SERVICE AVAILABILITY POLICY

The Village Lakeland Wastewater System serves only one development, a mobile home subdivision called Village Lakeland. To date, approximately a third of the lots have been developed. The remainder of the property within the Service Area is conceptually planned for approximately a total of 927 units within the Service Area.

The 1/3 lots which have been constructed have roads, stormwater management, and water and sewer infrastructure included. The wastewater treatment plan and effluent disposal area are permitted for a total of 70,000 gpd, and are expected to serve the existing units and the unoccupied, constructed lots.

No expansions to the existing system are anticipated until the remainder of the property is developed. At which time the Florida Department of Environmental Protection may require that the wastewater system be constructed as part of the development of the remainder of the subdivision.

Currently, the utility charges a one-time \$430 plant capacity fee per ERD for all customers and a \$450 main extension fee per ERC for all customers when a new unit is constructed and connected into the system. No meters are set, but deposit may be required. No other fees are charged at this time.
