Dear Sir/Madam:

I am the owner of a new home in Yulee, Florida, and within the last three months have been required to construct a drain field, set a septic tank and drill a well at a cost to me of \$ 8,000.00. Soon after the completion of my home I read in an article in the News Leader (a local newspaper) about the application by United Water Florida, Inc. for water and sewage lines in my area. I am writing this letter to voice my opposition to this application for the following reasons:

- 1) Requiring me to supplement cost of construction for said water and sewage pipe after recent expenditures to my property would be unfair to say the least; and should be exempt from any participation of construction or usage.
- 2) Other homes in the area, some of which have been here for many years would also be penalized if required to participate in this venture. I realize that our area is growing and the need for advancement of a workable sewage system will be necessary, but a large part of the population that is targeted for this expense are elderly people that are living on a fixed income and could not possibly afford this. I feel at the very least the homeowners that are already established residents should be grandfathered in and exempt from these requirements and monetary expenditures.

Thank you for taking into consideration the feelings and concerns of the residents living in the areas adjacent to Blackrock Road, Yulee, Florida..

Sincerely,

Michael Adams,

Homeowner
