BellSouth Telecommunications, Inc.  
Florida Public Service Commission  
Docket No. 020507-TP  
John Ruscilli  
Deposition Exhibit No. 2

REQUEST How many BellSouth FastAccess customers switched their voice service to an ALEC?

RESPONSE: / BellSouth does not track the numbers of FastAccess customers that switch voice  
2 service to an ALEC. BellSouth does have records of the numbers of ALECs  
3 providing resold voice service, which lines also carry BellSouth's wholesale DSL  
4 service, and which include also the number of lines carrying BellSouth  
5 FastAccess. Such customers may include customers that switched voice service  
6 from BellSouth to the ALEC providing the resold service. Current data reflects  
7 that ALECs are providing voice service to \_\_\_\_\_ of their end user customers over  
8 resold lines within Florida that also carry BellSouth's wholesale DSL transport  
9 service. Included in that total are \_\_\_\_\_ resold lines also carrying BellSouth  
10 FastAccess. BellSouth does not keep records that demonstrate whether such  
11 customers had resold voice service at the time the customers ordered FastAccess  
12 service or whether the customers were existing FastAccess customers when voice  
13 service was switched from BellSouth to the ALEC providing the resold service.
