

001234-WS Sept 8, 2000

Dear Sirs;

I am writing to object to, United Water Florida, Inc. extending their service area located in Nassau County, Florida - (legal notice on page 6C of Fernandina Beach News Leader - 8-30-2000)

We live 16 miles out in the country from Fernandina Beach. We do not want or need this service. Our septic tanks + wells work just fine + cost enough already.

One developer is causing all this and is getting greedy already. What he does on his property is one thing but he can stay out of our business. The figures being thrown out to hook up to this water + sewage is out of this world. Eight to fifteen thousand per household plus money for linear foot + a monthly fee. We are a retired couple on a fixed income. Everybody here in Nassau County is not rich or on holiday. Fernandina is becoming a resort town + now they are trying to draw us into their big + fancy plans. Our taxes are going up again this year.

We are not getting information like we should + they are rezoning out here already.

The county coordinator, engineer, commissioners + especially - United Water Fla. have all gone

suddenly mute. They don't know anything
yet things are moving forward. I sense, our
letter to you We do not want this in our
area. Our "leaders" need to know this.

We are neither rich or poor. We fall in
the middle having worked very hard all our lives
and should be able to enjoy our retirement not
have this development all around us + new
higher taxes put us in the poor house! We
are very upset + someone needs to stop some
of this now before its to late!

Sincerely,
Wanda Skipper
