TARIFF FORMAT

Sheet Numbering - Sheet numbers appear in the upper right hand corner of the page. Sheets are numbered sequentially and from time to time new pages may be added to the Tariff. When a new page is added between existing pages, a decimal is added to the preceding page number. For example, a new page added between Sheets 3 and 4 would be numbered 3.1.

Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in the tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.

Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

Check Sheets - When a Tariff filing is made with the FPSC, an updated check sheet accompanies the Tariff filing. The check sheet lists the pages contained in the Tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision, all revisions made in a given filing are designed by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it. The Tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the FPSC.

- 2.11. Tax and Fee Adjustments
- 2.11.1. All state and local taxes (i.e., gross receipts tax, sales tax, municipal utilities tax) are listed as separate line items and are not included in the quoted rates.

- 2.11.2. If at any future time a municipality acquires the legal right to impose an occupation tax, license tax, permit fee, franchise fee or other similar charge upon the Carrier, and imposes the same by ordinance or otherwise, such taxes, fees or charges shall be billed to the end users receiving service within the territorial limits of such municipality. Such billing shall allocate the tax, fee or charge among end users uniformly on the basis of each end user's monthly charges for the types of service made subject to such tax, fee or charge.
- 2.11.3. If at any future time a county or other local taxing authority acquires the legal right to impose an occupation tax, license tax, permit fee, franchise fee or other similar charge upon the Carrier, and imposes the same by ordinance or otherwise, such taxes, fees or charges shall be billed to the end users receiving service within the territorial limits of such county or other taxing authority. When utility or telecommunications assessments, franchise fees, or privilege, license, occupational, excise, or other similar taxes or fees, based on interstate or intrastate receipts are imposed by certain taxing jurisdictions upon the Company or upon local exchange companies and passed on to the Company through or with interstate or intrastate access charges, the amounts of such taxes or fees will be billed to Customers in such a taxing jurisdiction on a prorated basis. The amount of charge that is prorated to each Customer's bill is determined by the interstate or intrastate telecommunications service provided to and billed to an end user/customer service location in such a taxing jurisdiction with the aggregate of such charges equal to the amount of the tax or fee imposed upon or passed on to the Company.
- 2.11.5. When any municipality, or other political subdivision, local agency of government, or department of public utilities imposes upon and collects from the Company a gross receipts tax, occupation tax, license tax, permit fee, franchise fee or regulatory fee, such taxes and fees shall, insofar as practicable, be billed pro rata to the Company's Customers receiving service within the territorial limits of such municipality, other political subdivision, local agency of government, or public utility commission.

Examples of such programs include, but are not limited to, the Universal Service Fund, the Primary Interexchange Carrier Charge, and compensation to payphone service providers for use of their payphones to access the Company's services.

2.12. Method for Calculation of Airline Mileage

2.12.1 The airline mileage between two cities can be calculated using the Vertical (V) and Horizontal (H) coordinates of the serving wire centers associated with the Company's POP locations. The method for calculating the airline mileage is obtained by reference to AT&T's Tariff F.C.C. No. 10 in accordance with the following formula:

$$\text{the square root of: } \frac{(V1-V2)^2 + (H1-H2)^2}{10}$$

where V1 and H1 correspond to the V&H coordinates of City 1 and V2 and H2 correspond to the V&H coordinates of City 2.

Example:

	<u>V</u>	<u>H</u>
City 1	5004	1406
City 2	5987	3424

$$\text{the square root of: } \frac{(5004-5987)^2 + (1406-3424)^2}{10}$$

The result is 709.83 miles. Any fractional miles are rounded to the next higher whole number; therefore, the airline mileage for this example is 710 miles.

2.13. Time of Day Rate Periods

2.13.1 Time of Day Rate Periods are determined by the time of day at the location of the Calling station.
