RE: Docket No. 021087-WU

Dear Sirs:

Please amend my previously submitted rate request to \$649.54. This is to be a flat rate monthly for the irrigation of 7.86 acres of property known as "Class I Common Property" at Aquarina. Attached is a schedule of my calculation, now corrected for a mathematical error.

It is not feasible to meter the non-potable water usage supplied to this area because there are a number of connections, approximately 20, made at various points in this supply line many of which provide service to other areas. The main supply line to the area is a 12" ductile iron pipe for which a meter would cost \$5,000 to \$6,000, and still would not accurately measure the usage because there are approximately 20 connections at various points, supplying other areas, down stream from where a meter could be placed. Metering usage was not a consideration when these supply lines were designed and installed.

Due to a restriction in the initial order providing a fee for this supply of non-potable water (Order No. 23812 issued 11/27/90), this utility could not charge meter installation charges for connections that existed on 11/27/90, as did this "Class I Common Property" connection. Therefore, this utility cannot be compensated for this expensive meter, and even if metered, complex monthly calculations would be required to calculate monthly usage.

Regards,

James H. Bates
President
