Re: Time Warner AxS of Florida, L.P.'s IntraLATA Toll Dialing Parity Plan
Docket No. 990546-TP

Dear Ms. Bayo:

Enclosed for filing please find an original and fifteen copies of Time Warner AxS of Florida, L.P.'s revised intraLATA toll parity plan for the above-referenced docket. You will also find a copy of this letter enclosed. Please date-stamp the copy of this letter to indicate that the original was filed and return to me.

If you have any questions regarding this matter, please feel free to contact me. Thank you for your assistance in processing this filing.

Respectfully,

PENNINGTON, MOORE, WILKINSON,
BELL & DUNBAR, P.A.

Time Warner AxS of Florida, L.P.
IntraLATA Toll Dialing Parity Plan

June 9, 1999

I. Purpose

The intent of this plan is to provide information regarding Time Warner AxS of Florida, L.P.'s, d/b/a Time Warner Telecom (TWTC), implementation of IntraLata Toll Dialing Parity in the TWTC exchanges located in the state of Florida in accordance with the FCC's requirements.

II. Implementation

It is TWTC's policy to provide implementation of IntraLata Toll Dialing Parity in all TWTC's switches concurrent with switch implementation. IntraLata Toll Dialing Parity was implemented in the Orlando and Tampa switch when the switches were launched.

III. Carrier Selection Procedures

TWTC has implemented full 2-PIC (Primary Interexchange Carrier) carrier selection methodology. TWTC customers are able to presubscribe to one telecommunications carrier for interLATA toll calls and are able to presubscribe to the same or a different telecommunication carrier for their intraLATA toll use.

TWTC Customer Care employees are trained to explain the process to customers in order to facilitate PIC selections on both new orders for service as well as making changes to existing PIC selections for both interLATA as well as intraLATA toll calls.

Processes are in place to provide all customers with an opportunity to choose their intraLATA toll carrier from a list of available carriers for both interLATA as well as intraLATA toll calls in a competitively neutral manner. Currently this is a manual process but system enhancements will make presentation of this competitively neutral list mechanized in 1st Quarter, 2000. Customers who do not make a positive choice for an intraLATA toll carrier will have to dial around to reach an intraLATA toll carrier. At a customer's request TWTC will also assign a "no-PIC" to the customer's intraLATA toll calling. Customers assigned a "no-PIC" will be required to dial 10XXX to place intraLATA toll calls until such time as they make an affirmative choice for a intraLATA toll carrier.

Customers currently are not assessed a PIC change charge to change either their interLATA PIC or their intraLata PIC carrier. Carriers are currently assessed a \$5.00 PIC change charge on inter and intraLATA carrier change requests when such changes are requested by the Carrier.

FPSC-RECORDS/REPORTING

IV. Customer Education/Notification

Customers are educated at the time of placing an order with TWTC for new service or for service changes dealing with intraLATA toll carrier, regarding their intraLATA PIC choices.

As noted previously, all TWTC switches are implemented with intraLATA Toll Dialing Parity. Therefore no customer notification outside of customer education at the point of order is provided.

V. Carrier Notification

Current interexchange carriers are notified of TWTC switch implementations prior to switch turn up. Carriers are requested to notify TWTC and send an ASR in order to be included on TWTC's list of currently available carriers. Certified carriers who enter the market after implementation of a TWTC switch will be added to the list of participating carriers within 30 days of sending notification and receipt of an ASR by TWTC.

When a TWTC customer selects an intraLATA toll carrier as their PIC, TWTC sends a CARE record to the carrier notifying them that the customer has chosen to subscribe to that particular carrier's service.
