REQUEST:

RESPONSE: Bellsouth's DSLAM deployment plans are developed to reach the greatest number of potential subscribers of DSL service. This approach is specifically designed to maximize the available end-user customer base for our ISP customers. Significant portions of the non-DSL qualified end-users in BellSouth's territory have their underlying phone service provisioned via a remote terminal. In order for these end-users to have DSL service via the BellSouth network, it is necessary for BellSouth to continue to deploy DSLAM capability at the remote terminals that provide the underlying phone service.

PROVIDED BY: Eric Fogle
