rate of  
16 0.460% per month. The development of the estimated true-up amount for  
17 the current April through September 1998 period is shown on Schedule  
18 E1B, Sheet 1, and the projection for October through December 1998 is on  
19 Sheet 1a.

20  
21 **Q. What is the projected December ending true-up balance if the current**  
22 **fuel factor of 2.122 ¢/kWh is used during the October - December**  
23 **transition period?**

1 A. Continuation of the higher current factor produced additional fuel revenues  
2 of \$17,870,419. When interest is added, the true-up balance at the end of  
3 December is projected to be an over-recovery of \$21,674,632.  
4

#### 5 CAPACITY COST RECOVERY

6 **Q. How was the Capacity Cost Recovery factor for the October 1998 -**  
7 **March 1999 period developed?**

8 A. The calculation of the capacity cost recovery factor is based on projected  
9 costs for the October 1998 through March 1999 period and was developed  
10 in the same manner as in previous six-month projections. The calculation  
11 of the factor is shown in Part D of my exhibit. The capacity cost recovery  
12 factor for residential customers increases from the current 1.004 ¢/kWh to  
13 1.275 ¢/kWh. This increase is normal for the winter period because there  
14 is an annual increase in capacity payments. Furthermore, kWh sales are  
15 lower during that period, which increases the factor even if total costs  
16 remain the same.  
17

18 **Q. What is the estimated true-up balance for the end of December 1998**  
19 **if the increased capacity cost factors based on the October - March**  
20 **projections were to be implemented?**

21 A. As shown on Part E of my exhibit, the projected balance is an under-  
22 recovery of \$(651,958).

1 Q. What is the estimated December-ending true-up balance if the current  
2 capacity cost factors are used during the October - December  
3 transition period?

4 A. The current factors reduce capacity revenues by \$16,527,834. When  
5 interest is added, the true-up balance at the end of December is projected  
6 to be an under-recovery of \$(17,312,887).  
7

8 Q. Does this conclude your testimony?

9 A. Yes.

**FLORIDA POWER CORPORATION****Docket No. 980001-EI****Re: GPIF Reward/Penalty Amount for  
October 1997 through March 1998****DIRECT TESTIMONY OF  
DARIO B. ZULOAGA**

1 **Q. Please state your name and business address.**

2 A. My name is Dario B. Zuloaga. My business address is P. O. Box 14042, St.  
3 Petersburg, Florida 33733.

4

5 **Q. By whom are you employed and in what capacity?**

6 A. I am employed by Florida Power Corporation as a Principal Engineer in  
7 Energy Supply, Performance Services.

8

9 **Q. What are your responsibilities as Principal Engineer?**

10 A. As a Principal Engineer, I am responsible for compiling and reporting  
11 various operational statistics regarding the Company's generating system.  
12 In particular, my duties include the preparation of the information and  
13 material required by the Commission's GPIF mechanism.

14

15 **Q. What is the purpose of your testimony?**

16 A. The purpose of my testimony is to describe the calculation of the Company's  
17 Generation Performance Incentive Factor (GPIF) reward/penalty amount for  
18 the period of October 1997 through March 1998. This was developed by

1 comparing the actual performance of the Company's seven GPIF generating  
2 units to the approved targets set for these units prior to the period.

3  
4 **Q. Do you have an exhibit to your testimony in this proceeding?**

5 A. Yes, under my direction an exhibit (DBZ-1) has been prepared consisting  
6 of the numbered sheets which are attached to my prepared testimony. The  
7 exhibit contains the schedules required by the GPIF Implementation  
8 Manual, which support the development of the incentive amount. I have  
9 also included other data forms to supplement the required schedules.

10  
11 **Q. What GPIF incentive amount have you calculated for this period?**

12 A. I have calculated the Company's GPIF incentive amount to be a penalty of  
13 \$436,639. This amount was developed in a manner consistent with the  
14 GPIF Implementation Manual. Sheet 1 of my exhibit shows the calculation  
15 of system GPIF points and the corresponding reward. The summary of  
16 weighted incentive points earned by each individual unit can be found on  
17 Sheet 3.

18  
19 **Q. How were the incentive points for equivalent availability and heat rate  
20 calculated for the individual GPIF units?**

21 A. The calculation of incentive points is made by comparing the adjusted  
22 actual performance data for equivalent availability and heat rate to the  
23 target performance indicators for each unit. This comparison is shown on

1 the Generating Performance Incentive Points Table found on Sheets 8  
2 through 14 of my exhibit.

3 In performing this calculation, an adjustment was made to correct an  
4 error that was discovered in the equivalent availability and heat rate targets  
5 for Crystal River 3 (CR3). When our GPIF targets were filed last July, CR3  
6 was projected to return to service from its extended outage on January 1,  
7 1998 and operate for the last three months of the October 1997 - March  
8 1998 period with an equivalent availability of 91.37%. By mistake, however,  
9 this three-month availability figure was entered as CR3's equivalent  
10 availability for the entire six-month period, rather than the correct figure of  
11 45.77%. The error in CR3's heat rate target resulted from the erroneous  
12 entry of 20,115,295 MMBtu for the October 1997 - March 1998 projection  
13 period, instead of 15,989,348 MMBtu, the correct figure for three months of  
14 operations. Correcting this error produces a heat rate target for CR3 of  
15 10,267 Btu/kWh, rather than the erroneous target of 12,917 Btu/kWh.

16  
17 **Q. Why is it necessary to make adjustments to the actual performance**  
18 **data for comparison with the targets?**

19 A. Adjustments to the actual equivalent availability and heat rate data are  
20 necessary to allow their comparison with the "target" Point Tables exactly  
21 as approved by the Commission prior to the period. These adjustments are  
22 described in the Implementation Manual and are further explained by a Staff  
23 memorandum, dated October 23, 1981, directed to the GPIF utilities. The  
24 adjustments to actual equivalent availability concern primarily the

1 differences between target and actual planned outage hours, and are  
2 shown on Sheet 6 of my exhibit. The heat rate adjustments concern the  
3 differences between the target and actual Net Output Factor (NOF), and are  
4 shown on Sheet 7. The methodology for both the equivalent availability and  
5 heat rate adjustments are explained in the Staff memorandum.

6  
7 **Q. Have you provided the as-worked planned outage schedules for the**  
8 **Company's GPIF units to support your adjustments to actual**  
9 **equivalent availability?**

10 A. Yes. Sheet 22 of my exhibit summarizes every planned outage experienced  
11 by the Company's GPIF units during the period. Sheets 23 through 28  
12 present an as-worked critical path chart for each individual planned outage.

13  
14 **Q. Does this conclude your testimony?**

15 A. Yes.

**FLORIDA POWER CORPORATION  
DOCKET No. 980001-EI**

**GPIF Targets and Ranges for  
October 1998 through December 1998  
and for  
October 1998 through March 1999**

**DIRECT TESTIMONY OF  
DARIO B. ZULOAGA**

1 **Q. Please state your name and business address.**

2 A. My name is Dario B. Zuloaga. My business address is Post Office Box  
3 14042, St. Petersburg, Florida 33733.  
4

5 **Q. By whom are you employed and in what capacity?**

6 A. I am employed by Florida Power Corporation as a Principal Engineer in  
7 Energy Supply, Performance Services.  
8

9 **Q. Have the duties and responsibilities of your position with the**  
10 **Company remained the same since you last testified in this**  
11 **proceeding?**

12 A. Yes, they have.  
13

14 **Q. What is the purpose of your testimony?**

15 A. The purpose of my testimony is to present the development of the  
16 Company's Generating Performance Incentive Factor (GPIF) targets and

1 ranges for the period of October through December 1998. In accordance  
2 with Commission Order No. PSC-98-0691-FOF-PU, fuel adjustment filings,  
3 including the GPIF, will be prepared on a 12-month calendar year basis  
4 beginning in January 1999. While the order did not specify how the  
5 transition to a calendar year GPIF was to be made, my testimony offers a  
6 transition alternative that could be implemented at the August hearings if the  
7 Commission desires to consider the GPIF transition issue at that time. My  
8 testimony also includes the "traditional" GPIF targets and ranges for the full  
9 six-month October 1998 - March 1999 period, from which the transition  
10 targets and ranges for the October - December period were developed.

11  
12 **Q. Do you have an exhibit to your testimony?**

13 A. Yes, I will sponsor the exhibit attached to my prepared testimony which  
14 consists of the GPIF standard form schedules prescribed in the  
15 Implementation Manual and supporting data, including unplanned outage  
16 rates, net operating heat rates, and computer analyses and graphs for each  
17 of the individual GPIF units for the full October 1998 - March 1999 period.  
18 In addition, my exhibit includes a more abbreviated set of transition  
19 schedules for the three-month October - December 1998 period  
20 corresponding with each of the six-month schedules that reflect differences  
21 in the resulting GPIF targets, ranges and incentive points for the two  
22 periods.

1           **Transition Targets and Ranges for October - December 1998**

2   **Q. How did you develop your proposed transition targets and ranges for**  
3   **the October - December 1998 period?**

4   A. The transition targets and ranges were developed from the same historical  
5   equivalent availability and heat rate data used in developing the targets  
6   and ranges for the full October 1998 - March 1999 period described later  
7   in my testimony. The only differences between the two are (a) the effect of  
8   planned outages during the six-month period that fall disproportionately in  
9   or out of the three-month transition period, and (b) the development of the  
10   weighting factors used to determine the GPIF incentive points for the  
11   transition period, which are based on fuel savings derived from a separate  
12   series of PROMOD simulations for only the three-month period.

13  
14   **Q. Did you consider any other alternatives for the transition of the GPIF**  
15   **to a calendar year basis?**

16   A. Generally speaking, there appear to be three alternatives for dealing with  
17   the October - December 1998 transition period: (1) Suspending the GPIF  
18   for the October - December 1998 period; (2) establishing three-month  
19   targets and ranges for the October - December 1998 period, as described  
20   in my testimony above; and (3) establishing 15-month targets and ranges  
21   for the October 1998 - December 1999 period.

22           Clearly, the first alternative has simplicity in its favor and needs no  
23   specially crafted transition filing by a utility for it to be considered and  
24   implemented by the Commission. The third alternative, on the other hand,

1 is the most complicated of the three. We did not attempt to develop the 15-  
2 month alternative for this filing because of the limited time available and  
3 because, if this transition alternative were to be selected by the  
4 Commission, it would be more appropriately filed for the November  
5 hearings so that the 15-month projections could be developed in closer  
6 proximity to the projection period. We elected to include the three-month  
7 transition alternative in this filing because of its relative simplicity and  
8 because the October - December 1998 period is sufficiently close to the  
9 August hearings to give the Commission the option of either considering  
10 this alternative at that time if it so desired, or deferring the transition issue  
11 to the November hearings.

12  
13 **Targets and Ranges for October 1998 - March 1999**

14 **Q. Which of the Company's generating units have you included in the**  
15 **GPIF program for the upcoming projection period?**

16 **A.** We have included the same units as were included for the current period,  
17 Crystal River Units 1 through 5 and Anclote Units 1 and 2.

18  
19 **Q. Have you determined the equivalent availability targets and**  
20 **improvement/degradation ranges for the Company's GPIF units?**

21 **A.** Yes, I have. This information is included in the Target and Range  
22 Summary on page 3 of the portion of my exhibit for the October - March  
23 period.

1 **Q. How were the equivalent availability targets developed?**

2 A. The equivalent availability targets were developed using the methodology  
3 established for the Company's GPIF units, as set forth in Section 4 of the  
4 Implementation Manual. This method describes the formulation of graphs  
5 based on each unit's historic performance data for the four individual  
6 unplanned outage rates (i.e. forced, partial forced, maintenance and partial  
7 maintenance outage rates), which in combination constitute the unit's  
8 equivalent unplanned outage rate (EUOR). From operational data and  
9 these graphs, the individual target rates are determined by inspecting two  
10 years of twelve-month rolling averages and the scatter of monthly data  
11 points during the two-year period. The unit's four target rates are then  
12 used to calculate its unplanned outage hours for the projection period.  
13 When the unit's projected planned outage hours are taken into account, the  
14 hours calculated from these individual unplanned outage rates can then be  
15 converted into an overall equivalent unplanned outage factor (EUOF).  
16 Because factors are additive (unlike rates), the unplanned and planned  
17 outage factors (EUOF and POF) when added to the equivalent availability  
18 factor (EAF) will always equal 100%. For example, an EUOF of 15% and  
19 a POF of 10% results in an EAF of 75%.

20

21 The supporting graphs and a summary table of all target and range rates  
22 are contained in the section of my exhibit entitled "Unplanned Outage Rate  
23 Tables and Graphs".

1 **Q. What is the target equivalent availability factor for Crystal River 3?**

2 A. The EAF target for Crystal River 3 is 90.71%. Since no planned outages  
3 are scheduled for the upcoming winter period, the unit's EUOR and EUOF  
4 targets are both 9.29%.

5  
6 The availability targets for the current period were developed after  
7 removing from the historical data base, all forced outage hours associated  
8 with the voluntary shutdown of the unit to address several design issues  
9 related to backup safety systems, including the emergency diesel  
10 generator.

11  
12 **Q. Please describe the method utilized in the development of the**  
13 **improvement/degradation ranges for each GPIF unit's availability**  
14 **targets.**

15 A. In general, the methodology described in the implementation manual was  
16 used. Ranges were first established for each of the four unplanned outage  
17 rates associated with each unit. From an analysis of the unplanned outage  
18 graphs, units with small historical variations in outage rates were assigned  
19 narrow ranges and units with large variations were assigned wider ranges.  
20 These individual ranges, expressed in terms of rates, were then converted  
21 into a single unit availability range, expressed in terms of a factor, using the  
22 same procedure described above for converting the availability targets from  
23 rates to factors.

1 **Q. Have you determined the net operating heat rate targets and ranges**  
2 **for the Company's GPIF units?**

3 A. Yes, I have. This information is also included in the Target and Range  
4 Summary on Page 3 of my exhibit for the October - March period.  
5

6 **Q. How were these heat rate targets and ranges developed?**

7 A. The development of the heat rate targets and ranges for the upcoming  
8 period utilized historical data from the past three comparable GPIF periods,  
9 as described in the Implementation Manual. A "least squares" computer  
10 program was used to curve-fit the heat rate data within ranges having a  
11 90% confidence level of including all data. The computer analyses and  
12 data plots used to develop the heat rate targets and ranges for each of the  
13 GPIF units are contained in the section of my exhibit entitled "Average Net  
14 Operating Heat Rate Curves".  
15

16 **Q. How were the GPIF incentive points developed for the unit availability**  
17 **and heat rate ranges?**

18 A. GPIF incentive points for availability and heat rate were developed by  
19 evenly spreading the positive and negative point values from the target to  
20 the maximum and minimum values in case of availability, and from the  
21 neutral band to the maximum and minimum values in the case of heat rate.  
22 The fuel savings (loss) dollars were evenly spread over the range in the  
23 same manner as described for the incentive points. The maximum savings

1 (loss) dollars are the same as those used in the calculation of weighting  
2 factors.

3  
4 **Q. How were the GPIF weighting factors determined?**

5 A. To determine the weighting factors for availability, a series of PROMOD  
6 simulations were made in which each unit's maximum equivalent availability  
7 was substituted for the target value to obtain a new system fuel cost. The  
8 differences in fuel costs between these cases and the target case  
9 determines the contribution of each unit's availability to fuel savings. The  
10 heat rate contribution of each unit to fuel savings was determined by  
11 multiplying the BTU savings between the minimum and target heat rates (at  
12 constant generation) by the average cost per BTU for that unit. Weighting  
13 factors were then calculated by dividing each individual unit's fuel savings  
14 by total system fuel savings.

15  
16 **Q. What was the basis for determining the estimated maximum incentive  
17 amount?**

18 A. The determination of the maximum reward or penalty was based upon  
19 monthly common equity projections obtained from a detailed financial  
20 simulation performed by the Company's Corporate Model.

21  
22 **Q. Does this conclude your testimony?**

23 A. Yes.

## 1 GULF POWER COMPANY

2 Before the Florida Public Service Commission

3 Prepared Direct Testimony and Exhibit of

4 Michael F. Oaks

Docket No. 980001-EI

Date of Filing: May 20, 1998

5 Q. Please state your name and business address.

6 A. My name is Michael F. Oaks and my business address is One Energy  
7 Place, Pensacola, Florida 32520-0328.8  
9 Q. What is your occupation?10 A. I am the Compliance and Fuel Supply Supervisor at Gulf Power  
11 Company.12  
13 Q. Mr. Oaks, will you please describe your education and experience?14 A. I graduated from Belhaven College in Jackson, Mississippi, in 1977 with a  
15 Bachelor of Science Degree in Chemistry. I joined Gulf Power Company  
16 in 1977 as a Chemist. Since then, I have held various positions with the  
17 Company, including Water Chemistry Specialist, Water Quality Specialist,  
18 Environmental Affairs Specialist, Environmental Audit Administrator, and  
19 Compliance Administrator. I was promoted to my present position in May  
20 1996.21  
22 Q. What are your duties as Fuel Supply Supervisor?23 A. I supervise and administer the Company's fuel procurement,  
24 transportation, budgeting, contract administration, and quality control to  
25 ensure the generating plants are provided a high quality fuel supply at the

1 lowest practical cost.

2

3 Q. Mr. Oaks, have you previously testified before this Commission?

4 A. Yes. I have presented testimony to this Commission.

5

6 Q. Mr. Oaks, what is the purpose of your testimony in this docket?

7 A. The purpose of my testimony is to summarize Gulf Power Company's fuel  
8 expenses and to certify that these expenses were properly incurred during  
9 the period October 1997 through March 1998. Also, it is my intent to be  
10 available to answer any questions that may arise among the parties to this  
11 docket concerning Gulf Power Company's fuel expenses.

12

13 Q. Have you prepared an exhibit that contains information to which you will  
14 refer in your testimony?

15 A. Yes. I have prepared an exhibit consisting of one schedule.

16

17 Counsel: We ask that Mr. Oaks' exhibit consisting of one schedule be  
18 marked as Exhibit No. 8 (MFO-1).

19

20 Q. During the period October 1, 1997, through March 31, 1998, how did Gulf's  
21 recoverable fuel expenses compare with the budget or projected expenses?

22 A. Gulf's recoverable fuel expense was \$91,912,127 as compared with the  
23 projected amount of \$90,767,914, or over our estimate by 1.26%. Gulf's  
24 total net system generation was 4,929,095 MWH compared to the  
25 projected generation of 4,845,120 MWH or 1.73% more than predicted.

1 The resulting total fuel cost per KWH generated was 1.8647¢/KWH or  
2 0.46% under the projected amount of 1.8734¢/KWH.

3

4 Q. How much spot coal did Gulf Power Company purchase during the period  
5 ending March 31, 1998?

6 A. Gulf purchased 972,355.89 tons or 42% of its supply from the spot coal  
7 market. My Schedule 1 of Exhibit No. 8 (MFO-1) consists of a list  
8 of contract and spot coal suppliers for the period ending March 31, 1998.

9

10 Q. How did the total projected cost of coal purchased compare with the  
11 actual cost?

12 A. Gulf purchased more coal during the period than projected. Conse-  
13 quently, the total cost of coal purchased was higher than projected.  
14 These additional purchases allowed the Company to increase inventory  
15 which was unusually low at the beginning of the period. The actual cost of  
16 coal burned for the period was only 1.2% higher than expected.

17

18 Q. Were there any other significant developments in Gulf's fuel procurement  
19 program during the period?

20 A. Yes, for the first time, Gulf engaged in a natural gas storage strategy to  
21 ensure a reliable supply at a reasonable cost during the winter months.  
22 Typically, natural gas prices rise during the winter in response to demand,  
23 and can also be subject to restricted availability during periods of peak  
24 demand. Gas storage protects customers from this price risk, and  
25 assures availability. Although cost savings from our storage plan did not

1 materialize due to unusually mild weather conditions this past winter, Gulf  
2 successfully ensured a firm supply of stored gas, thereby increasing  
3 reliability.

4  
5 Q. Should Gulf's fuel purchases for the period be accepted as reasonable  
6 and prudent?

7 A. Yes. Gulf's coal purchases were either from long term contracts or the  
8 competitive spot market. Coal vendors are selected by procedures  
9 designed to assure a deliverable quantity of acceptable quality coal for a  
10 specific term at the lowest available delivered cost. Gulf has administered  
11 the provisions of these contracts and purchase orders appropriately.  
12 Natural gas was purchased from the spot market on an as-needed basis  
13 or purchased and placed into storage to ensure a reliable supply. All of  
14 Gulf's oil purchases were from oil vendors selected by open bids to  
15 ensure the most economical price of oil.

16  
17 Q. Mr. Oaks, does this conclude your testimony?

18 A. Yes.

## 1 GULF POWER COMPANY

2 Before the Florida Public Service Commission

3 Prepared Direct Testimony and Exhibit of

4 Michael F. Oaks

5 Docket No. 980001-EI

6 Date of Filing: June 19, 1998

7 Q. Please state your name and business address.

8 A. My name is Michael F. Oaks and my business address is One Energy  
9 Place, Pensacola, Florida 32520-0328.

10 Q. What is your occupation?

11 A. I am the Compliance and Fuel Supply Supervisor at Gulf Power  
12 Company.

13 Q. Mr. Oaks, will you please describe your education and experience?

14 A. I graduated from Belhaven College in Jackson, Mississippi, in 1977 with a  
15 Bachelor of Science Degree in Chemistry. I joined Gulf Power Company  
16 in 1977 as a Chemist. Since then, I have held various positions with the  
17 Company, including Water Chemistry Specialist, Water Quality Specialist,  
18 Environmental Affairs Specialist, Environmental Audit Administrator, and  
19 Compliance Administrator. I was promoted to my present position in May  
20 1996.

21 Q. What are your duties as Fuel Supply Supervisor?

22 A. I supervise and administer the Company's fuel procurement,  
23 transportation, budgeting, contract administration, and quality control to  
24 ensure the generating plants are provided an adequate low cost fuel  
25

1 supply with minimal operational problems.

2

3 Q. Are you the same Michael F. Oaks who has previously submitted  
4 testimony in this proceeding.

5 A. Yes.

6

7 Q. Mr. Oaks, what is the purpose of your testimony in this docket?

8 A. The purpose of my testimony is to support Gulf Power Company's  
9 projection of fuel expenses for the period October 1, 1998 to  
10 December 31, 1998 and to be available to answer any questions that may  
11 occur concerning the Company's fuel procurement procedures.

12

13 Q. Have you prepared an exhibit that contains information to which you will  
14 refer in your testimony?

15 A. Yes. I have prepared an exhibit consisting of one schedule. Schedule 1  
16 of my exhibit is a tabulation of projected and actual fuel cost for the past  
17 ten years. The purpose of this schedule is to illustrate the accuracy of our  
18 short-term projections of fuel expenses.

19

20 Counsel: We ask that Mr. Oaks' exhibit consisting of one schedule be  
21 marked as Exhibit No. 9 (MFO-2).

22

23 Q. Has Gulf Power Company made any changes to its methods in this period  
24 for projecting fuel cost?

25 A. No.

1 Q. Will there be any major changes in Gulf's fuel purchasing program during  
2 this period?

3 A. No.  
4

5 Q. How much spot market coal does Gulf Power project it will purchase  
6 during the October 1998 through December 1998 period.

7 A. We are projecting the purchase of approximately 281,576 tons on the spot  
8 market. This represents approximately 24% of our projected purchase  
9 requirements.  
10

11 Q. Mr. Oaks, does this conclude your testimony?

12 A. Yes.  
13  
14

1                                    GULF POWER COMPANY

2                    Before the Florida Public Service Commission  
3                                    Direct Testimony of  
4                                    M. W. Howell  
5                                    Docket No. 980001-EI  
6                                    Date of Filing: May 20, 1998

7                    Q. Please state your name, business address and occupation.

8                    A. My name is M. W. Howell, and my business address is One  
9                                    Energy Place, Pensacola, Florida 32520. I am  
10                                    Transmission and System Control Manager for Gulf Power  
11                                    Company.

12                    Q. Have you previously testified before this Commission?

13                    A. Yes. I have testified in various rate case,  
14                                    cogeneration, territorial dispute, planning hearing,  
15                                    fuel clause adjustment, and purchased power capacity  
16                                    cost recovery dockets.

17  
18                    Q. Please summarize your educational and professional  
19                                    background.

20                    A. I graduated from the University of Florida in 1966 with  
21                                    a Bachelor of Science Degree in Electrical Engineering.  
22                                    I received my Masters Degree in Electrical Engineering  
23                                    from the University of Florida in 1967, and then joined  
24                                    Gulf Power Company as a Distribution Engineer. I have  
25                                    since served as Relay Engineer, Manager of Transmission,

1       Manager of System Planning, Manager of Fuel and System  
2       Planning, and Transmission and System Control Manager.  
3       My experience with the Company has included all areas of  
4       distribution operation, maintenance, and construction;  
5       transmission operation, maintenance, and construction;  
6       relaying and protection of the generation, transmission,  
7       and distribution systems; planning the generation,  
8       transmission, and distribution systems; bulk power  
9       interchange administration; overall management of fuel  
10      planning and procurement; and operation of the system  
11      dispatch center.

12             I am a member of the Engineering Committees and  
13      the Operating Committees of the Southeastern Electric  
14      Reliability Council and the Florida Reliability  
15      Coordinating Council, and have served as chairman of the  
16      Generation Subcommittee of the Edison Electric Institute  
17      System Planning Committee. I have served as chairman or  
18      member of many technical committees and task forces  
19      within the Southern electric system, the Florida  
20      Electric Power Coordinating Group, and the North  
21      American Electric Reliability Council. These have dealt  
22      with a variety of technical issues including bulk power  
23      security, system operations, bulk power contracts,  
24      generation expansion, transmission expansion,  
25      transmission interconnection requirements, central

1 dispatch, transmission system operation, transient  
2 stability, underfrequency operation, generator  
3 underfrequency protection, and system production  
4 costing.

5

6 Q. What is the purpose of your testimony in this  
7 proceeding?

8 A. I will summarize Gulf Power Company's purchased power  
9 recoverable costs for energy purchases and sales that  
10 were incurred during the October 1, 1997 through March  
11 31, 1998 recovery period. I will then compare these  
12 actual costs to their projected levels for the period  
13 and discuss the primary reasons for the differences.

14 I will also summarize the actual capacity expenses  
15 and revenues that were incurred during the October 1,  
16 1996 through September 30, 1997 recovery period, compare  
17 these figures to their projected levels, and discuss the  
18 reasons for the differences.

19

20 Q. During the period October 1, 1997 through March 31,  
21 1998, what was Gulf's actual purchased power recoverable  
22 cost for energy purchases and how did it compare with  
23 the projected amount?

24 A. Gulf's actual total purchased power recoverable cost for  
25 energy purchases, as shown on line 12 of Schedule A-1,

1 was \$9,427,206 for 600,652,515 KWH as compared to the  
2 projected amount of \$6,609,297 for 442,280,000 KWH. The  
3 actual cost per KWH purchased was 1.5695 ¢/KWH as  
4 compared to the projected 1.4944 ¢/KWH, or 5% above the  
5 projection. Although the actual unit price was higher  
6 than projected, it was lower than Gulf's 1.8647 ¢/KWH  
7 generation cost. Therefore, Gulf purchased 36% more KWH  
8 than projected.

- 9
- 10 Q. What were the events that influenced Gulf's purchase of  
11 energy?
- 12 A. During October, November, and December of the recovery  
13 period, Gulf's higher than projected territorial and  
14 off-system loads required it to purchase more economy  
15 power through the Southern electric system power pool at  
16 a higher unit price than was forecasted in order to meet  
17 its load obligations. However, Gulf was able to  
18 purchase this energy at a unit price lower than its  
19 generation cost to meet its territorial needs due to  
20 lower cost pool energy from higher than budgeted system  
21 nuclear and hydro generation.
- 22
- 23 Q. During the period October 1, 1997 through March 31,  
24 1998, what was Gulf's actual purchased power fuel cost  
25 for energy sales and how did it compare with the

1 projected amount?

2 A. Gulf's actual total purchased power fuel cost for energy  
3 sales, as shown on line 18 of Schedule A-1, was  
4 \$17,583,382 for 1,081,188,734 KWH as compared to the  
5 projected amount of \$13,588,600 for 839,460,000 KWH.  
6 This resulted in a variance above budget of \$3,994,782,  
7 or 29%. The actual fuel cost per KWH sold was 1.6263  
8 ¢/KWH as compared to 1.6187 ¢/KWH, or less than 1% above  
9 the projection.

10

11 Q. What were the events that influenced Gulf's sale of  
12 energy?

13 A. Gulf's energy sales were over the projection due to the  
14 Southern electric system's higher territorial and off-  
15 system load requirements. Because of this higher  
16 demand, Gulf was able to sell more of its higher cost  
17 energy to other pool members in order for them to meet  
18 their load.

19

20 Q. How are Gulf's net purchased power fuel costs affected  
21 by Southern electric system energy sales?

22 A. As a member of the Southern electric system power pool,  
23 Gulf Power participates in these sales. Gulf's  
24 generating units are economically dispatched to meet the  
25 needs of its territorial customers, the system, and

1 off-system customers.

2 Therefore, Southern system energy sales provide a  
3 market for Gulf's surplus energy and generally improve  
4 unit load factors. The cost of fuel used to make these  
5 sales is credited against, and therefore reduces,  
6 Gulf's fuel and purchased power costs. Overall, Gulf's  
7 Total Fuel and Net Power Transactions for the recovery  
8 period, as shown on line 20 of Schedule A-1, were  
9 slightly below budget.

10

11 Q. During the period October 1, 1996 through September 30,  
12 1997, how did Gulf's actual net purchased power capacity  
13 transactions compare with the net projected  
14 transactions?

15 A. My direct testimony during the August 1996 hearings in  
16 Docket No. 960001-EI stated that Gulf's net projected  
17 purchased power capacity cost for the October 1, 1996  
18 through September 30, 1997 recovery period was  
19 \$11,481,953. However, as I discussed in my testimony,  
20 this projected capacity cost did not include the  
21 positive effects of the revision to Southern Companies'  
22 Intercompany Interchange Contract (IIC) due to Amendment  
23 No. 6.

24 On November 22, 1996, Gulf Power Company filed a  
25 petition for a mid-course correction to the original

1 capacity cost recovery factors for the recovery period  
2 in order to reflect Gulf's substantial projected  
3 capacity cost savings produced by the implementation of  
4 IIC Amendment No. 6. The mid-course correction resulted  
5 in revised projected capacity costs for the October 1,  
6 1996 through September 30, 1997 recovery period of  
7 \$6,129,818. The new mid-course factors became effective  
8 beginning January 1997.

9 The actual net capacity cost for the October 1,  
10 1996 through September 30, 1997 recovery period was  
11 \$4,899,142. This represents a further decrease in cost  
12 of \$1,230,676, or 20% less than the revised projection.  
13

14 Q. Please explain the reasons for this capacity cost  
15 difference.

16 A. The \$1,230,676 capacity cost decrease is attributable to  
17 lower than expected IIC transaction costs in the months  
18 of January through September 1997, and is due to a  
19 slight decrease in actual owned capacity on the Alabama  
20 and Georgia Power systems. Under the capacity reserve  
21 equalization mechanism of the IIC, this lower owned  
22 capacity caused these companies to pick up a greater  
23 proportion of higher system reserves that resulted from  
24 lower system loads. During this time, Gulf's owned  
25 capacity was near projected levels and Gulf's IIC cost

1 was lower than projected. In summary, the lower  
2 reserves of other system operating companies due to  
3 lower owned capacity caused Gulf to have substantially  
4 lower capacity costs during the recovery period.  
5

6 Q. Did Gulf Power Company participate in any other capacity  
7 transactions that impacted its recoverable capacity  
8 costs during the October 1, 1996 through September 30,  
9 1997 recovery period?

10 A. Yes. The forecast of capacity costs for the recovery  
11 period only included transactions under Gulf's long-term  
12 capacity agreements. However, Gulf also participated in  
13 several short-term capacity purchases and sales from  
14 June through September 1997. These short-term capacity  
15 transactions were included in the actual IIC capacity  
16 equalization calculations, but they were not a factor in  
17 the overall capacity cost decrease for the recovery  
18 period.  
19

20 Q. Does this conclude your testimony?

21 A. Yes.  
22  
23  
24  
25

GULF POWER COMPANY

Before the Florida Public Service Commission  
Direct Testimony of  
M. W. Howell  
Docket No. 980001-EI  
Date of Filing: June 22, 1998

1  
2  
3  
4  
5  
6 Q. Please state your name, business address and occupation.

7 A. My name is M. W. Howell, and my business address is One  
8 Energy Place, Pensacola, Florida 32520. I am  
9 Transmission and System Control Manager for Gulf Power  
10 Company.

11

12 Q. Have you previously testified before this Commission?

13 A. Yes. I have testified in various rate case,  
14 cogeneration, territorial dispute, planning hearing,  
15 fuel clause adjustment, and purchased power capacity  
16 cost recovery dockets.

17

18 Q. Please summarize your educational and professional  
19 background.

20 A. I graduated from the University of Florida in 1966 with  
21 a Bachelor of Science Degree in Electrical Engineering.  
22 I received my Masters Degree in Electrical Engineering  
23 from the University of Florida in 1967, and then joined  
24 Gulf Power Company as a Distribution Engineer. I have  
25 since served as Relay Engineer, Manager of Transmission,

1       Manager of System Planning, Manager of Fuel and System  
2       Planning, and Transmission and System Control Manager.  
3       My experience with the Company has included all areas of  
4       distribution operation, maintenance, and construction;  
5       transmission operation, maintenance, and construction;  
6       relaying and protection of the generation, transmission,  
7       and distribution systems; planning the generation,  
8       transmission, and distribution systems; bulk power  
9       interchange administration; overall management of fuel  
10      planning and procurement; and operation of the system  
11      dispatch center.

12               I am a member of the Engineering Committees and  
13      the Operating Committees of the Southeastern Electric  
14      Reliability Council and the Florida Reliability  
15      Coordinating Council, and have served as chairman of the  
16      Generation Subcommittee of the Edison Electric Institute  
17      System Planning Committee. I have served as chairman or  
18      member of many technical committees and task forces  
19      within the Southern electric system, the Florida  
20      Electric Power Coordinating Group, and the North  
21      American Electric Reliability Council. These have dealt  
22      with a variety of technical issues including bulk power  
23      security, system operations, bulk power contracts,  
24      generation expansion, transmission expansion,  
25      transmission interconnection requirements, central

1 dispatch, transmission system operation, transient  
2 stability, underfrequency operation, generator  
3 underfrequency protection, and system production  
4 costing.

5

6 Q. What is the purpose of your testimony in this  
7 proceeding?

8 A. The purpose of my testimony is to support Gulf Power  
9 Company's projection of purchased power recoverable  
10 costs for energy purchases and sales for the period  
11 October, 1998 - December, 1998. Also, as part of the  
12 estimated true-up for the current recovery period  
13 (October 1997 - September 1998), I will support Gulf  
14 Power Company's updated projection of purchased power  
15 capacity costs for the months June 1998 through  
16 September 1998. Finally, I will support the Company's  
17 projection of purchased power capacity costs for the  
18 October, 1998 - December, 1998 recovery period. The  
19 projection data I support is used by Gulf's witness  
20 Susan Cranmer to calculate the estimated capacity cost  
21 true-up for the October 1997 - September 1998 recovery  
22 period and the total recoverable capacity cost for the  
23 period October 1998 - December 1998.

24

25

1 Q. Have you prepared an exhibit that contains information  
2 to which you will refer in your testimony?

3 A. Yes. My exhibit consists of one schedule to which I  
4 will refer. This schedule was prepared under my  
5 supervision and direction.

6 Counsel: We ask that Mr. Howell's Exhibit,  
7 comprised of one Schedule, be  
8 marked for identification as  
9 Exhibit 10 (MWH-1).  
10

11 Q. What is Gulf's projected purchased power recoverable  
12 cost for energy purchases for the October, 1998 -  
13 December, 1998 recovery period?

14 A. Gulf's projected recoverable cost for energy purchases,  
15 shown on line 12 of Schedule E-1 of the fuel filing, is  
16 \$2,594,610. These purchases result from Gulf's  
17 participation in the coordinated operation of the  
18 Southern electric system power pool. This amount is  
19 used by Ms. Cranmer as an input in the calculation of  
20 the fuel and purchased power cost adjustment factor.  
21

22 Q. What is Gulf's projected purchased power fuel cost for  
23 energy sales for the October, 1998 - December, 1998  
24 recovery period?

25 A. The projected fuel cost for energy sales, shown on line

1 18 of Schedule E-1, is \$ 8,215,600. These sales also  
2 result from Gulf's participation in the coordinated  
3 operation of the Southern electric system power pool.  
4 This amount is used by Ms. Cranmer as an input in the  
5 calculation of the fuel and purchased power cost  
6 adjustment factor.

7

8 Q. What information is contained in your exhibit?

9 A. Schedule 1 of my exhibit lists the power contracts that  
10 are included for capacity cost recovery, their  
11 associated megawatt amounts, and the resulting capacity  
12 dollar amounts.

13

14 Q. Which power contracts produce capacity transactions that  
15 are recovered through Gulf's purchased power capacity  
16 cost recovery factors?

17 A. The two primary power contracts that produce recoverable  
18 capacity transactions through Gulf's purchased power  
19 capacity recovery factors are the Southern electric  
20 system's Intercompany Interchange Contract (IIC) and  
21 Gulf's cogeneration capacity purchase contract with  
22 Monsanto Company. The Commission has authorized the  
23 Company to include capacity transactions under the IIC  
24 for recovery through the purchased power capacity cost  
25 recovery factors. Gulf will continue to have IIC

1 capacity transactions during the October, 1998 -  
2 December, 1998 recovery period. The energy transactions  
3 under this contract for these periods are handled for  
4 cost recovery purposes through the fuel cost recovery  
5 factors.

6 The Gulf Power/Monsanto cogeneration capacity  
7 contract enables Gulf to purchase 19 megawatts of firm  
8 capacity from June 1, 1996 until June 1, 2005. Gulf has  
9 included these costs for recovery during the October,  
10 1998 - December, 1998 recovery period. The energy  
11 transactions under this contract have also been approved  
12 by the Commission for recovery, and these costs are  
13 handled for cost recovery purposes through the fuel cost  
14 recovery factors.

15  
16 Q. Are there any other arrangements that produce capacity  
17 transactions that are recovered through Gulf's purchased  
18 power capacity cost recovery factors?

19 A. Yes. Gulf and other Southern electric system operating  
20 companies have purchased market capacity for 1998, and  
21 these purchases will continue through 2001. Gulf will  
22 have monthly costs associated with these market  
23 purchases for the October 1998 - December 1998 recovery  
24 period.

25

1 Q. Has Southern made any changes to the IIC that were used  
2 in the most recent recovery factor adjustment  
3 proceedings?

4 A. No. However, on November 1, 1997, in accordance with  
5 both the contract and the requirements of the FERC, the  
6 Southern electric system made its annual IIC  
7 informational filing with the FERC. The informational  
8 filing reflects updated historical load responsibility  
9 ratios, expected system load, and the capacity resource  
10 amounts for the 1998 budget cycle that are used in the  
11 IIC capacity equalization calculation to determine the  
12 capacity transactions and costs for each operating  
13 company. All of these changes are reflected in the  
14 projection of capacity transactions among the Southern  
15 electric system's operating companies for the October,  
16 1998 - December, 1998 recovery period.

17  
18 Q. Earlier in your testimony, you indicated that you would  
19 support Gulf Power Company's updated projection of  
20 purchased power capacity costs for the months June 1998  
21 through September 1998 as part of the estimated capacity  
22 cost true-up for the October 1997 - September 1998  
23 recovery period. Please discuss the Company's updated  
24 capacity cost projection.

25 A. Gulf's capacity costs for these months of the October

1 1997 - September 1998 recovery period are projected to  
2 increase due to revised system load and capacity  
3 information used in our IIC equalization calculation, as  
4 well as revised costs related to the Southern electric  
5 system market capacity purchases.

6 Gulf's IIC costs during June 1998 through  
7 September 1998 have been impacted by the removal of  
8 Municipal Electric Association of Georgia (MEAG) load  
9 from system load projections and by an increase in  
10 Georgia Power's owned capacity. Both of these changes  
11 have increased available reserves on the Southern  
12 electric system. Therefore, Gulf will purchase its  
13 share of these increased reserves and its IIC capacity  
14 costs are projected to increase accordingly.

15 Gulf's projected costs of market capacity  
16 purchases in the Summer of 1998 have increased due to  
17 additional market purchases. As I stated in my June 23,  
18 1997 testimony, these additional purchases were to be  
19 included in a future true-up filing. Rather than wait  
20 until the final true-up filing for the October 1997 -  
21 September 1998 recovery period, Gulf is including the  
22 updated amounts for market capacity purchases in its  
23 estimated true-up for the October 1997 - September 1998  
24 recovery period because the information is now  
25 available.

1 Q. What is the cost impact due to the changes in Gulf's IIC  
2 capacity transactions that were originally projected for  
3 June, 1998 through September, 1998?

4 A. IIC capacity transactions originally projected for June  
5 1998 through September 1998 produced revenues of  
6 \$1,110,098. Gulf now projects that its IIC capacity  
7 transactions will produce a \$681,926 capacity cost for  
8 June 1998 through September 1998. Therefore, the net  
9 IIC cost impact to Gulf is \$1,792,024.

10

11 Q. What is the cost impact due to the Gulf's additional  
12 market capacity purchases for June, 1998 through  
13 September, 1998?

14 A. The originally projected costs of June 1998 through  
15 September 1998 market capacity purchases were \$288,353.  
16 Gulf's market capacity purchases are now projected to be  
17 \$1,075,801. Therefore, the impact of these additional  
18 market capacity purchases is \$787,448.

19

20 Q. What are Gulf's IIC capacity transactions that are  
21 projected for the October, 1998 - December, 1998  
22 recovery period?

23 A. As shown on Schedule 1 of my exhibit, capacity  
24 transactions under the IIC vary during each month of the  
25 recovery period. IIC capacity purchases in the amount

1 of \$89,299 are projected for the period. IIC capacity  
2 sales during the same period are projected to be  
3 \$23,303. Therefore, the Company's net capacity  
4 transactions under the IIC for the period are net  
5 purchases amounting to \$65,996.

6  
7 Q. What is the cost of Gulf's capacity purchase from  
8 Monsanto that is projected for the October, 1998 -  
9 December, 1998 recovery period?

10 A. As shown on Schedule 1 of my exhibit, Gulf is projected  
11 to pay \$186,606, or \$62,202 per month, to Monsanto for  
12 the firm capacity purchase made pursuant to the  
13 Commission approved contract.

14  
15 Q. What is the cost of Gulf's market capacity purchases  
16 that is projected for the October, 1998 - December, 1998  
17 recovery period?

18 A. As shown on Schedule 1 of my exhibit, Gulf is projected  
19 to pay a total of \$566,286 for the committed market  
20 capacity purchases. Capacity in varying amounts will be  
21 purchased during the months of October through December  
22 of 1998. The individual suppliers and megawatt amounts  
23 are not shown, since this is highly sensitive and  
24 confidential information. Public availability of this  
25 information would seriously undermine our competitive

1 position and cause our customers increased cost.

2

3 Q. What are Gulf's total projected net capacity  
4 transactions for the October, 1998 - December, 1998  
5 recovery period?

6 A. As shown on Schedule 1 of my exhibit, the net purchases  
7 under the IIC, the Monsanto contract, and the committed  
8 market capacity purchases will result in a projected net  
9 capacity cost of \$818,888. This figure is used by Ms.  
10 Cranmer as an input into the calculation of the total  
11 capacity transactions to be recovered through the  
12 purchased power capacity cost recovery factors for this  
13 three month recovery period.

14

15 Q. Does this conclude your testimony?

16 A. Yes.

17

18

## GULF POWER COMPANY

1  
2 Before the Florida Public Service Commission  
3 Prepared Direct Testimony of  
4 Susan D. Cranmer  
5 Docket No. 980001-EI  
6 Fuel and Purchased Power Capacity Cost Recovery  
7 Date of Filing: May 20, 1998

8 Q. Please state your name, business address and occupation.

9 A. My name is Susan Cranmer. My business address is One  
10 Energy Place, Pensacola, Florida 32520-0780. I hold the  
11 position of Assistant Secretary and Assistant Treasurer  
12 of Gulf Power Company. In this position, I am  
13 responsible for supervising the Rates and Regulatory  
14 Matters Department.

15 Q. Please briefly describe your educational background and  
16 business experience.

17 A. I graduated from Wake Forest University in  
18 Winston-Salem, North Carolina in 1981 with a Bachelor of  
19 Science Degree in Business and from the University of  
20 West Florida in 1982 with a Bachelor of Arts Degree in  
21 Accounting. I am also a Certified Public Accountant  
22 licensed in the State of Florida. I joined Gulf Power  
23 Company in 1983 as a Financial Analyst. Prior to  
24 assuming my current position, I have held various  
25 positions with Gulf including Computer Modeling Analyst,

1 Senior Financial Analyst, and Supervisor of Rate  
2 Services.

3 My responsibilities include supervision of: tariff  
4 administration, cost of service activities, calculation  
5 of cost recovery factors, the regulatory filing function  
6 of the Rates and Regulatory Matters Department, and  
7 various treasury activities.

8  
9 Q. Have you prepared an exhibit that contains information  
10 to which you will refer in your testimony?

11 A. Yes, I have.

12 Counsel: We ask that Ms. Cranmer's Exhibit  
13 consisting of four schedules be  
14 marked as Exhibit No. 11 (SDC-1).

15  
16 Q. Are you familiar with the Fuel and Purchased Power  
17 (Energy) True-up Calculation for the period of October  
18 1997 through March 1998 and the Purchased Power Capacity  
19 Cost True-up Calculation for the period of October 1996  
20 through September 1997 set forth in your exhibit?

21 A. Yes. These documents were prepared under my  
22 supervision.

23

24

25

1 Q. Have you verified that to the best of your knowledge and  
2 belief, the information contained in these documents is  
3 correct?

4 A. Yes, I have.

5

6 Q. What is the amount to be refunded or collected through  
7 the fuel cost recovery factor in the period October 1998  
8 through December 1998?

9 A. An amount to be collected of \$225,379 was calculated as  
10 shown in Schedule 1 of my exhibit.

11

12 Q. How was this amount calculated?

13 A. The \$225,379 was calculated by taking the difference in  
14 the estimated October 1997 through March 1998 under-  
15 recovery of \$1,127,041 as approved in Order No.  
16 PSC-98-0412-FOF-EI, dated March 20, 1998 and the actual  
17 under-recovery of \$1,352,420 which is the sum of lines 7  
18 and 8 shown on Schedule A-2, page 2 of 3, Period-to-date  
19 of the monthly filing for March 1998.

20

21 Q. Ms. Cranmer, you stated earlier that you are responsible  
22 for the Purchased Power Capacity Cost True-up  
23 Calculation. Which schedules of your exhibit relate to  
24 the calculation of these factors?

25 A. Schedules CCA-1, CCA-2, and CCA-3 of my exhibit relate

1 to the Purchased Power Capacity Cost True-up Calculation  
2 for the period October 1996 through September 1997.

3

4 Q. What is the amount to be refunded or collected in the  
5 period October 1998 through December 1998?

6 A. An amount to be refunded of \$1,478,455 was calculated as  
7 shown in Schedule CCA-1 of my exhibit.

8

9 Q. How was this amount calculated?

10 A. The \$1,478,455 was calculated by taking the difference  
11 in the net estimated October 1996 through September 1997  
12 over-recovery of \$2,791,701 as approved in Order No.  
13 PSC-97-1045-FOF-EI, dated September 15, 1997 and the  
14 actual over-recovery of \$4,270,156 which is the sum of  
15 lines 11 and 12 under the total column of Schedule  
16 CCA-2.

17

18 Q. Please describe Schedules CCA-2 and CCA-3 of your  
19 exhibit.

20 A. Schedule CCA-2 shows the calculation of the actual over-  
21 recovery of purchased power capacity costs for the  
22 period October 1996 through September 1997. Schedule  
23 CCA-3 of my exhibit is the calculation of the interest  
24 provision on the over-recovery. This is the same method  
25 of calculating interest that is used in the Fuel and

1 Purchased Power (Energy) Cost Recovery Clause and the  
2 Environmental Cost Recovery Clause.

3

4 Q. Ms. Cranmer, does this complete your testimony?

5 A. Yes, it does.

## 1 GULF POWER COMPANY

2 Before the Florida Public Service Commission  
3 Prepared Direct Testimony of  
4 Susan D. Cranmer  
5 Docket No. 980001-EI  
6 Fuel and Purchased Power Cost Recovery  
7 Date of Filing: June 22, 1998

8 Q. Please state your name, business address and occupation.

9 A. My name is Susan Cranmer. My business address is One  
10 Energy Place, Pensacola, Florida 32520-0780. I hold the  
11 position of Assistant Secretary and Assistant Treasurer  
12 for Gulf Power Company.

13 Q. Please briefly describe your educational background and  
14 business experience.

15 A. I graduated from Wake Forest University in  
16 Winston-Salem, North Carolina in 1981 with a Bachelor of  
17 Science Degree in Business and from the University of  
18 West Florida in 1982 with a Bachelor of Arts Degree in  
19 Accounting. I am also a Certified Public Accountant  
20 licensed in the State of Florida. I joined Gulf Power  
21 Company in 1983 as a Financial Analyst. Prior to  
22 assuming my current position, I have held various  
23 positions with Gulf including Computer Modeling Analyst,  
24 Senior Financial Analyst, and Supervisor of Rate  
25 Services.

1           My responsibilities include supervision of: tariff  
2 administration, cost of service activities, calculation  
3 of cost recovery factors, the regulatory filing function  
4 of the Rates and Regulatory Matters Department, and  
5 various treasury activities.

6

7 Q.   Have you previously filed testimony before this  
8 Commission in Docket No. 980001-EI?

9 A.   Yes, I have.

10

11 Q.   What is the purpose of your testimony?

12 A.   The purpose of this testimony is to discuss the  
13 calculation of Gulf Power's fuel cost recovery factors  
14 for the period October 1998 through December 1998. I  
15 will also discuss the calculation of the purchased power  
16 capacity cost recovery factors for the period October  
17 1998 through December 1998. In addition to this direct  
18 testimony, I am submitting separate supplemental  
19 testimony in support of Gulf's request that new factors  
20 not be implemented until February 1999.

21

22 Q.   Are you familiar with the Fuel and Purchased Power Cost  
23 Recovery Clause Calculation for the period of October  
24 1998 through December 1998?

25 A.   Yes, these documents were prepared under my supervision.

1 Q. Have you verified that to the best of your knowledge and  
2 belief, the information contained in these documents is  
3 correct?

4 A. Yes, I have.

5 Counsel: We ask that Ms. Cranmer's Exhibit  
6 consisting of fourteen schedules,  
7 be marked as Exhibit No. 12 (SDC-2).  
8

9 Q. Ms. Cranmer, what has Gulf calculated as the fuel cost  
10 recovery true-up to normally be applied in the period  
11 October 1998 through December 1998?

12 A. The fuel cost recovery true-up for this period is a  
13 decrease of .0423¢/kwh. This includes a final true-up  
14 under-recovery for the October 1997 through March 1998  
15 period of \$225,379. As shown on Schedule E-1A, it also  
16 includes an estimated true-up over-recovery of  
17 \$1,097,022 for the current period. The resulting over-  
18 recovery is \$871,643.  
19

20 Q. What has been included in this filing to reflect the  
21 GPIF reward/penalty for the period of October 1997  
22 through March 1998?

23 A. This is shown on Line 32b of Schedule E-1 as an increase  
24 of .0030¢/kwh, thereby rewarding Gulf by \$62,632.  
25

- 1 Q. Ms. Cranmer, what is the levelized projected fuel factor  
2 for the period October 1998 through December 1998?
- 3 A. Gulf has calculated a levelized fuel factor of  
4 1.604¢/kwh. It includes projected fuel and purchased  
5 power energy expenses for October 1998 through December  
6 1998 and projected kwh sales for the same period, as  
7 well as the true-up and GPIF amount. The calculated  
8 levelized fuel factor also includes the special recovery  
9 amount associated with the Air Products special  
10 contract. The calculation of the special recovery  
11 amount is presented on Schedule E-12 of my exhibit. The  
12 levelized fuel factor has not been adjusted for line  
13 losses.  
14
- 15 Q. Ms. Cranmer, how were the line loss multipliers used on  
16 Schedule E-1E calculated?
- 17 A. They were calculated in accordance with procedures  
18 approved in prior filings and were based on Gulf's  
19 latest mwh Load Flow Allocators.  
20
- 21 Q. Ms. Cranmer, what fuel factor has Gulf calculated for  
22 its largest group of customers (Group A), those on Rate  
23 Schedules RS, GS, GSD, OSIII, and OSIV?
- 24 A. Gulf has calculated a standard fuel factor, adjusted for  
25 line losses, of 1.624¢/kwh for Group A. Fuel factors

1 for Groups A, B, C, and D are shown on Schedule E-1E.  
2 These factors have also been adjusted for line losses.

3

4 Q. Ms. Cranmer, how were the time-of-use fuel factors  
5 calculated?

6 A. These were calculated based on projected loads and  
7 system lambdas for the period October 1998 through  
8 December 1998. These factors included the GPIF,  
9 true-up, and special contract recovery cost amounts and  
10 were adjusted for line losses. These time-of-use fuel  
11 factors are also shown on Schedule E-1E.

12

13 Q. How does the calculated fuel factor for Rate Schedule RS  
14 compare with the factor applicable to September and how  
15 would the change affect the cost of 1000 kwh on Gulf's  
16 residential rate RS?

17 A. The current fuel factor for Rate Schedule RS applicable  
18 to September 1998 is 1.646¢/kwh compared with the  
19 calculated factor of 1.624¢/kwh. For a residential  
20 customer who uses 1000 kwh in October 1998, the fuel  
21 portion of the bill would decrease from \$16.46 to  
22 \$16.24.

23

24

25

1 Q. Ms. Cranmer, has Gulf updated its estimates of the  
2 as-available avoided energy costs to be shown on COG1 as  
3 required by Order No. 13247 issued May 1, 1984, in  
4 Docket No. 830377-EI and Order No. 19548 issued June 21,  
5 1988, in Docket No. 880001-EI?

6 A. Yes. A tabulation of these costs is set forth in  
7 Schedule E-11 of my Exhibit SDC-2. These costs  
8 represent the estimated averages for the period from  
9 October 1998 through September 2000.

10

11 Q. Ms. Cranmer, you stated earlier that you are responsible  
12 for the calculation of the purchased power capacity cost  
13 (PPCC) recovery factors. Which schedules of your  
14 exhibit relate to the calculation of these factors?

15 A. Schedule CCE-1, including CCE-1a and CCE-1b, and  
16 Schedule CCE-2 of my exhibit relate to the calculation  
17 of the PPCC recovery factors for the period October 1998  
18 through December 1998.

19

20 Q. Please describe Schedule CCE-1 of your exhibit.

21 A. Schedule CCE-1 shows the calculation of the amount of  
22 capacity payments to be recovered through the PPCC  
23 Recovery Clause. Mr. Howell has provided me with Gulf's  
24 projected purchased power capacity transactions under  
25 the Southern Company Intercompany Interchange Contract

1 (IIC), Gulf's contract with Monsanto Chemical Company,  
2 and certain market capacity transactions. Gulf's total  
3 projected capacity payments for the period October 1998  
4 through December 1998 are purchases of \$818,888. The  
5 jurisdictional amount is \$790,086. For the period,  
6 Gulf's requested recovery before true-up is the  
7 difference between the jurisdictional projected  
8 purchased power capacity costs and the approved  
9 adjustment for former capacity transactions embedded in  
10 current base rates. This adjustment amount was fixed in  
11 Order No. PSC-93-0047-FOF-EI, dated January 12, 1993, as  
12 an annual embedded credit of \$1,678,580, or \$1,652,000  
13 net of revenue taxes. Thus, the projected recovery  
14 amount that would be collected through the PPCC recovery  
15 factors in the period October 1998 through December 1998  
16 is \$1,203,086. This amount is added to the total true-  
17 up amount to determine the total purchased power  
18 capacity transactions that would be recovered in the  
19 period.

20  
21 Q. What has Gulf calculated as the purchased power capacity  
22 factor true-up to be applied in the period October 1998  
23 through December 1998?

24 A. The true-up for this period is an increase of \$911,323  
25 as shown on Schedule CCE-1a. This includes a final

1 capacity cost true-up amount for October 1996 through  
2 September 1997 of \$1,478,455 over-recovery. It also  
3 includes an estimated under-recovery of \$2,389,778 for  
4 the period October 1997 through September 1998 based on  
5 eight months of actual data and four months of estimated  
6 data. As discussed in his testimony, Mr. Howell has  
7 provided me with updated amounts for net capacity  
8 transactions for June through September 1998. Based on  
9 this latest projection, the under-recovery of capacity  
10 costs is expected to exceed 10% of the capacity costs  
11 originally projected for the period October 1997 through  
12 September 1998. Pursuant to Order No. 13694 in Docket  
13 No. 840001-EI, Gulf is hereby notifying the Commission  
14 that this situation is expected to occur. Rather than  
15 making a mid-course correction to the factors for the  
16 last two months of the current period, Gulf's calculated  
17 factors for the October through December 1998 period  
18 reflect the under-recovery.

19

20 Q. What methodology was used to allocate the capacity  
21 payments to rate class?

22 A. As required by Commission Order No. 25773 in Docket  
23 No. 910794-EQ, the revenue requirements have been  
24 allocated using the cost of service methodology used in  
25 Gulf's last full requirements rate case and approved by

1 the Commission in Order No. 23573 issued October 3,  
2 1990, in Docket No. 891345-EI. Although the capacity  
3 payments in that cost of service study were allocated to  
4 rate class using the demand allocator based on the  
5 twelve monthly coincident peaks projected for the test  
6 year, for purposes of the PPCC Recovery Clause, Gulf has  
7 allocated the net purchased power capacity costs to rate  
8 class with 12/13th on demand and 1/13th on energy. This  
9 allocation is consistent with the treatment accorded to  
10 production plant in the cost of service study used in  
11 Gulf's last rate case.

12

13 Q. How were the allocation factors calculated for use in  
14 the PPCC Recovery Clause?

15 A. The allocation factors used in the Purchased Power  
16 Capacity Cost Recovery Clause have been calculated using  
17 the 1997 load data filed with the Commission in  
18 accordance with FPSC Rule 25-6.0437. The calculations  
19 of the allocation factors are shown in columns A through  
20 I on Page 1 of Schedule CCE-2.

21

22 Q. Please describe the calculation of the cents/kwh factors  
23 by rate class used to recover purchased power capacity  
24 costs.

1 A. As shown in columns A through D on page 2 of Schedule  
2 CCE-2, the 12/13th of the jurisdictional capacity cost  
3 to be recovered is allocated to rate class based on the  
4 demand allocator, with the remaining 1/13th allocated  
5 based on energy. The total revenue requirement assigned  
6 to each rate class shown in column E is then divided by  
7 that class's projected kwh sales for the twelve-month  
8 period to calculate the PPCC recovery factor. This  
9 factor would be applied to each customer's total kwh to  
10 calculate the amount to be billed each month.

11

12 Q. What is the amount related to purchased power capacity  
13 costs recovered through this factor that would be  
14 included on a residential customer's bill for 1000 kwh?

15 A. The purchased power capacity costs recovered through the  
16 clause for a residential customer who uses 1000 kwh  
17 would be \$1.26.

18

19 Q. When does Gulf propose to collect its fuel charges and  
20 purchased power capacity charges?

21 A. The fuel and capacity factors will apply to October 1998  
22 through December 1998 billings beginning with Bill  
23 Group 1 meter readings scheduled on September 30, 1998  
24 and ending with meter readings scheduled on December 30,  
25 1998.

1 Q. Ms. Cranmer, does this complete your testimony?

2 A. Yes, it does.

## GULF POWER COMPANY

Before the Florida Public Service Commission  
Prepared Supplemental Direct Testimony of  
Susan D. Cranmer  
Docket Nos. 980001-EI and 980007-EI

Date of Filing: June 22, 1998

1  
2  
3  
4  
5  
6 Q. Please state your name, business address and occupation.

7 A. My name is Susan Cranmer. My business address is One  
8 Energy Place, Pensacola, Florida 32520-0780. I hold the  
9 position of Assistant Secretary and Assistant Treasurer  
10 for Gulf Power Company.

11

12 Q. Are you the same Susan D. Cranmer who has filed direct  
13 testimony in Dockets 980001-EI and 980007-EI?

14 A. Yes, I am. My direct testimony in those dockets  
15 supports the calculation of the fuel, capacity, and  
16 environmental cost recovery factors that would normally  
17 be applicable to the period October through December  
18 1998.

19

20 Q. What is the purpose of your supplemental direct  
21 testimony?

22 A. The purpose of this supplemental direct testimony is to  
23 support Gulf Power's proposal not to implement new cost  
24 recovery factors for the period October 1998 through

1 December 1998, which transitions the cost recovery  
2 process to an annual, calendar-year basis.

3

4 Q. What factors does Gulf propose for the October through  
5 December 1998 period and why?

6 A. Gulf proposes that the fuel, capacity, and environmental  
7 factors currently in effect for the recovery period  
8 ending September 1998 remain in effect for the period  
9 October through December 1998. This provides stability  
10 for our customers over a relatively short period of time  
11 by changing the cost recovery factors once (in January  
12 1999) rather than twice (in October 1998 and January  
13 1999) in a three-month period. In total, Gulf's overall  
14 fuel, capacity and environmental factors for the October  
15 through December 1998 period would increase only about  
16 1%. Leaving the factors the same for the three-month  
17 period would eliminate customer confusion related to a  
18 change in each factor, while leaving the overall bill  
19 essentially the same.

20 In addition, the administrative activities required  
21 to implement a change in cost recovery factors in  
22 October 1998 would be eliminated.

23

24 Q. In your direct testimony in Docket 980001-EI, you stated  
25 that the under-recovery of capacity costs is expected to

1 exceed 10% of the capacity costs originally projected  
2 for the period October 1997 through September 1998.  
3 Based on Gulf's proposal not to implement revised  
4 capacity factors in October 1998, will a mid-course  
5 correction be appropriate?

6 A. No, a mid-course correction would not be necessary. As  
7 I stated above, the sum of the fuel, capacity and  
8 environmental factors would remain fairly constant in  
9 the October through December 1998 period, with increases  
10 in capacity cost recovery amounts (including the  
11 expected under-recovery true-up amount) offset by  
12 decreases in fuel and environmental cost recovery  
13 amounts. Therefore, in order to stabilize the  
14 transition to annual, calendar-year factors, a mid-  
15 course correction to capacity factors should not be  
16 made.

17

18 Q. Does this conclude your supplemental direct testimony?

19 A. Yes.

20

21

22

23

24

25

1 GULF POWER COMPANY  
2 Before the Florida Public Service Commission  
3 Direct Testimony of  
4 G. D. Fontaine  
5 Docket No. 980001-EI  
6 Date of Filing May 20, 1998

7 Q. Please state your name, address and occupation.

8 A. My name is George D. Fontaine, my business address is  
9 One Energy Place, Pensacola, Florida 32520-0335, and my  
10 position is Performance Test Specialist for Gulf Power  
11 Company.

12  
13 Q. Please describe your educational and business  
14 background.

15 A. I received my Bachelor of Mechanical Engineering Degree  
16 from Auburn University in 1980. Following graduation,  
17 I joined Gulf Power Company as an Associate Engineer at  
18 the Scholz Electric Generating Plant, and as I  
19 previously stated, my current position is Performance  
20 Test Specialist. I am also a registered Professional  
21 Engineer in the State of Florida.

22  
23 Q. Mr. Fontaine, have you previously testified in this  
24 Docket?

25 A. Yes, sir.

1 Q. Mr. Fontaine, what is the purpose of your testimony in  
2 this proceeding?

3 A. The purpose of my testimony is to present GPIF results  
4 for Gulf Power Company for the period of October 1,  
5 1997, through March 31, 1998.

6

7 Q. Mr. Fontaine, have you prepared an exhibit that  
8 contains information to which you will refer in your  
9 testimony?

10 A. Yes, Sir, I have prepared an exhibit consisting of five  
11 schedules.

12

13 Q. Mr. Fontaine, was this exhibit prepared by you or under  
14 your direction and supervision?

15 A. Yes, it was.

16

17 Counsel: We ask that Mr. Fontaine's exhibit be  
18 marked for identification as exhibit 13 (GDF-1).

19

20 Q. Mr. Fontaine, before reviewing the GPIF Results for  
21 Gulf's units, is there any information which has been  
22 supplied to the Commission pertaining to this GPIF  
23 period which requires amendment?

24 A. Yes, some corrections need to be made to the actual  
25 unit performance data which was submitted monthly to

1 the Commission during this period. These corrections  
2 are based on discoveries made during our final review  
3 to determine the accuracy of this information prior to  
4 this proceeding. The Actual Unit Performance Data  
5 tables on pages 14 to 19 of Schedule 5 incorporate  
6 these changes. The data contained on these tables is  
7 the data upon which the GPIF calculation was made.  
8

9 Q. Mr. Fontaine, would you now review the Company's  
10 equivalent availability results for the period?

11 A. Actual equivalent availability and adjusted actual  
12 equivalent availability figures for each of the  
13 Company's GPIF units are shown on page 13 of Schedule  
14 5. Pages 3 through 8 of Schedule 2 contain the  
15 calculations for the adjusted actual equivalent  
16 availabilities.

17 A calculation of GPIF availability points based on  
18 these availabilities and the targets established by  
19 Commission Order PSC-97-1045-FOF-EI is on page 9 of  
20 Schedule 2. The results are: Crist 6, -1.36 points;  
21 Crist 7, -10.00 points; Smith 1, -5.83 points; Smith 2,  
22 -10.00 points; Daniel 1, +10.00 points, and Daniel 2,  
23 -10.00 points.  
24  
25

1 Q. Mr. Fontaine, what were the heat rate results for the  
2 period?

3 A. The detailed calculation of the actual average net  
4 operating heat rates for the Company's GPIF units is on  
5 pages 2 through 7 of Schedule 3. These heat rate  
6 figures have not at this point been adjusted in  
7 accordance with GPIF procedures for load and other  
8 factors to the bases of their targets.

9 As was done for the prior GPIF periods, and as  
10 indicated on pages 8 through 13 of Schedule 3, the  
11 target setting equations were used to adjust actual  
12 results to the target bases. These equations,  
13 submitted in June 1997, are shown on page 15 of  
14 Schedule 3.

15 As calculated on page 16 of Schedule 3, the  
16 adjusted actual average net operating heat rates  
17 correspond to GPIF unit heat rate points of: -2.24 for  
18 Crist 6, +2.66 for Crist 7, 0.00 for Smith 1, +7.49 for  
19 Smith 2, -0.63 for Daniel 1, and 0.00 for Daniel 2.

20

21 Q. Mr. Fontaine, what number of Company points were  
22 achieved during the period, and what reward or penalty  
23 is indicated by these points according to the GPIF  
24 procedure?

25 A. Using the unit equivalent availability and heat rate

1 points previously mentioned, along with the adjusted  
2 weighting factors, the Company points would be +0.73 as  
3 indicated on page 2 of Schedule 4. This calculates to  
4 a reward in the amount of \$62,632.

5

6 Q. Mr. Fontaine, would you please summarize your  
7 testimony?

8 A. Yes, Sir. In view of the adjusted actual equivalent  
9 availabilities, as shown on page 9 of Schedule 2, and  
10 the adjusted actual average net operating heat rates  
11 achieved, as shown on page 16 of Schedule 3, evidencing  
12 the Company's performance for the period, Gulf  
13 calculates a reward in the amount of \$62,632 as  
14 provided for by the GPIF plan.

15 Q. Mr. Fontaine, does this conclude your testimony?

16 A. Yes, Sir.

17

18

19

20

21

22

23

24

25

1 GULF POWER COMPANY  
2 Before the Florida Public Service Commission  
3 Direct Testimony of  
4 G. D. Fontaine  
5 Docket No. 980001-EI  
6 Date of Filing June 22, 1998

7 Q. Please state your name, address and occupation.

8 A. My name is George D. Fontaine, my business address is  
9 One Energy Place, Pensacola, Florida 32520-0335, and my  
10 position is Performance Test Specialist for Gulf Power  
11 Company.

12 Q. Please describe your educational and business  
13 background.

14 A. I received my Bachelor of Mechanical Engineering Degree  
15 from Auburn University in 1980. Following graduation,  
16 I joined Gulf Power Company as an Associate Engineer at  
17 the Scholz Electric Generating Plant, and as I  
18 previously stated, my current position is Performance  
19 Test Specialist. I am also a registered Professional  
20 Engineer in the State of Florida.

21  
22 Q. Have you previously testified in this Docket?

23 A. Yes. I have presented testimony regarding the  
24 Generating Performance Incentive Factor (GPIF)  
25 periodically for the past several years.

1 Q. What is the purpose of your testimony in this  
2 proceeding?

3 A. The purpose of my testimony today is to present GPIF  
4 targets for Gulf Power Company for the period of October 1,  
5 1998 through December 31, 1998.

6  
7 Q. Have you prepared an exhibit that contains information  
8 to which you will refer in your testimony?

9 A. Yes, I have prepared an exhibit consisting of three  
10 schedules.

11  
12 Q. Was this exhibit prepared by you or under your  
13 direction and supervision?

14 A. Yes, it was.

15  
16 Counsel: We ask that Mr. Fontaine's exhibit be  
17 marked for identification as exhibit 14 (GDF-2).

18  
19 Q. Which units does Gulf propose to include under the GPIF  
20 for the subject period?

21 A. We propose that Crist Units 6 and 7, Smith Units 1 and  
22 2, and Daniel Units 1 and 2 continue to be the  
23 Company's GPIF units.

24  
25

1 Q. What are the target heat rates Gulf proposes to use in  
2 the GPIF for these units for the performance period  
3 October 1, 1998 through December 31, 1998?

4 A. I would like to refer you to Page 32 of Schedule 1 of  
5 my exhibit where these targets are listed.

6  
7 Q. How were these proposed target heat rates determined?

8 A. In every case they were determined according to the  
9 GPIF implementation manual procedures for Gulf.  
10 Page 2 of Schedule 1 shows the target average net  
11 operating heat rate equations for the proposed GPIF  
12 units, and pages 4 through 29 of Schedule 1 contain the  
13 weekly historical data used for the statistical  
14 development of these equations.  
15 Pages 30 and 31 of Schedule 1 present the calculations  
16 which provide the unit target heat rates from the  
17 target equations.

18

19 Q. Were the maximum and minimum attainable heat rates for  
20 each proposed GPIF unit, indicated on page 32 of  
21 Schedule 1, calculated according to the appropriate  
22 GPIF implementation manual procedures?

23 A. Yes.

24

25

1 Q. What are the proposed target, maximum and minimum,  
2 equivalent availabilities for Gulf's units?

3 A. The target equivalent availabilities and their ranges  
4 are listed on page 4 of Schedule 2.

5

6 Q. How are these target equivalent availabilities  
7 determined?

8 A. The target equivalent availabilities were determined  
9 according to the standard GPIF implementation manual  
10 procedures for Gulf, and are presented on page 2 of  
11 Schedule 2.

12

13 Q. How were the maximum and minimum attainable equivalent  
14 availabilities determined for each unit?

15 A. The maximum and minimum attainable equivalent  
16 availabilities, which are presented along with their  
17 respective target availabilities on page 4 of Schedule  
18 2, were determined per GPIF manual procedures for Gulf.

19

20 Q. Mr. Fontaine, has Gulf completed the GPIF minimum  
21 filing requirements data package?

22 A. Yes, we have completed the required data. Schedule 3  
23 of my exhibit contains this information.

24

25

1 Q. Mr. Fontaine, would you please summarize your  
2 testimony?

3 A. Yes. Gulf asks that the Commission accept:

4 1. Crist Units 6 and 7, Smith Units 1 and 2 and Daniel  
5 Units 1 and 2, for inclusion under the GPIF for the  
6 period of October 1, 1998 through December 31, 1998.

7

8 2. The target, maximum attainable, and minimum  
9 attainable average net operating heat rates, as  
10 proposed by the Company and as shown on page 32 of  
11 Schedule 1 and also page 5 of Schedule 3 of my  
12 exhibit.

13

14 3. The target, maximum attainable, and minimum  
15 attainable equivalent availabilities, as proposed  
16 by the Company and as shown on Page 4 of Schedule  
17 2 and also page 5 of Schedule 3 of my exhibit.

18

19 4. The weekly average net operating heat rate least  
20 squares regression equations, shown on page 2 of  
21 Schedule 1 and also pages 18 through 23 of  
22 Schedule 3 of my exhibit, for use in adjusting the  
23 six-month actual unit heat rates to target  
24 conditions.

25

1 Q. Mr. Fontaine, does this conclude your testimony?

2 A. Yes, Sir.

25

1 BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

2 PREPARED DIRECT TESTIMONY

3 OF

4 KAREN O. ZWOLAK

5  
6 Q. Please state your name, address, occupation and employer.

7  
8 A. My name is Karen O. Zwolak. My business address is 702  
9 North Franklin Street, Tampa, Florida 33602. My position  
10 is Manager - Energy Issues in the Regulatory Affairs  
11 Department of Tampa Electric Company.

12  
13 Q. Please provide a brief outline of your educational  
14 background and business experience.

15  
16 A. I received a Bachelor of Arts Degree in Microbiology in  
17 1977 and a Bachelor of Science degree in Chemical  
18 Engineering in 1985 from the University of South Florida.  
19 I began my engineering career in 1986 at the Florida  
20 Department of Environmental Regulation and was employed as  
21 a Permitting Engineer in the Industrial Wastewater Program.  
22 In 1990, I joined Tampa Electric Company as an engineer in  
23 the Environmental Planning Department and was responsible  
24 for permitting and compliance issues relating to wastewater  
25 treatment and disposal. In 1995, I transferred to TEC's

1 Energy Supply Department and assumed the duties of the  
2 plant chemical engineer at the F. J. Gannon Station. In  
3 this position, I was responsible for boiler chemistry,  
4 water management, and maintenance of environmental  
5 equipment and general engineering support. In 1997, I was  
6 promoted to Manager, Energy Issues in the Electric  
7 Regulatory Affairs Department. My present responsibilities  
8 include the areas of fuel adjustment, capacity cost  
9 recovery, environmental filings and rate design.  
10

11 Q. What is the purpose of your testimony in this proceeding?  
12

13 A. The purpose of my testimony is to present the net true-up  
14 amounts for October 1997 through March 1998 period for both  
15 the Fuel Cost Recovery and the Capacity Cost Recovery  
16 Clauses.  
17

#### 18 FUEL COST RECOVERY CLAUSE

19

20 Q. What is the net true-up amount for the fuel cost recovery  
21 clause for the period October 1997 through March 1998?  
22

23 A. An over/(under) - recovery of \$53,414. The actual fuel  
24 cost over/(under) - recovery, including interest, is  
25 \$10,468,942 for the period October 1997 through March 1998

1 (Schedule A2, page 2 or 3, of March 1998 monthly filing, in  
2 Document No. 4, reflects an end of period total net true-up  
3 of \$4,426,535. Subtracting the beginning of period  
4 deferred true-up of (\$6,042,407) yields the \$10,468,942.  
5 This \$10,468,942 amount, less the actual/estimated  
6 over/(under) - recovery approved in the February 1998 fuel  
7 hearings of \$10,415,528 results in a final over/(under) -  
8 recovery for the period of \$53,414. This over/(under) -  
9 recovery amount of \$53,414 will be carried over and applied  
10 in the calculation of the fuel recovery factor for the  
11 period January 1999 through December 1999.

12  
13 Q. How much effect will this \$53,414 over/(under) - recovery  
14 in the October 1997 through March 1998 period, have on the  
15 January 1999 through December 1999 period?

16  
17 A. The \$53,414 over/(under) - recovery will not affect a 1,000  
18 KWH residential bill when spread over 12 months of energy.

19  
20 Q. How are the fuel revenues associated with the Florida  
21 Municipal Power Agency and the City of Lakeland wholesale  
22 sales treated in this final true-up filing?

23  
24 A. As per Order No. PSC-97-1273-FOF-EU, Tampa Electric shall  
25 credit its fuel clause with an amount equal to the system

1 incremental fuel cost resulting from the Florida Municipal  
2 Power Agency and Lakeland Sales served from TEC generating  
3 units.

4  
5 Q. Have you prepared an Exhibit in this proceeding?

6  
7 A. Yes. Exhibit No. (KOZ-1, Fuel Cost Recovery and Capacity  
8 Cost Recovery) which contains four documents. Document No.  
9 3 is used to explain the capacity cost recovery clause  
10 which is discussed later in my testimony. Document No. 4  
11 contains Commission Schedules A-1 through A-9 for the  
12 months of October 1997 through March 1998. Included with  
13 the March 1998 monthly filing is a six months summary for  
14 each of Commission Schedules A6, A7, A8, and A9 for the  
15 period October 1997 through March 1998.

16  
17 Q. Please explain Document No. 1.

18  
19 A. Document No. 1, entitled "Tampa Electric Company Final Fuel  
20 Over/(Under) - Recovery for the period October 1997 through  
21 March 1998" shows the calculation of the final fuel  
22 over/(under) - recovery for the period of \$53,414 which  
23 will be applied to jurisdictional sales during the period  
24 January 1999 through December 1999.

25

1 Line 1 shows the total company fuel costs of \$157,393,162  
2 for the period October 1997 through March 1998. The  
3 jurisdictional amount of total fuel costs is \$156,592,234  
4 as shown on line 2. This amount is compared to the  
5 jurisdictional fuel revenues applicable to the period on  
6 line 3 to obtain the actual over/(under) - recovered fuel  
7 costs for the period, shown on line 4. The resulting  
8 \$10,359,607 over/(under) - recovered fuel costs for the  
9 period, combined with \$109,335 of interest shown on line 5,  
10 constitute the actual over/(under) - recovery of  
11 \$10,468,942 shown on line 6. The \$10,468,942 less the  
12 actual/estimated over/(under) - recovery of \$10,415,528  
13 shown on line 7, which was approved in the February 1998  
14 fuel hearings, results in the final over/(under) - recovery  
15 of \$53,414 shown on line 8.

16  
17 Q. What does Document No. 2 show?

18  
19 A. Document No. 2, entitled "Tampa Electric Company  
20 Calculation of True-Up Amount Actual vs. Original Estimates  
21 for the period October 1997 through March 1998", shows the  
22 calculation of the actual over/(under) - recovery as  
23 compared to the original estimate for the same period.

24  
25 Q. What was the variance in jurisdictional fuel revenues for

1 the period October 1997 through March 1998?

2

3 A. As shown on line C1 of my Document No. 2, the company  
4 collected (\$3,820,025) less jurisdictional fuel revenues  
5 than originally estimated.

6

7 Q. What was the total fuel and net power transaction cost  
8 variance for the period October 1997 through March 1998?

9

10 A. As shown on line A7 of Document No. 2, the fuel and net  
11 power transactions cost variance is (\$11,239,487) or  
12 (6.7%).

13

14 Q. What are the reasons for the total fuel and net power  
15 transactions cost being lower by (\$11,239,487) or (6.7%)?

16

17 A. The primary reason for the (6.7%) decrease is due to Net  
18 Energy for Load being down (150,422) MWH or (2.0%). This  
19 (2.0%) combined with the ¢/KWH for Total Fuel and Net Power  
20 Transaction being less than estimated by (4.7%), accounts  
21 for the (6.7%) decrease.

22

23

#### CAPACITY COST RECOVERY CLAUSE

24

25 Q. What is the net true-up amount for the capacity cost

1 recovery clause for the period October 1997 through March  
2 1998?

3  
4 **A.** An over/(under) - recovery of (\$347,147). The actual  
5 capacity cost over/(under) - recovery, including interest,  
6 is (\$645,929) for the period October 1997 through March  
7 1998 (Document No. 3, pages 2 and 3 of 5). This amount,  
8 less the actual/estimated over/(under) - recovery approved  
9 in the February 1998 fuel hearings of (\$298,782) results in  
10 a final over/(under) - recovery for the period of  
11 (\$347,147) (Document No. 3, page 5 of 5). This  
12 over/(under) - recovery amount of (\$347,147) will be  
13 carried over and applied in the calculation of the capacity  
14 cost recovery factor for the period January 1999 through  
15 December 1999.

16  
17 **Q.** How much effect will this (\$347,147) over/(under) -  
18 recovery in the October 1997 through March 1998 period,  
19 have on the January 1999 through December 1999 period?

20  
21 **A.** The (\$347,147) over/(under) - recovery will cause a 1,000  
22 KWH residential bill to be approximately \$0.02 higher.

23  
24 **Q.** Does this conclude your testimony?  
25

1 A. Yes.

1                                   BEFORE THE PUBLIC SERVICE COMMISSION

2                                   PREPARED DIRECT TESTIMONY

3                                   OF

4                                   KAREN O. ZWOLAK

5  
6   Q.   Please state your name, address, occupation and employer.

7  
8   A.   My name is Karen O. Zwolak. My business address is 702  
9       North Franklin Street, Tampa, Florida 33602. My position  
10      is Manager - Energy Issues in the Regulatory Affairs  
11      Department of Tampa Electric Company.

12  
13   Q.   Please provide a brief outline of your educational  
14      background and business experience.

15  
16   A.   I received a Bachelor of Arts Degree in Microbiology in  
17      1977 and a Bachelor of Science degree in Chemical  
18      Engineering in 1985 from the University of South Florida.  
19      I began my engineering career in 1986 at the Florida  
20      Department of Environmental Regulation and was employed as  
21      a Permitting Engineer in the Industrial Wastewater Program.  
22      In 1990, I joined Tampa Electric Company as an engineer in  
23      the Environmental Planning Department and was responsible  
24      for permitting and compliance issues relating to wastewater  
25      treatment and disposal. In 1995, I transferred to Tampa

1 Electric's Energy Supply Department and assumed the duties  
2 of the plant chemical engineer at the F. J. Gannon Station.  
3 In this position, I was responsible for boiler chemistry,  
4 water management, and maintenance of environmental  
5 equipment and general engineering support. In 1997, I was  
6 promoted to Manager, Energy Issues in the Electric  
7 Regulatory Affairs Department. My present responsibilities  
8 include the areas of fuel adjustment, capacity cost  
9 recovery, environmental filings and rate design.  
10

11 Q. What is the purpose of your testimony?  
12

13 A. The purpose of my testimony is to sponsor Tampa Electric's  
14 Fuel and Purchased Power Cost Recovery Schedules and  
15 Capacity Cost Recovery Schedule and to support the  
16 company's proposal to extend the currently approved total  
17 Fuel and Purchased Power Cost Recovery factors and Capacity  
18 Cost Recovery factors ("cost recovery factors") during the  
19 three month period October 1998 through December 1998.  
20

21 Q. What would be the impact on Tampa Electric's customers of  
22 continuing your currently approved cost recovery factors  
23 during the months of October 1998 through December 1998?  
24

25 A. Tampa Electric has shown that an overrecovery of \$4,090,044

1 will result, based on projections provided in Exhibits  
2 (KOZ-4) and (KOZ-5), both of which were prepared under my  
3 direction and supervision. This overrecovery is associated  
4 with a cost differential of less than 5% which is  
5 significantly less than the amount which would trigger a  
6 mid-course correction. Therefore, Tampa Electric believes  
7 it is appropriate to continue applying its currently  
8 approved fuel adjustment factors through the end of 1998.

9  
10 Q. Do you wish to sponsor any additional exhibits in support  
11 of your testimony?

12  
13 A. Yes I do. Exhibit No. (KOZ-2) consisting of 29 pages was  
14 prepared under my direction and supervision, as was Exhibit  
15 (KOZ-3), regarding Capacity Cost Recovery.

16  
17 Q. Why does Tampa Electric propose extending the applicability  
18 of its currently approved cost recovery factors during the  
19 three month period October 1998 - December 1998?

20  
21 A. Tampa Electric's current cost recovery factors were  
22 approved by the Commission in Order No. PSC-98-0412-FOF-EI  
23 issued March 20, 1998 in this docket for use during the  
24 period April 1998 through September 1998. Subsequent to  
25 the entry of that order the Commission voted to change the

1 cost recovery clauses from a six month cost recovery period  
2 to an annual calendar year cost recovery period.<sup>1</sup> The  
3 Commission's decision in this regard requires a transition  
4 from the existing bi-annual hearing schedule to an annual  
5 schedule. Under the transition a hearing will be conducted  
6 in November of 1998 to set the cost recovery factors to be  
7 applied during the period January 1999 through December  
8 1999.

9  
10 As I stated earlier, the currently effective cost recovery  
11 factors were approved for use through September 1998.  
12 Tampa Electric has analyzed its fuel and capacity expense  
13 and kilowatt hour sales both for the current six month cost  
14 recovery period and projected through the three month  
15 transition period ending December 31, 1998 and has  
16 concluded that a continuation of the company's present cost  
17 recovery factors during the three month transition period  
18 of October 1998 through December 1998 is a preferable  
19 alternative to changing the factors on October 1 and again  
20 three months later.

21  
22 Maintaining the current factors will avoid potential  
23 customer confusion over fluctuating cost recovery factors

---

<sup>1</sup> Order No. PSC-98-0691-FOF-PU issued in Docket No. 980269-  
PU on May 19, 1998.

1 and will save all parties the administrative costs of  
2 placing new factors in place for the brief three month  
3 transition. Such stability of rates is one of the reasons  
4 why the Commission determined it appropriate to move from  
5 a six month cost recovery period to an annual calendar year  
6 period.

7  
8 Q. Is Tampa Electric also proposing to keep its temporary base  
9 rate reduction in place during the period September 1998  
10 through December 1998?

11  
12 A. Yes we are. Any over or under collection associated with  
13 the temporary base rate reduction factor will be handled as  
14 a true-up component in the normal course of the fuel  
15 adjustment proceedings as contemplated in the stipulation  
16 which brought about the reduction.

17  
18 Q. Will the GPIF component of the overall fuel adjustment  
19 factor remain in place under Tampa Electric's proposal?

20  
21 A. Yes. The Generation Performance Incentive Factor approved  
22 for the April 1998 through September 1998 cost recovery  
23 period would remain in place through December 1998. The  
24 penalty assessed each month has been continued through  
25 December in our proposal and will be trued up to the next

1 true-up filing. Pursuant to Staff's request, new GPIF  
2 targets and ranges will be calculated and submitted in the  
3 Company's projection filing in October 1998.

4

5 Q. Does this conclude your testimony?

6

7 A. Yes, it does.

8

1                   BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

2                                   PREPARED DIRECT TESTIMONY

3   OF

4   GEORGE A. KESELOWSKY

5  
6       Q. Will you please state your name, business address, and  
7       employer?

8  
9       A. My name is George A. Keselowsky and my business address is  
10      Post Office Box 111, Tampa, Florida 33601. I am employed  
11      by Tampa Electric Company.

12  
13     Q. Please furnish us with a brief outline of your educational  
14     background and business experience.

15  
16     A. I graduated in 1972 from the University of South Florida  
17     with a Bachelor of Science Degree in Mechanical  
18     Engineering. I have been employed by Tampa Electric  
19     Company in various engineering positions since that time.  
20     My current position is that of Senior Consulting Engineer  
21     - Energy Supply Engineering.

22  
23  
24  
25

1 Q. What are your current responsibilities?

2

3 A. I am responsible for testing and reporting unit  
4 performance, and the compilation and reporting of  
5 generation statistics.

6

7 Q. What is the purpose of your testimony?

8

9 A. My testimony presents the actual performance results from  
10 unit equivalent availability and station heat rate used to  
11 determine the Generating Performance Incentive Factor  
12 (GPIF) for the period October 1997 through March 1998. I  
13 will also compare these results to the targets established  
14 prior to the beginning of the period.

15

16 Q. Have you prepared an exhibit with the results for this six  
17 month period?

18

19 A. Yes. Under my direction and supervision an exhibit has  
20 been prepared entitled, "Tampa Electric Company, October  
21 1997 - March 1998, Generating Performance Incentive Factor  
22 Results" consisting of 28 pages that was filed with this  
23 testimony (Have identified as Exhibit GAK-1).

24

25

- 1 Q. Have you calculated the results of Tampa Electric Company  
2 for its performance under the GPIF during this period?  
3
- 4 A. Yes I have. This is shown on page 4 of my exhibit. Based  
5 upon - 0.911 GPIF points, the result is a penalty amount  
6 of \$188,281 for the period.  
7
- 8 Q. Please proceed with your review of the actual results for  
9 the October 1997 - March 1998 period.  
10
- 11 A. On page 3 of my exhibit, the actual average common equity  
12 for the period is shown on line 8 as \$1,123,610,573. This  
13 produces the maximum penalty or reward figure of  
14 \$2,273,380 as shown on line 15, page 3. Please note that  
15 the maximum allowed incentive dollar amount has been  
16 reduced to meet the constraint that it not exceed fifty  
17 percent of fuel savings. This is demonstrated on page 2  
18 of my exhibit.  
19
- 20 Q. Would you please explain how you arrived at the actual  
21 equivalent availability results for the six units included  
22 within the GPIF?  
23
- 24 A. Yes I will. Operating data on each of our operating units  
25 is filed monthly with the Florida Public Service

1 Commission on the Actual Unit Performance data form.  
2 Additionally, outage information is reported to the  
3 Commission on a monthly basis. A summary of this data for  
4 the six months provides the basis for the GPIF.  
5

6 Q. Are the equivalent availability results shown on page 6,  
7 column 2, directly applicable to the GPIF table?  
8

9 A. Not exactly. Adjustments to equivalent availability may  
10 be required as noted in section 4.3.3 of the GPIF Manual.  
11 The actual equivalent availability including the required  
12 adjustment is shown on page 6 of my exhibit. The  
13 necessary adjustments as prescribed in the GPIF Manual are  
14 further defined by a letter dated October 23, 1981, from  
15 Mr. J.H. Hoffsis of the Commission's Staff. The  
16 adjustments for each unit are as follows:  
17

18 Gannon Unit No. 5

19 On this unit, 504 planned outage hours were originally  
20 scheduled to fall within the Winter 1997 period. Due to a  
21 reprioritization of the outage schedule additional work  
22 was moved forward and accomplished in this period.  
23 Consequently, the actual equivalent availability of 53.6%  
24 is adjusted to 63.5% as shown on page 7 of my exhibit.  
25

1       Gannon Unit No. 6

2       On this unit, 48 planned outage hours were originally  
3       scheduled to fall within the Winter 1997 period. Due to a  
4       revision of the outage schedule, this work was moved  
5       forward to fall completely within the period, and 582.5  
6       planned outage hours fell within the period.  
7       Consequently, the actual equivalent availability of 63.7%  
8       is adjusted to 72.6%, as shown on page 8 of my exhibit.

9

10       Big Bend Unit No. 1

11       On this unit 336 planned outage hours were originally  
12       scheduled to fall within the Winter 1997 period. Due to a  
13       revision of the outage schedule no planned outage hours  
14       fell within the period. Consequently, the actual  
15       equivalent availability of 82.7% is adjusted to 76.3% as  
16       shown on page 9 of my exhibit.

17

18       Big Bend Unit No. 2

19       On this unit 336 planned outage hours were originally  
20       scheduled to fall within the Winter 1997 period. Due to a  
21       revision of the outage schedule, 248.5 planned outage  
22       hours fell within the period. Consequently, the actual  
23       equivalent availability of 77.3% is adjusted to 75.7% as  
24       shown on page 10 of my exhibit.

25

1       Big Bend Unit No. 3

2       On this unit 504 planned outage hours were originally  
3       scheduled to fall within the Winter 1997 period. Due to a  
4       revision of the outage schedule, outage activities were  
5       moved forward and accomplished prior to the period, and no  
6       planned outage hours fell within the period.  
7       Consequently, the actual equivalent availability of 80.5%  
8       is adjusted to 71.2% as shown on page 11 of my exhibit.

9

10       Big Bend Unit No. 4

11       On this unit 504 planned outage hours were scheduled to  
12       fall within the Winter 1997 period. Due to a revision of  
13       the outage schedule the outage was moved to occur after  
14       the end of the period. Consequently, the actual  
15       equivalent availability of 92.3% is adjusted to 81.5% as  
16       shown on page 12 of my exhibit.

17

18       Q. How did you arrive at the applicable equivalent  
19       availability points for each unit?

20

21       A. The final adjusted equivalent availabilities for each unit  
22       are shown on page 6, column 4, of my exhibit. This number  
23       is entered into the respective Generating Performance  
24       Incentive Point (GPIP) Table for each particular unit on  
25       pages 21 through 26. Page 4 of my exhibit summarizes the

- 1 equivalent availability points to be awarded or penalized.  
2
- 3 Q. Would you please explain the heat rate results relative to  
4 the GPIF?  
5
- 6 A. The actual heat rate and adjusted actual heat rate for  
7 Gannon and Big Bend Station are shown on page 6 of my  
8 exhibit. The adjustment was developed based on the  
9 guidelines of section 4.3.16 of the GPIF Manual. This  
10 procedure is further defined by a letter dated October 23,  
11 1981, from Mr. J.H. Hoffsis of the FPSC Staff. The final  
12 adjusted actual heat rates are also shown on page 5 of my  
13 exhibit. This heat rate number is entered into the  
14 respective GPIF table for the particular unit, shown on  
15 pages 21 through 26. Page 4 of my exhibit summarizes the  
16 weighted heat rate and equivalent availability points to  
17 be awarded.  
18
- 19 Q. Were any additional adjustments to heat rate required?  
20
- 21 A. In order to assure compatibility of data, Big Bend Unit 3  
22 heat rates have been calculated in the standard fashion,  
23 without scrubber power. This methodology has been  
24 reviewed and approved by the PSC staff, to be employed  
25 until there is sufficient operational history with the

1 scrubber to meet target preparation guidelines.

2

3 Q. Does this assure that the Big Bend 3 heat rate for the  
4 period is appropriate for comparison to its target and  
5 meets GPIF criteria?

6

7 A. Yes.

8

9 Q. What is the overall GPIF for Tampa Electric Company during  
10 this six month period?

11

12 A. This is shown on page 28 of my exhibit. Essentially, the  
13 weighting factors shown on page 4, column 3, plus the  
14 equivalent availability points and the heat rate points  
15 shown on page 4, column 4, are substituted within the  
16 equation. This resultant value, -0.911, is then entered  
17 into the GPIF table on page 2. Using linear  
18 interpolation, a penalty amount of \$188,281 is calculated.

19

20 Q. Does this conclude your testimony?

21

22 A. Yes, it does.

23

1                   **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2                                   **PREPARED DIRECT TESTIMONY**

3   **OF**

4   **ROD BURKHARDT**

5  
6   **Q.**   Please state your name, address and occupation.  
7

8   **A.**   My name is Rod Burkhardt. My mailing address is P.O. Box  
9           111, Tampa, Florida 33601, and my business address is 6944  
10          U.S. Highway 41 North ,Apollo Beach, Florida 33572. I am  
11          Manager, Fuels in the Energy Supply Department of Tampa  
12          Electric Company.  
13

14   **Q.**   Mr. Burkhardt, please furnish a brief outline of your  
15          educational background and business experience.  
16

17   **A.**   I graduated from the University Florida in July, 1977 with  
18          a Bachelor of Science degree in Chemistry. I began my  
19          career with Tampa Electric Company in July 1977 as a  
20          chemist in the Production Department. Between 1977 and  
21          1986, I held various technical and supervisory positions in  
22          the Central Testing Lab. In 1986, I became Supervisor-  
23          Budgets for Tampa Electric Company and in 1990 assumed the  
24          position of Manager-Central Testing Lab. In 1994 I joined  
25          the Fuels Department as Manager-Transportation and Planning

1 and was named to my current position as Manager, Fuels in  
2 1995.

3

4 Q. Will you describe some of the responsibilities of your  
5 present position?

6

7 A. As Manager, Fuels, I am responsible for the planning,  
8 procurement, delivery, inventory control, and price  
9 forecasting of the company's fuel requirements.

10

11

12 Q. Please state the purpose of your testimony.

13

14 A. The purpose of my testimony is to report to the Commission  
15 the actual 1997 costs of Tampa Electric's affiliated coal  
16 and coal transportation transactions compared to the  
17 benchmark prices calculated in accordance with Order No.  
18 20298 (coal transportation) and Order No. PSC-93-0443-FOF-  
19 EI ("Order No. 93-0443") (coal). I conclude that the 1997  
20 prices paid by Tampa Electric to its affiliates TECO  
21 Transport and Trade and Gatliff Coal are reasonable and  
22 prudent.

23

24 Q. Have you prepared an exhibit which you sponsor in this  
25 proceeding?

1 A. Yes. Exhibit No. (RB-1) titled "Exhibit of Rod Burkhardt",  
2 consisting of 2 documents, was prepared under my direction  
3 and supervision.

4

5 AFFILIATED COAL AND COAL TRANSPORTATION PRICES

6

7 Q. Were Tampa Electric's actual affiliated coal transportation  
8 prices for 1997 at or below the transportation benchmark?

9

10 A. Yes, they were. This is reflected in Document No. 1 of my  
11 exhibit.

12

13 Q. Were Tampa Electric's actual 1997 affiliated coal prices at  
14 or below the benchmark as established in Order No. 93-0443?

15

16 A. Yes, they were. This is reflected in Document No. 2 of my  
17 exhibit.

18

19 Q. Please summarize your testimony.

20

21 A. My testimony justifies the prices paid for coal and coal  
22 transportation by Tampa Electric Company in 1997 to its  
23 affiliated suppliers, Gatliff Coal and TECO Transport. I  
24 demonstrate that the average prices for the year 1997 for  
25 all coal and coal waterborne transportation services were

1 at or below the appropriate benchmark calculations as  
2 directed by Order No. 20298 and Order No. 93-0443 of this  
3 Commission. Therefore, Tampa Electric should recover its  
4 payments for coal and coal transportation made during 1997.  
5

6 **Q.** Does this conclude your testimony?  
7

8 **A.** Yes, it does.
