Re: Docket #980731-WS
Hunter Creek, LLC

As you requested, I have addressed your deficiencies noted in your letter dated December 11, 1998.

1. System Design Modification

We have reduced the flow from the north well, since the contaminants were much higher in that well and we are in the process of retesting the water supply. We should have the results by January 21, 1999.

It has come to my attention that you have been releasing my corporate financial information, mainly Rivers Edge, Inc., which has absolutely nothing to do with running the utility. It is private for your eyes only because you required it for your research and we trusted your confidentiality. I would like a copy of whatever I signed giving you authorization to release my confidential corporate information. I feel you are in violation of my privacy and I strongly protest your actions.

You released my personal information to Ross Raley, our nemesis and a resident of Rivers Edge. In my opinion, he has some mental problems. No one else in the community speaks to him.

You've received all of the information that you are going to receive from me. I do not intend to pay any fines. If I am not competent to run a public utility, feel free to have the county take over the utility and continue to supply the water demands of my developing community at a reasonable rate and God bless.

Sincerely,

John Leonette, President
