WESTERN TELECOMMUNICATIONS, INC.
FPC Docket No. 980800-TP
Milner Deposition Late Filed
Exhibit WKM-1

October 16, 1998

To produce a Space Plan as part of the Office Profile the Common Systems Capacity Manager (CSCM) gathers projected frame/cabinet/module/bay information from the following resources.

Switch Capacity Manager (SCM)

Local Switching Demand & Facility (LSD&F) System aids the SCM in projecting Switch equipment growth needs based upon forecasted line and trunks.

The SCM also considers switch processor changes or upgrades, changes to AMA message recording, announcement needs, switch generic upgrades, current customer feature offerings, Internet Service Provider (ISP) growth and LM to LCM conversions to support some new services.

SCM plans Frame Relay and Asynchronous Transfer Mode (ATM) installations and additions.

The SCM considers all of the above and, when requested, provides the CSCM with an estimated frame/cabinet/module/bay projection for future years.

Circuit Capacity Manager (CCM)

CCM projects twelve (12) months future needs for test access, metallic repeater equipment, SONET and Digital Cross connect Systems (DCS) growth and associated DSX 1&3.

CCM considers local and toll message trunk growth, ISP trunk growth, Inter-exchange carrier/CLC trunk requirements.

CCM also has to consider the expected growth for customer driven SONET based SmartRings and interoffice SONET rings.

The CCM uses specialized computer based tools/databases such as TIRKS and FEPS/PWS to aid in projection and inventory/capacity of circuit equipment.

CCM is also an interface to the Outside Plant (OSP) Loop Capacity Manager(LCM) who is placing Next Generation Digital Loop Carrier(NGDLC), loop multiplexers and Fiber Distribution frames in the CO.

The CCM considers all of the above and, when requested, provides the CSCM with an estimated overall frame/bay projection for future years.

Power Capacity Manager (PCM)

PCM through the Lucent Power Planner (we outsourced the planning for DC power) provides future power room rectifier and battery requirements and layout. The PCM plans replacement and size upgrades for Optional Standby engines in the COs.

This information is given to the CSCM for the Space Plan.

Infrastructure Planner (IP)

IP plans new, large DCS systems (example, Titan DCS), new SONET SmartRings, new interoffice rings and future new services and is often a source for CO space requirements.

Regional Planning & Engineering Center (RPEC)

RPEC provides requirements, when requested, for STP/SCP and Voice Mail installations expressed in frames.

Other specialized requirements from a BellSouth group are for Broadband frames for future years.

In summary, the CSCM ensures that all installed equipment is properly shown on the office floorplan, that all outstanding TFOs currently ordering or removing equipment are reflected and that equipment frame/cabinet/module/bay projections from all resources are shown accurately.

Regional Planning :

Engineering

July 24, 1998

TO: John Macdonald
FROM: Ron Peet
SUBJECT: CCSN Plans for West Palm Beach Gardens and Miami Golden Glades

1-2-2-1
[Redacted]

3 An order has been issued to remove the [Redacted] from the Miami Golden Glades Central Office. Tom Aiello of the Cost Investment Recovery Group is handling the removal. The expected removal completion date is 08/31/98. I left Tom a message asking him to confirm that the date can be met. Tom can be reached at 770-389-2696.

10-11
[Redacted]

13 An additional SCP is being added in the West Palm Beach Gardens Central Office this year. The project, PEB3892, is expected to start in late September. The SCP will consist of [Redacted]
14 [Redacted]

15
17 [Redacted]

Please call me at 770-391-2106, should you need additional information.

Thanks,
Ron Peet
