Dear Sirs,

I have been reading in the Fernandina Beach News Leader that United Water Company will be running water/sewer lines on Chester Road in Yulee, FL. I live on Chester Road and have a few concerns about their venture. I have a well and septic tank and I am under the impression that I will be forced to tie into United Water's water/sewer lines at my cost. The newspaper estimated \$8,000 - \$15,000 per residence plus a monthly fee. Since I have a perfectly working well and septic tank, I see no reason to be forced into tying into the United Water's water/sewer system. Also I cannot afford the cost of connection. I object to being forced into something that is not necessary and something that is so costly. I do not object if this venture is for new houses that are to be built in the area. Thank you for listing to my concerns.

Walter R. Ludman
