Re: Docket No. 981444-TP

Dear Ms. Bayo:

Enclosed herewith for filing in the above-referenced docket on behalf of Omnipoint Communications MB Operations, LLC d/b/a Omnipoint Communications ("Omnipoint") are the original and fifteen copies of Omnipoint's Second Request for Confidential Classification.

Please acknowledge receipt of these documents by stamping the extra copy of this letter "filed" and returning the same to me.

Thank you for your assistance with this filing.

Sincerely,

  
Kenneth A. Hoffman

Docket No. 981444-TP

Filed: November 3, 1999

**OMNIPOINT COMMUNICATIONS MB OPERATIONS, LLC  
d/b/a OMNIPOINT COMMUNICATIONS' SECOND  
REQUEST FOR CONFIDENTIAL CLASSIFICATION**

Omnipoint Communications MB Operations, LLC d/b/a Omnipoint Communications ("Omnipoint"), by and through its undersigned counsel, and pursuant to Rule 25-22.006, Florida Administrative Code, files this Request for Confidential Classification within twenty-one days of filing its Notice of Intent to Request Confidential Classification, and states:

1. Omnipoint requests that the document attached hereto as Attachment "A" be classified as "proprietary confidential business information" within the meaning of Section 364.183, Florida Statutes (1997). Attachment "A" is an edited version of the document on which the information asserted to be confidential has been blocked out by the use of an opaque marker. An unedited version of the information contained in Attachment "A" was submitted to the Division of Records and Reporting on October 15, 1999, together with Omnipoint's Notice of Intent to Request Confidential Classification for this document and is provided herewith under a separate cover marked "confidential" with the information asserted to be confidential highlighted in yellow.

2. The attached document contains existing and projected NXX Code utilization information for Omnipoint's operations in Florida, including, for each NXX code, data reflecting the: (a) the number of available 1,000 blocks with less than 10% contamination; (b) number of aging numbers; (c) number of telephone numbers available for reassignment; (d) number of reserved

telephone numbers; and (e) number of assigned and active telephone numbers for each 1,000 block. Omnipoint's current and projected utilization of NXX codes and the related NXX code utilization data described above is "proprietary confidential business information" as contemplated by Section 364.183(3), Florida Statutes (1997), because such information is intended to be and is treated by Omnipoint as highly sensitive, private and confidential information and the public disclosure of such information would cause harm to Omnipoint's competitive interests and business operations by enabling Omnipoint's competitors to analyze such information and gain knowledge concerning Omnipoint's market share and marketing strategies.

WHEREFORE, Omnipoint respectfully requests that the Commission issue an order declaring that the information reflected in the document attached hereto as Attachment "A" is proprietary confidential business information and exempt from disclosure under the public records laws of the State of Florida.

Respectfully submitted,

Kenneth A. Hoffman, Esq.  
Rutledge, Eckenrode, Purnell & Hoffman, P.A.

2540 Shumard Oak Boulevard  
Room 270G  
Tallahassee, FL 32399-0850

By:   
KENNETH A. HOFFMAN, ESQ.

CONFIDENTIAL

<b>For the purposes of data collection, the definitions used in the spreadsheet are:</b>	
<b>NPA</b>	Number Plan Area (i.e., area code)
<b>NXX</b>	Prefix (i.e., the first three digits of a telephone number)
<b>Contamination</b>	Any block in which end user customers have been assigned telephone numbers
<b>Number of Blocks With Less Than 10% Contamination</b>	<p>Example: In an NXX, there are 10,000 telephone numbers. If your company has assigned 1500 telephone numbers, then the ratio of 1500 to 10000 (=0.15) is the contamination rate. Multiplying this number by 100 yields the percent contamination, which in this case is 15%. This calculation would be repeated for every NXX within the same NPA.</p> <p>Similarly, in a 1,000-block, with 50 customers, the contamination is 50/1000 = 0.05, or 5%. Count the numbers of blocks where the contamination is less than 10%.</p>
<b>Disconnected Numbers</b>	Telephone numbers which are available for reassignment
<b>Reserved Numbers</b>	Any telephone number reserved for special purposes (vanity numbers, test numbers, service numbers)
<b>Reserved Blocks</b>	Any 1,000-block that has been set aside by the Pooling Administrator for some specific future use or purpose
<b>Average Growth</b>	Average number of new NXXs or 1,000 blocks assigned per month
