BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

LightSource Telecom I, LLC IntraLATA Toll Dialing Parity Plan

I. INTRODUCTION

Pursuant to regulations promulgated by the Federal Communications Commission (“FCC”),¹ LightSource Telecom I, LLC (“LightSource”) will initiate a process that will give end user customers the opportunity to designate a carrier for their intraLATA toll call traffic in those market areas where LightSource is a facility-based local exchange service provider. Upon designation by a customer, intraLATA toll calls will automatically be directed to the selected carrier without the customer having to dial an access code.

II. GENERAL INFORMATION

LightSource will deploy two-PIC (Primary Interexchange Carrier) technology in its switches. This technology will enable the customer to presubscribe to the same or a different carrier for its intraLATA and interLATA service. All eligible LightSource end user telephone line numbers will be presubscribed and must either have a PIC or “no-PIC” associated with them. LightSource will offer end user customers, whether designated PIC or “no-PIC”, the ability to access all carriers that have established themselves as access customers under the applicable LightSource tariffs by dialing the appropriate access code (1010+CIC). LightSource will revise and file all appropriate tariffs in accordance with this Plan.

III. CARRIER INFORMATION

Carriers will have the option of offering intraLATA service only or intraLATA and interLATA service. LightSource will notify potential carriers at a minimum of thirty days prior to the initial availability of presubscription in specific market areas. Carriers will have the option of participating in all market areas. Carriers wishing to participate will be requested to submit an Access Service Request form to the Access Tandem owner and to LightSource.

LightSource will not participate in billing disputes for intraLATA service between alternative competing carriers and their customers.

¹ 47 C.F.R. § 51.213(a).

IV. NETWORK INFORMATION

All originating intraLATA traffic will initially be routed via the incumbent Local Exchange Carrier (LEC) Access Tandem(s). Subsequently, direct trunks between the LightSource switch and the carrier location(s) may be provisioned where traffic volumes warrant. Carriers must have Feature Group D trunks in place between their point of presence and the incumbent LEC Access Tandem(s).

LightSource will route all originating intraLATA traffic to the designated carrier and will only block traffic at the request of the end user customer and/or in compliance with the appropriate regulations. Requests from carriers to block traffic or to remove customers from their network will not be honored. Calls that cannot be completed to a carrier will be routed to an announcement.

V. CUSTOMER CONTACT INFORMATION

LightSource customer contact representatives will process customer-initiated PIC selections to LightSource or to an alternative intraLATA carrier as designated by the customer. In addition, alternative carriers may submit PIC changes to LightSource via a fax/paper interface; in this event, carriers will be required to submit PIC changes using the Customer Account Record Exchange ("CARE") 960-byte format via paper medium. LightSource will provide carriers with PIC order confirmation and reject information using the CARE format. Specific details regarding CARE will be provided to participating carriers.

LightSource will not automatically assign a PIC selection (for itself or any other carrier) to any Customer without receipt of the Customer's written consent. LightSource will inform its customers of their right to choose an intraLATA toll carrier, and will process customer-initiated PIC selections to LightSource or to an alternative intraLATA toll carrier designated by the Customer. Customers who do not designate a choice for an intraLATA toll carrier will be identified within LightSource's system as "no-PIC" and will not be automatically defaulted to a carrier. Customers identified as "no-PIC" within LightSource's system will be required to dial the access code of a different carrier to place intraLATA toll calls. LightSource will provide all Customers with a confirmation notification of their PIC selection.

Upon Customer request, LightSource representatives will provide alternative carrier names (and, if supplied by the alternative carrier, telephone numbers) to new or existing customers in random, completely neutral order. However, LightSource representatives will not discuss alternative carrier rates or services with customers, nor will they provide Customers with Carrier Identification Codes or access dialing instructions. Also, LightSource will not initiate or accept three-way calls for alternative carriers to discuss presubscription.

VI. COMPLIANCE WITH LAWS / ANTI-SLAMMING PROCEDURES

LightSource will provide nondiscriminatory access to telephone numbers, operator services, directory assistance and directory listings in all areas served. LightSource will comply with all rules promulgated by the FCC and Commission, including the Commission's rules designed to protect consumers against slamming.

VII. PRESUBSCRIPTION INFORMATION

A five-dollar (\$5.00) PIC change charge will be incurred and billed to the customer for each eligible line where a PIC change is made. In an effort to reduce unauthorized PIC changes, LightSource will offer intraLATA PIC Freeze service to all customers at no charge. PIC Freeze can be initiated (or removed) only by the customer requesting it in writing through its LightSource representative.
