Dear Sir/Madam:

We read in our local paper that a company called United Water Florida has asked your permission to extend water and sewer service into the Chester/Blackrock area of Nassau County. I am very upset about this. As a life-long citizen of the area for over seventy years, I think it is unjust and unfair for some company to decide that people have to give up their wells and septic tanks so that they can make money. Also, many long-time residents, like myself, are senior citizens on fixed incomes. We could not afford to pay such ridiculously high charges for something we don't want anyway. Whatever happened to this being a free country?

Please do not allow this company to infringe upon my right to live my life as I please on property that has been in my family for many years. I will also mail a copy of this letter to the water company.

Thank you.

Romayne H. Lovell
