Dear Director;

We wish to bring it to your attention that we are very much against any wastewater system being installed on the Island of Little Gasparilla. We are home owners on Bay Street and would like for the island to remain the same as it now is. We purchased the property about 4 years ago because we like the primitive look and life style there. We do not need any of the amenities that are on the mainland. We are doing just fine and do not want any water lines, wastewater systems, or any other features that you may think that we need. If in the event that we would like to have these things we will sell our property and move to the main land.

Thank you for the 30 days we get to make our decisions and contact other homeowners. Is this part of the plan, so you can proceed with the destruction of our life style and the ambiance of a beautiful little island?

Sincerely

Rod and Alice Henderson
