Dear Director,

We recently received a letter, "notice for application for an initial certificate of authorization for water and wastewater certificates." We are writing to make it known we do object to the application. We have lived in the Kings Point Subdivision for 22 years and we remember well Mr. Walter Medlin/Ash Chemical and the disaster and illnesses they caused with our water system. The city is now Maintaining our water and we are very happy with that. There is no longer a water treatment system in this neighborhood. Does that mean we can pick any neighborhood we want and go in and say "you have to get your water through me now" Further more, we are serviced by the same pipeline that is servicing Regal Oaks, Harbor Oaks, Anarada, and Breckenridge developments and do not understand why a price increase is necessary. Are we being victimized here?

We believe more research is necessary into this situation.

Thank you for your time in this matter.

Sincerely,  
*Mr & Mrs. R.A. Johnson*
