ORIGINAL

The memo requesting that a recommendation be filed late for the April 18 agenda with Dr. Bane's and the Chairman's office approval has been placed in CMS and the docket file. CMS also indicates the formal request by Panda to defer (document number 04489). Will staff formally respond to the deferral request of this item or should we place a copy of this E-mail in the docket?

Subject:

At the Chairman's direction. Staff's request to late file a recommendation in Docket No.'s 000288-EU & 000289-EU, has been rendered moot, since the Petitioner's request for deferral would have been granted. Therefore, the request to late file the recommendation is no longer approved. Accordingly, there is no need to file a recommendation for Tuesday's agenda.
