Judge John Adams  
Martin S. Friedman, Esquire, Rose, Sundstrom & Bentley, LLP.  
Director, Division of Commission & Administrative Services

Dear Sir,

As a resident of the Kings Point Subdivision we are relieved and extremely thankful that the city of Kissimmee was concerned enough to entirely reconstruct the old water and wastewater plant on Kings Point Blvd and supply us with fresh clean water from the City of Kissimmee Water Supply. The old plant was in disrepair using old rusty bacteria pipes to handle the water and wastewater going into and from the homes. This caused many serious health problems.

The present homeowners in the Kings Point subdivision do not want any individual or association connected to the former Kings Point utility, to be given any certification or authorization to operate a system that supplies water or that removes wastewater from our homes.

Our tax-paying residents should have the right and responsibility to decide who should operate this system and we are very pleased with our present operator The City of Kissimmee.

Respectfully,

*Walter E. Moore*  
Walter E. Moore

*Virginia B. Moore*  
Virginia B. Moore
