Attention: Director, Division of Records & Reporting

This is in reply to the published notice that United Water Florida, Inc. applied to extend their water & sewer service through my community. I located outside of city limits to minimize services that are out of my control. The septic and well system I installed over 40 years ago still works just fine and is costing me nothing. Being retired and on a fixed income, I don't have the means to spend \$8,000 to \$15,000 to connect to United Water's service or on monthly fees to use them.

I understand if United Water would like to provide service for new subdivisions under development. Tie in cost would be built into the price of the development and fees known up front. I have no intention of furthering United Water's profit margin.

Sincerely,

Curtis Mills
