 RE: Revision of the Staff Analysis for Docket No. 000808-EI *JOS*

This is to ask for a simple revision of the staff analysis for Docket No. 000808-EI, Item No. 46 (Issue 2), scheduled for the September 26, 2000 Agenda. On page 7 of the staff analysis, the first two sentences should be revised as follows:

Of the various cost recovery clauses associated with the electric industry, only the ECRC and conservation is embodied in statute. The other similar clauses - ~~fuel, conservation~~ and capacity - were created by Commission Order. (The underlined words are proposed additions and the ~~strikeout~~ are proposed deletions.)

The revision is necessary because the conservation clause was created by statute and not by Commission Order as stated in our analysis. After discussion with Legal Services we believe the revision is unlikely to result in any change to the Commissioners' ultimate vote on the issue. Therefore, the Agenda item is asked to be revised without deferral according to SOP 1607.
