They represent facilities-based and/or resellers that are in one or several Sprint markets, including Orlando, Leesburg, Ocala and Tallahassee. Wire center specific information is not available. This list is not meant to represent a complete list of competitors in the market.

In addition, this information is only available through June 2002. Some competitors may have exited the areas or may have changed names either through merger or acquisitions.

8. Please provide any comments, suggestions or information you believe will assist staff in evaluating and reporting on the development of local exchange competition in Florida. This may include alternative methods of calculating ALEC market share (e.g., E911 database). If you indicate alternative methods of calculating ALEC market share, please provide the data needed to calculate any of these alternative methods, or identify where such data can be obtained. In addition, we would appreciate any comments or information on intermodal local competition (e.g., wireless, cable telephony), reports or studies you have completed on ALEC market share, or anything else that you believe to be relevant.

Response: Competition for business services remains relatively high in Florida with competition in the facilities based residential market lagging behind. Although the telecommunications industry is facing difficulties, with competitors filing for bankruptcy and/or exiting some markets, stronger competitors remain in operation targeting customers in Sprint territories. Within Sprint's territory, almost all of the ALECs are targeting business customers and are at least partially facilities based. Residential competition is mainly from resellers, primarily those offering prepaid local service. However, facilities based competition is emerging, with some ALECs targeting new residential customers. Once the economy strengthens, ALECs are expected to eventually pick up expansion plans and target new market areas.

9. Please provide a copy of your (or your parent company's) most recent annual report to stockholders, and Form 10-K.

Response: Please see attached 2001 Annual Report and Form 10-K.

10. Please provide year-end 2000 and 2001 data for **total company Florida operations** as outlined below. This data should be consistent in form with what your company previously provided in its 1995 Annual Report to the FPSC in Schedules I-1, S-2, and S-3.

- (e) An estimate of the average revenues per line, per residential line lost

Response: Sprint does not track this information on a monthly basis. However, an analysis of 2001 data, using high level assumptions on total customer yields provides the following. Because this estimate is based on average yields, it is considered conservative since the competitors are targeting the more desirable, high-yield customers.

A residential line lost to an ALEC via resale is estimated at \$[REDACTED]. A residential line lost to an ALEC via a Sprint UNE loop is estimated at \$[REDACTED]. A residential line lost to a facilities based ALEC is estimated to be \$[REDACTED].

- (f) An estimate of the average revenue per line, per business line lost
