Re: Island Environmental Utility, Inc  
Florida PSC Docket #020745 - *SU*

Sir or Madam;

Reference your notice dated August 16, 2002 regarding the application for certificate of authorization for wastewater certificate for Little Gasparilla Island.

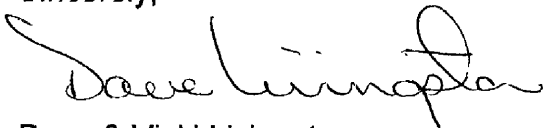

We object to the application of the above company to install or deliver a wastewater system to Little Gasparilla Island.

Little Gasparilla is a barrier island and an environmentally sensitive area. Septic tanks have worked extremely well for many years with no damage to the area. Installation of a wastewater treatment or water treatment system and the underground pipe would definitely disrupt and most likely destroy a good portion of this sensitive environment.

Little Gasparilla unlike Don Pedro has no vehicular traffic to and from the island. Almost all travel on the island is done by golf cart. As you know travel to and from the island is accomplished by private boat or commercial water taxi.

Thanking you in advance for your involvement in this important matter.

Sincerely,

Dave & Vicki Livingston
