**Re: Lake Josephine Water; Docket No. 001585-WU
Our File No. 33087.06**

Dear Ralph:

This letter is in response to the letter from Larry Truckermiller regarding his low water pressure complaint. AquaSource Utility, Inc. is aware and concerned about the problems of the customers regarding low water pressure in the Lake Josephine system. As you know, those problems preexisted the acquisition of that system by AquaSource Utility, Inc. There are presently plans by AquaSource Utility, Inc. to upgrade the water treatment plant and the satellite booster station which the company believes will help to alleviate the low water pressure problems. The company is also considering other options in concert with the Florida Department of Environmental Protection to resolve this problem. At present, there are no plans to increase the size of the water mains in this system.

AquaSource Utility, Inc. is committed to providing excellent water service to its customers and will be working diligently to resolve this low pressure problem.

Very truly yours,

**MARTIN S. FRIEDMAN
