RECEIVED-FPSC

As residents of Pirates Wood, Yulee, FL; a private neighborhood, we are appalled at the audacity of United Water Florida, Inc. Why on earth would we even consider having a county sewage system installed, when we have spent approximately \$5000.00 (five thousand dollars) to have our septic system installed in our new home?

It is not our responsibility to carry the financial burden of a sewage system just because some individuals choose to destroy a beautiful island to acquire the status as "One of the Elite." Let them pay for their sewage system as we've paid, and are very satisfied with, our own.

Thank-you for the time you spent and the consideration you gave in order to read our opinions.
