Re: Docket No. 991704-TI: Application of CTSI, Inc. for Authority to Provide Interexchange Telecommunications Service Between Points Within the State of Florida

Dear Ms. Bayo:

Pursuant to the request of Commission Staff Member Tom Williams, CTSI, Inc. ("CTSI") is filing an original and two (2) copies of its Florida Interexchange Telecommunications Services Tariff. Please date-stamp the enclosed extra copy of this filing and return in the self-addressed, stamped envelope provided. Should you have any questions concerning this filing, please do not hesitate to contact Ron Del Sesto at (202) 945-6923. Thank you for your assistance in this matter.

Respectfully,

Kathleen L. Greenan  
Ronald W. Del Sesto, Jr.

MESSAGE TOLL SERVICES TARIFF

CTSI, Inc.

Section 1  
Original Page 1

APPLICATION OF TARIFF

A. GENERAL

This tariff applies to message toll telecommunications services, furnished or made available by CTSI, Inc., over facilities wholly within or partly within the State of Florida where the respective rate centers of such points are also located in the State of Florida. The regulations and rates contained herein are in addition to the applicable regulations and rates specified in other tariffs of the Telephone Company.

B. REGULATIONS

1. Explanation of Terms

Additional Period

The Additional period is the unit of time used for measuring and charging for time in excess of the initial period. All additional period rates specified in this tariff are for each additional minute or any fraction thereof that the connection continues beyond the initial period.

Bill to Third Party

Bill to third party denotes a billing arrangement by which a call may be charged to an authorized line as determined by the Company other than the line originating the call or the line where the call is completed.

Calling Card

Calling card denotes a billing arrangement by which a call may be charged to an authorized CTSI calling card number.

Collect Call

Collect call denotes a billing arrangement by which the charge for a call may be reversed provided the charge is accepted at the called line. A collect call may be billed to a calling card or third party number, and will be billed at the originating Long Distance Carrier's rates and charges.

Initial Period

The initial period is the interval of time allowed at the rate quoted for a long distance connection between given points. All initial period rates specified in this tariff are for connections of the time periods or any fractions thereof specified in Sections 2 and 3 of this tariff.

Issued:

Effective:

Issued by: Ronald L. Reeder, Senior Manager-Regulatory and Public Affairs  
3950 Chambers Hill Road  
Harrisburg, PA 17111

MESSAGE TOLL SERVICES TARIFF

CTSI, Inc.

Section 1  
Original Page 2

APPLICATION OF TARIFF

B. REGULATIONS (cont'd)

1. (cont'd)

Message Toll Telecommunications Service

Message Toll Telecommunications Service is that of furnishing facilities for telecommunications between dial tone lines in different local service areas in accordance with the regulations and schedule of rates specified in this tariff.

Person-to-Person

Person-to-person is that service where the person originating the call specifies to the Company operator a particular person to be reached, or a particular station line, department or office to be reached through a private branch exchange (PBX) attendant.

When, after the line or PBX system called has been reached and while the connection remains established, the person originating the call requests or agrees to talk to any person other than the person specified, or to any other person, or to any other station line, department or office to be reached through a PBX attendant, the classification of the call remains Person-to-Person.

Station-to-Station

Station-to-Station is that service where the person originating the call dials the telephone number desired, or gives to the Company operator the telephone number of the desired station line or PBX which is reached directly rather than through a PBX attendant, or it gives only the name and address under which the number of the desired line or PBX is listed, and does not specify a particular person to be reached, nor a particular line, department or office to be reached through a PBX.

2. Chargeable Time

Chargeable time for all message toll connections does not include time lost because of faults or defects in the service.

Issued:

Effective:

Issued by: Ronald L. Reeder, Senior Manager-Regulatory and Public Affairs

MESSAGE TOLL SERVICES TARIFF

CTSI, Inc.

Section 1  
Original Page 3

APPLICATION OF TARIFF

B. REGULATIONS (cont'd)

3. Use of Service

a. Resale of Service

A customer of the services, facilities and/or equipment in this tariff may offer such services, facilities and/or equipment to others authorized by the Commission for profit.

b. Sharing of Service

A customer of services, facilities and/or equipment in this tariff may share such services, facilities and/or equipment in long term agreement with others (users). The customer may, but not have to, use the service which is to be shared.

Sharing arrangements must be nonprofit. The total charges to all participants in a sharing arrangement may not exceed the sum of the Company's charges for the service shared, plus the charges for any ancillary equipment that may be connected to such shared service. The allocation of charges to each participant shall be on a nonprofit pro rata basis.

Where the customer for a sharing arrangement is organized as a nonprofit entity, a not-for-profit fee, charged solely for the management of the sharing arrangement, may be allocated by the customer among the participants.

4. Message Toll Directory Assistance Service

Regulations and rates are as specified for Directory Assistance Service in this Company's Local Exchange Services Tariff.

APPLICATION OF TARIFF

B. REGULATIONS (cont'd)

5. Classes of Service

a. Station-to-Station

(1) Customer-Dialed

The Customer-Dialed schedule contemplates Station-to-Station calls dialed and completed by the customer from other than a pay telephone without the assistance of a Company operator. The Services of a Company operator are not to be used in connection with completing such calls, or in furnishing any information or assistance relating to billing or charges for such calls, except in the following cases:

- (a) to reestablish a call which has been interrupted after the called telephone number has been reached.
- (b) to reach the called telephone number where *Direct Distance Dialing* facilities are not available.
- (c) to record the originating telephone number where no automatic recording equipment is available.
- (d) to place a call for a calling party who identifies himself as being handicapped and unable to dial the call because of this handicap.

(2) Customer-Dialed Calling Card

The Customer-Dialed Calling Card schedule contemplates that the person originating the call:

- (a) dials the CTSI Calling Card access number, plus a calling card number, plus the telephone number, (where equipment is available) to complete the call without operator assistance; or

APPLICATION OF TARIFF

B. REGULATIONS (cont'd)

5. (cont'd)

a. (cont'd)

(3) Operator-Assisted

The operator assisted schedule contemplates the required services of a Telephone Company operator in the completion of Station-to-Station calls or request for any information or assistance relating to billing or charges for such calls, except as specified for Customer-Dialed and Customer-Dialed Calling Card calls.

b. Person-to-Person

The Person-to-Person schedule contemplates that all Person-to-Person calls be necessarily handled by a Company operator.

APPLICATION OF TARIFF

B. REGULATIONS (cont'd)

6. Time Schedule

- a. Chargeable time for all Station-to-Station calls begin when connection is established between the calling station and the called station, miscellaneous Common Carrier mobile radio system or PBX and ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company operator.
- b. Chargeable time for Person-to-Person calls begins when connection is established between the calling person and particular person or station specified or an agreed alternate and ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either pay automatic timing equipment in the Telephone Company network or by the Company operator.

RESIDENCE SERVICE

C. RATES

1. Application of Rates

All Residence Message Toll Services are billed in full minute increments. Rates for service between points are based on the airline mileage between rate centers. Airline mileage between rate centers are determined as specified in Section 5 of this tariff. Rates applicable for the mileages obtained are as specified in Section C.2. following, except as follows:

Residence customers who have been certified to the Company as having a hearing and/or speech impairment which requires them to communicate over telephone facilities by means other than voice and who use Data Transmitting and Receiving Terminals of speeds of 100 bauds or less, provided either by the Company or the customer will be charged as follows for Customer Dialed Direct Station-to-Station calls:

Day connections will be charged for at Evening rates.

Evening connections will be charged for at Night and Weekend rates.

Night and Weekend connections will be charged for at Night and Weekend rates.

BUSINESS SERVICE

C. RATES

3. Business Term Plan Volume Discounts

Business Term Plan customers who subscribe to a one year, three year, or five year term commitment receive the discounts set forth in the schedule below based on a Customer's Qualifying Monthly Usage.

<u>Qualifying Monthly Usage</u>	<u>Applicable Discount</u>
\$0 - \$249.99	0%
\$250 - \$999.99	10%
\$1,000 +	15%

Qualifying Monthly Usage means the Customer's total monthly intraLATA toll charges excluding all charges for installation, reconnection, monthly recurring service fees, and all applicable taxes. The discounts apply to charges for intraLATA toll calls only for which the Customer has met the Qualifying Monthly Usage threshold during that month. The discounts do not apply to charges for installation, reconnection, monthly recurring service fees and any applicable taxes.

RATE GUIDE

A. GENERAL

This section contains a list of rate centers within the State of Florida with V-H, vertical and horizontal coordinates and instructions for determining airline mileages for message toll telecommunications service and interexchange channels.

B. REGULATIONS

1. In general, each exchange in the State of Florida has a designated rate center from which distances are measured in airline miles to another Florida rate center for the purpose of intrastate message toll and interexchange channel billing.
2. For purposes of determining airline mileages vertical and horizontal grid lines have been established across the State of Florida. The spacing between adjacent vertical grid lines and horizontal grid lines represents a distance of one coordinate unit. This unit is the square root of 0.1, expressed in statute miles. A vertical (V) and horizontal (H) coordinate is computed for each rate center from its latitude and longitude location by use of appropriate map-projection equations. A pair of V-H coordinates locates a rate center, for determining airline mileages, at a particular intersection of an established vertical grid line with an established horizontal grid line. The distance between any two rate centers is the airline mileage computed as explained in 5. following.
3. For message toll telecommunications service and interexchange channels, the rate center for a point not listed in this section is the rate center for the central office to which the point is assigned for message toll telecommunications service rate purposes.
4. The mileage for multipoint interexchange channel services is that combination of airline distances between rate centers which will produce the lowest total interexchange mileage charge.
5. Determination of Airline Mileages
  - a. Message Toll Telecommunications Service
    - (1) To determine the rate distance between any two rate centers proceed as follows:
      - (a) Obtain the "V" and "H" coordinates for each rate center.

Issued:

Effective:

Issued by: Ronald L. Reeder, Senior Manager-Regulatory and Public Affairs

RATE GUIDE

B. REGULATIONS (cont'd)

5. (cont'd)

a. (cont'd)

(1) (cont'd)

(b) Obtain the difference between the "V" coordinates of the two rate centers. Obtain the difference between the "H" coordinates.

Note: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.

(c) Divide each of the differences obtained in (b) by three, rounding each quotient to the nearer integer.

(d) Square these two integers and add the two squares.

If the sum of the squares is greater than 1777, divide the integers obtained in (c) by three and repeat step (d). Repeat this process until the sum of the squares obtained in (d) is less than 1778.

(e) The number of successive divisions by three in steps (c) and (d) determines the value of "N". Multiply the final sum of the two squares obtained in step (d) by the multiplier specified in the following table for this value of "N" preceding.

<u>N</u>	<u>Multiplier Minimum Rate Mileages</u>	
1	0.9	
2	8.1	41
3	72.9	121
4	656.1	361

(f) Obtain square root of product in (e) and, with any resulting fraction, round up to the next higher integer. This is the message rate mileage except that when the mileage so obtained is less than the minimum rate shown in (e) preceding, the minimum rate mileage corresponding to the "N" value is applicable.

Issued:

Effective:

Issued by: Ronald L. Reeder, Senior Manager-Regulatory and Public Affairs  
3950 Chambers Hill Road  
Harrisburg, PA 17111

Section 5  
Original Page 3

RATE GUIDE

B. REGULATIONS (cont'd)

5. (cont'd)

a. (cont'd)

(2) Example

(a) The message rate distance is required between Roanoke and Norfolk.

	<u>V</u>	<u>H</u>
Roanoke	6196	1801
Norfolk	<u>5918</u>	<u>1223</u>

(b) difference 278 578

(c) dividing each difference by three and rounding to the nearer integer = 93 and 193.

(d) squaring integers and adding;  $93 \times 93 = 8,649$   
 $193 \times 193 = \underline{37,249}$   
sum of squared integers 45,898

sum of squared integers is greater than 1777, so divide integers in (c) by three and repeat (d).

(e) dividing integers in (c) by three and rounding = 31 and 64

(f) squaring integers and adding,  $31 \times 31 = 961$   
 $64 \times 64 = \underline{4,096}$   
sum of squared integers 5,057

sum of squared integers is greater than 1777, so divide integers in (e) by three and repeat (f).

(g) dividing integers in (e) by three and rounding = 10 and 21

(h) squaring integers and adding,  $10 \times 10 = 100$   
 $21 \times 21 = \underline{441}$   
sum of squared integers 541

This sum of squared integers is less than 1778 and was obtained after three successive divisions by three, therefore, "N" = 3.

Issued:

Effective:

Issued by: Ronald L. Reeder, Senior Manager-Regulatory and Public Affairs  
3950 Chambers Hill Road  
Harrisburg, PA 17111

Section 5  
Original Page 4

RATE GUIDE

B. REGULATIONS (cont'd)

5. (cont'd)

a. (cont'd)

(2) (cont'd)

- (I) Multiply final sum of squared integers by factor 72.9 (corresponding to "N" = 3)
- |               |
|---------------|
| 541           |
| <u>x 72.9</u> |
| 39,438.9      |
- (j) Square root of 39,438.9 = 198 and a fraction, which is rounded up to 199 miles with fractional miles being considered full miles. The 199 miles is larger than the minimum of 121 rate miles applicable when "N" = 3, so the message rate mileage is 199 miles.

b. Interexchange Channels

- (1) To determine the rate distance between any two rate centers proceed as follows.
- (a) Obtain the "V" and "H" coordinates for each rate center.
- (b) Obtain the difference between the "V" coordinates of the two rate centers.  
Obtain the difference between the "H" coordinates of the two rate centers.
- Note: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.
- (c) Square each difference obtained in (b) preceding.
- (d) Add the squares of the "V" difference and "H" difference obtained in (c) preceding.
- (e) Divide the sum of the squares obtained in (d) preceding by ten. Round to the next higher integer if any fraction is obtained.
- (f) Obtain the square root of the result obtained in (e) preceding. This is the rate distance in miles with fractional miles being considered full miles.
