Re: **Docket No. 020237-TL**
Petition for Expedited Review of Growth Code Denials
By the Number Pooling Administration for the Daytona
Beach Exchange (Daytona Beach Main and DeLand)

Dear Ms. Bayó:

Enclosed is an original and fifteen copies of BellSouth Telecommunications, Inc.'s Petition for Expedited Review of NXX-X Code Denials, which we ask that you file in the caption docket.

A copy of this letter is enclosed. Please mark it to indicate that the original was filed and return a copy to me. Copies have been served to the parties shown on the attached certificate of service.

Sincerely,

James Meza III

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for Expedited Review of Growth) Docket No.
Code Denials by the Number Pooling Administrator)
for the Daytona Beach Exchange (Daytona Beach) Filed: March 13, 2002
Main and DeLand))
_____)

PETITION FOR EXPEDITED REVIEW OF NXX-X CODE DENIALS

BellSouth Telecommunications, Inc. (“BellSouth”), pursuant to 47 C.F.R. § 52.15(g)(iv), Federal Communications Commission (“FCC”) Order FCC 00-104, and Florida Public Service Commission (“Commission”) Order No. PSC-01-1873-PCO-TL, petitions the Commission to review the Pooling Administrator’s (“NeuStar”) denial of BellSouth’s request for additional numbering resources in the Daytona Beach and DeLand exchanges. In support of this petition, BellSouth states:

PARTIES

1. BellSouth is a corporation organized and formed under the laws of the State of Georgia and an incumbent local exchange company (“ILEC”) regulated by the Commission and authorized to provide local exchange telecommunications and intraLATA toll telecommunications in the State of Florida.

2. NeuStar is an independent non-governmental entity, which is responsible for administering and managing the numbering resources in pooling areas. See 47 C.F.R. § 52.20(d).

JURISDICTION

3. The Commission has jurisdiction of this matter pursuant to Industry Numbering Committees (INC) Number Pooling Guidelines Sections 3.7 and 12(c). This

provision provides that a carrier may challenge NeuStar's decision to deny numbering resources to the appropriate regulatory authority.

BACKGROUND AND REQUEST FOR RELIEF

4. On March 31, 2000, the FCC issued Order No. 00-104 ("FCC 00-104" or the "Order") in the Numbering Resource Optimization docket (Docket No. 99-200). The goal of FCC 00-104 was to implement uniform standards governing requests for telephone numbering resources in order to increase efficiency in the use of telephone numbers and to avoid further exhaustion of telephone numbers under the NANP.

5. Among other things, FCC 00-104 adopted a revised standard for assessing a carrier's need for numbering resources by requiring rate center based utilization rates to be reported to North American Numbering Plan Administrator ("NANPA"). FCC Order at § 105. The FCC further required that, to qualify for access to new numbering resources, applicants must establish that existing numbering inventory within the applicant's rate center will be exhausted within six months of the application. Prior to the ruling, the Central Office Code Assignment Guidelines, used by the industry and NANPA to make code assignments, required the applicant's existing number inventory within the applicant's serving switch to exhaust within a specific months-to-exhaust ("MTE") of the code application in order for a code to be assigned or for the carrier to prove that it was unable to meet a specific customer's request with its current inventory of numbers. The FCC stated that the shift to a "rate center" basis for determining the need for new numbering resources was intended to "more accurately reflect how numbering resources are assigned" and to allow "carriers to obtain numbering resources in response to specific customer demands." FCC Order at ¶ 105.

6. On December 29, 2000, the FCC also released FCC 00-429, which reaffirmed FCC 00-104 and also required carriers to also meet a 60 percent initial utilization threshold. FCC 00-429 at ¶ 26. Based on these two FCC orders, carriers are required to meet a six MTE criteria as well as a utilization threshold on a rate center/exchange basis in order to be granted additional numbering resources. Id. at ¶ 29.

7. In FCC 00-104, the FCC directed the industry and the Pooling Administrator to comply with the INC Pooling Guidelines. FCC 11-104 ¶183. Pursuant to the INC Guidelines, in order to obtain thousand-block allocations, the carrier must demonstrate that its existing numbering resources for the rate center will exhaust within six (6) months and also have a utilization of 60 percent for the specific rate center. See INC Guidelines Section 4.3(d) and Appendix 3. These requirements are known as the six (6) months-to-exhaust (“MTE”) and utilization threshold.

8. Since the beginning of this year, BellSouth has submitted several requests for additional numbering resources to North American Numbering Plan Administrator (“NANPA”) and NeuStar for assignment of additional numbering resources to meet the demands of its customers in several Florida exchanges, including Daytona Beach, Ft. Lauderdale, Jacksonville, Miami, North Dade, Orlando, and West Palm Beach.

9. BellSouth has completed these applications in accordance with INC guidelines and filled out the necessary Months-to-Exhaust and Utilization Certification Worksheets as required.

10. BellSouth has utilized mechanisms such as number pooling to manage its numbering resources in the most efficient manner. However, as the Commission is well

aware, in some circumstances, BellSouth has been required to petition the Commission for relief.

11. On May 25, 2001, BellSouth petitioned the Commission to develop an expedited process to review NANPA's denial of a request for additional numbering resources to minimize the delay carrier's experience in attempting to challenge a denial by NANPA. As a result of the BellSouth's Petition and the Commission's efforts to make numbering resources available to carriers, the Commission issued Order No. PSC-01-1873-PCO-TL setting forth an expedited code denial process. However, it appears the original petition did not cover the code denials by NeuStar.

Daytona Beach

12. As for this request for additional numbering resources for the Daytona Beach exchange, BellSouth states the following:

13. The Daytona Beach exchange consists of five (5) central offices and five (5) switching entities that utilize numbering resources: Fentress (DYBHFLFNRS0), Main (DYBHFLMADS0), Ocean Shores (DYBHFLOSRS0), Ormond Beach (DYBHFLOBDS0), and Port Orange (DYBHFLPODS0).

14. On February 26, 2002, BellSouth requested additional numbering resources from NeuStar for the Daytona Beach Main (DYBHFLMADS0) switch. See Attachment 1. Specifically, BellSouth requested 2,000 consecutive Direct Inward Dialing (DIDs) numbers for a customer in order to meet a customer's request. The customer needs the additional numbers as soon as possible.

15. At the time of the code request, the Daytona Beach exchange had a MTE of 19.56 and a utilization of 72.46%, while the MTE for the Main (DYBHFLMADS0) switch was 133.08.

16. On March 5, 2002, NeuStar denied BellSouth's request for additional numbering resources because BellSouth had not met the rate center based MTE criteria, notwithstanding the fact that BellSouth's is unable to provide the numbering resources requested by the specific customer. See Attachment 2. Attached to this Petition is the MTE and utilization rate for each switch in the Daytona Beach exchange as well as the customer contact information. See Attachment 3.

17. BellSouth's request for additional numbering resources to provide the numbers requested above in the Daytona Beach exchange would not materially impact exhaustion of available numbers in the 386 area code.

DeLand

18. The DeLand exchange consists of one central office and one switching entity that utilizes numbering resources: DeLand (DELDFLMADS0).

19. On February 20, 2002, BellSouth requested additional numbering resources from NeuStar for the DeLand switch. See Attachment 4. Specifically, BellSouth requested 1,000 consecutive numbers in order to meet a specific customer's request.

20. At the time of the code request, the DeLand exchange had a MTE of 31.64 and a utilization of 73.15%.

21. On February 27, 2002, NeuStar denied BellSouth's request for additional numbering resources because BellSouth had not met the rate center based MTE criteria, notwithstanding the fact that BellSouth is unable to provide the numbering resources requested by the specific customer. See Attachment 5. Attached to this Petition is the customer contact information. See Attachment 3.

22. As discussed above, both the FCC Order and the INC guidelines provide that state regulatory authorities have the power and authority to review NANPA's decision to deny a request for numbering resources. See INC Number Pooling Guidelines Sections 3.7 and 12(c).

23. Under earlier MTE procedures used by NANPA, waivers or exceptions were granted when customer hardships could be demonstrated or when the service provider's inventory did not have a block of sequential numbers large enough to meet the customer's specific request. Under existing procedures, NeuStar nor NANPA looks at the number of MTE and utilization for the entire rate center without exception. The current process is arbitrary and results in (1) decisions contrary to the public interest and welfare of consumers in the State of Florida; and (2) decisions that do not necessarily promote the efficient use of telephone numbers.

24. Unfortunately, BellSouth's inability to obtain numbering resources in the above switch, which is necessary to meet its customers' numbering demands in multi-switch rate centers, will not be the last time BellSouth experiences this problem. BellSouth has a total of 101 rate centers in Florida with 30 of these being multi-switch rate centers. Some of the switches within these multi-switch rate centers are already within or near the six MTE. BellSouth, however, believes that it will be unable to meet

the six MTE threshold at the rate center level in all of these multi-switch rate centers, thereby jeopardizing its ability to adequately comply with its carrier of last resort obligations.

25. BellSouth requests that the Commission's reverse NeuStar's decision to withhold numbering resources from BellSouth on the following grounds:

(a) NeuStar's denial of numbering resources to BellSouth interferes with BellSouth's ability to serve its customers within the State of Florida.

(b) The MTE at the rate center level requirement is discriminatory against the incumbent LEC, since the ILEC is typically the only local service provider with multiple switches in a rate center. The ILEC deploys multiple switches in a rate center in order to meet customer demand for telephone service. The new FCC rules for obtaining numbering resources both penalizes and discriminates against the ILECs for deploying multiple switches. BellSouth believes that it is patently unfair to require that the ILEC only get six (6) MTE in all the switches it has deployed in a rate center, when the ALECs, which have recently entered the local service market, have to meet the MTE requirement in only the single switch that they have deployed to serve their customers in a single rate center or even multiple rate centers.

(c) As a result of NeuStar's denial of BellSouth's request for additional numbering resources, BellSouth will be unable to provide telecommunications services to its customers as required under Florida law.

WHEREFORE, BellSouth requests:

1. The Commission review the decision of NeuStar to deny BellSouth's request for additional numbering resources for the Daytona Beach and DeLand exchanges; and

2. The Commission direct NeuStar to provide the requested numbering resources for the Daytona Beach and DeLand exchanges as discussed above.

Respectfully submitted this 13th day of March, 2002.
