Re: Docket No. 991534-TP

Dear Ms. Bayó:

Pursuant to the order of Commissioner Deason as presiding officer at the hearing in Docket No. 991534-TP on June 13, 2000, Intermedia Communications Inc.

("Intermedia") herewith files Exhibit 20, an exhibit authorized to be filed post-hearing. Intermedia files said Exhibit 20 with a claim of confidentiality, pursuant to Rule 25-22.006(5), Florida Administrative Code.

A copy of this letter, which we ask you to file in the docket, is enclosed. Please mark it to indicate that such claim has been made and the original letter was filed as requested.

Sincerely,

Charles J. Pellegrini
Charles J. Pellegrini

FPSC-RECORDS/REPORTING

Foreword

At hearing on June 13, 2000, during the cross-examination of Intermedia witness Thomas, BellSouth introduced Exhibit 9, identified as information derived from BellSouth's "Data Warehouse." The exhibit purports to list the BellSouth tandem offices in Georgia to which Intermedia has deployed dedicated trunks for the transport of its traffic.

During the cross-examination, Mr. Thomas noted that the BellSouth data were incomplete, and did not fully show Intermedia's interconnection arrangements with BellSouth – in particular, the trunking arrangements to a tandem office in Columbus, Georgia. Accordingly, Commissioner Deason authorized Intermedia to submit a post-hearing exhibit as evidence to clarify Intermedia's trunking arrangements. In the attached pages, Intermedia submits this post-hearing exhibit, which identifies all of the BellSouth tandem offices to which Intermedia has direct trunking arrangements, for the states of Florida and Georgia – the two states that were discussed extensively during hearing.

The attached pages provide a spreadsheets listing each tandem office to which Intermedia is trunked. The tandems are identified by the tandem's Common Language Location Identifier ("CLLI") code,¹ as well as city and state. In addition, the spreadsheet lists the date on which trunks to the various tandems were placed in service. Intermedia also provides a graphic representation of its tandem trunking arrangements, identifying the tandems by name and CLLI code, and illustrating one-way inbound and outbound trunks, two-way transit trunks, and two-way Feature Group D ("FGD") trunks. Finally, for the trunking arrangements in the Atlanta LATA – which were the subject of extensive discussion at hearing, Intermedia illustrates the trunking arrangements that existed one month prior to the execution of the Multi-Tandem Access Amendment, and the trunking arrangements that are in place today.²

As the attached materials make clear, Intermedia is direct-trunked to every access tandem in every LATA in Florida and Georgia in which Intermedia provides service. Moreover, consistent with the testimony of Intermedia's witnesses, Intermedia was direct-trunked to every access tandem in the Atlanta LATA at the time the MTA Amendment was executed.

Intermedia is, frankly, at a loss to explain why the materials submitted by BellSouth failed to show existing trunking arrangements. Of course, because each of these arrangements is cooperatively ordered, deployed and tested by Intermedia and BellSouth, BellSouth certainly had access to the correct information at all relevant times. One possible answer may be that BellSouth failed to query its database with the full set of information that would identify

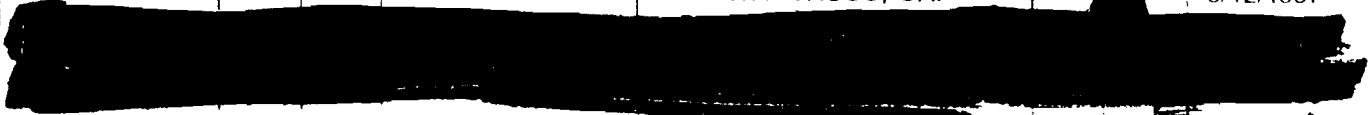

1 Note, Intermedia adds its own designation to the standard CLLI codes that BellSouth employs. Specifically, Intermedia appends the designation "2W" to the end of the CLLI code to indicate that the trunk in place is a "two way" trunk. As a result, a tandem office listed by BellSouth as "CLMBGAMT01T" is shown on Intermedia's spreadsheet as "CLMBGAMT01T2W."

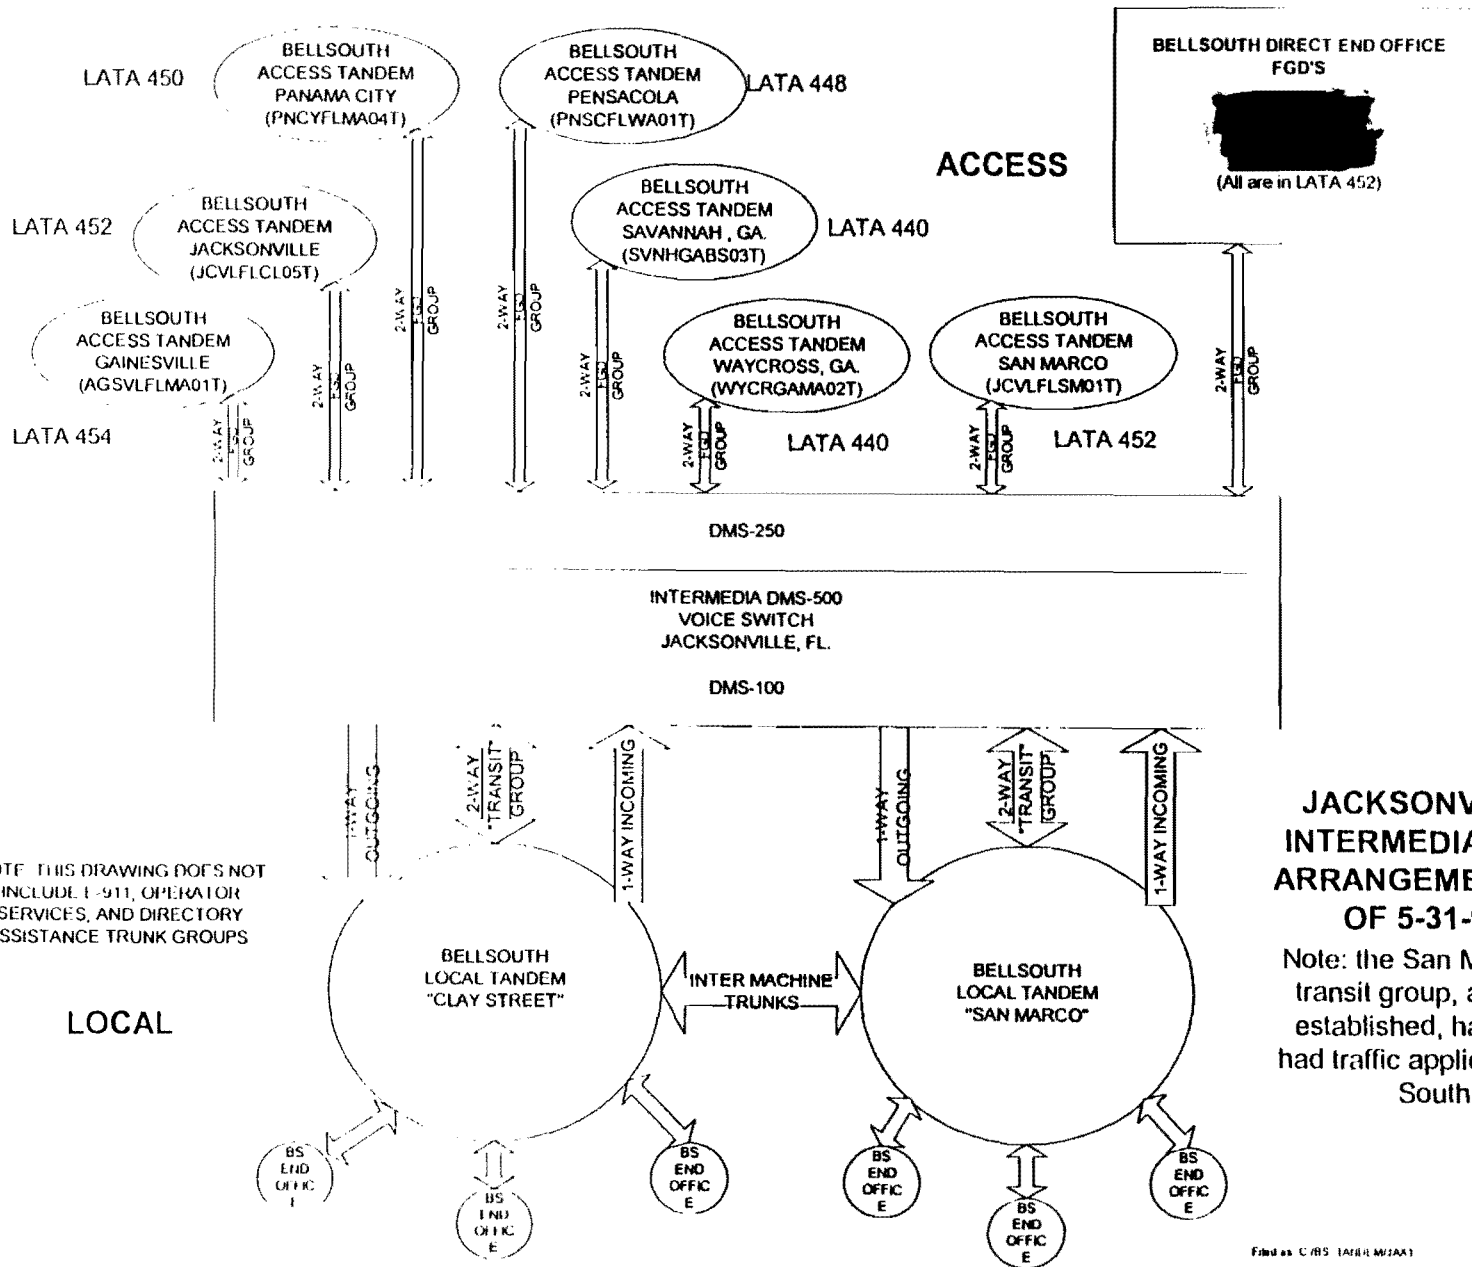

2 Intermedia also illustrates the trunking arrangements in place in Florida at the same time, one month before the Multi-Tandem Access Amendment.

Intermedia's trunks. Intermedia understands that the BellSouth Data Warehouse lists trunks according to Access Customer Name Abbreviation ("ACNA") codes that identify the carrier. The materials provided by BellSouth list "ICF" which is indeed an ACNA designating Intermedia. However, none of the BellSouth materials list the ACNA "ESF," which also designates Intermedia. If, as it appears, BellSouth failed to run its query using both the ICF and ESF ACNAs, its query would fail to identify a substantial number of trunks that Intermedia has in service.

Whatever the reason, BellSouth's listing of Intermedia's trunking arrangements is incomplete and misleading. We are pleased to have the opportunity to supplement the record in this proceeding to provide correct and thorough information.
