**Year 2003 Alternative Local Exchange Carrier (ALEC) Data Request  
Response of  
AT&T Communications of the Southern States, LLC  
TCG of South Florida, Inc.**

**August 29, 2003**

*undocketed*

1. Please complete CLEC Table-1, "Access Line Data (VGE basis)."

**Response:** See CLEC Table-1 attached.

2. Please complete CLEC Table-2, "Facilities-Based Access Line Counts (not VGEs)."

**Response:** See CLEC Table-2 attached.

3. Please complete CLEC Table-3, "Physical/Virtual Collocation Data."

**Response:** See CLEC Table-3 attached.

4. Please complete CLEC Table-4, "Switch Data (VGE Basis)."

**Response:** See CLEC Table-4 attached.

5. Please indicate the total number of lines over which you or an affiliate are providing broadband service in Florida, indicating the type of broadband service available.

**Response:** None.

6. Are you offering or providing Voice over Internet Protocol (VoIP) services in Florida? If so, please list the respective exchanges, wire centers and price(s). Is the service local, long distance, or both?

**Response:** AT&T currently transports a portion of its long distance traffic utilizing VoIP technology. AT&T does not offer any local service through the use of VoIP technology.

**CONTAINS CONFIDENTIAL AND PROPRIETARY INFORMATION**

7. Do you actively market your local services to Florida residential customers?  
(a.) If not, please explain why.

**Response:** No. Currently, AT&T does not market residential local service in the state of Florida due a combination of factors including the high wholesale UNE prices and low ILEC retail rates and other barriers to entry described in this report.

- (b.) If so, in what geographic areas?

**Response:** N/A

- (c.) If so, what types of marketing do you use? Please check all that are applicable.

- Newspaper
- Radio
- TV
- Direct Mail
- Telemarketing
- Email
- Website
- Other (please specify)

**Response:** N/A

- (d.) If available, please provide marketing brochures or comparable materials.

**Response:** N/A

8. Please describe your long-term (5 years) business strategy, including whether you intend to change your method of provisioning (e.g., from resale/mixed to all UNEs to facilities-based).

**Response:** AT&T continuously monitors the Florida local exchange market to determine whether market conditions allow profitable entry in the various market segments. When market conditions become conducive to establishing a business case for entry, AT&T enters the market. AT&T has entered those market segments where it makes economic sense to do so such as the enterprise and the small business markets. AT&T hopes to grow its business in these market segments. Any projections of further market entry into the Florida local exchange market are contingent on a favorable regulatory and economic climate.

In view of the current or impending regulatory proceedings that will affect both the regulatory and economic conditions in the Florida local market, a 5-year business strategy projection is not meaningful. The current proceeding to address

## CONTAINS CONFIDENTIAL AND PROPRIETARY INFORMATION

the level of switched access charges as well as the level of the ILECs' local retail rates may affect the retail market conditions faced by CLECs. The impending FCC Impairment proceeding may also affect the provision of local services by CLECs. If the Commission's decisions adversely affect either the retail or wholesale market conditions, then all CLEC's business strategies may also be adversely affected. Likewise, pro-competitive decisions by the Commission will enhance the market opportunities for CLECs with a resultant increase in the level of competition in the local market.

AT&T will choose the most economical means available to provide service whether via its own or leased facilities. Pure resale of ILEC services is not economically viable. As a general proposition, any rational CLEC, including AT&T, will always choose to provide service over its own facilities where it is economically feasible to do so. In the absence of CLEC owned and self-provided facilities, CLECs must rely on other sources for facilities to be able to provide service to customers. If other sources of facilities are not available to economically compete with the other competitors, particularly the ILECs, the CLEC is either barred from entry or forced to exit the market.

9. During the last 12 months have you expanded your service offerings in Florida? If so, please list the new offerings, if they are residence or business (or both), their prices and the exchanges where you have offered the services.

**Response:** No. However, it is anticipated that if favorable decisions are received in the access reduction cases and the impairment proceedings, then AT&T will be able to expand its offerings in Florida.

10. Please list your primary line of business (for example, entertainment, cable television, private line/special access service, interexchange service, local service, cellular service, paging service, electric service, municipality, etc.)

**Response:** Interexchange service, local service.

11. If your company provides pre-paid local telephone service, please indicate whether this is the only service you currently provide in Florida. Also, provide an estimate as to the number of access lines served which constitute pre-paid local service.

**Response:** AT&T does not provide prepaid local service.

12. Please provide information on any package plans offered and include:

**CONTAINS CONFIDENTIAL AND PROPRIETARY INFORMATION**

- (a.) Which services are offered (e.g., cable television, local telephone service, long distance, broadband service)

**Response:**

AT&T and TCG offer business packages that bundle local telecommunications service with long distance services.

The following services are marketed by AT&T:

AT&T Digital Link – AT&T’s Dedicated Local Service via T1 Access Providing 100% Digital Connectivity to the AT&T Worldwide Intelligent Network.

AT&T All In One – An integrated bundle of communication services for small business. This service allows customers to combine all their communications services to a single invoice. Services included in the Bundle are Local, IntraLATA, Calling Card, Long Distance and Internet Access.

AT&T One – A bundle of long distance service and wireless service in partnership with AT&T Wireless.

PrimeXpress Network Service -- (See TCG South Florida Price List Section 4 for service description – Attachment 1.)

PrimePlus IntraLATA Toll Service – (See TCG South Florida Price List Section 4 for service description – Attachment 1.)

PrimePath Business Line Service – (See TCG South Florida Price List Section 4 for service description – Attachment 1.)

PrimePath NBX Service – (See TCG South Florida Price List Section 4 for service description – Attachment 1.)

PrimeNBX Service – (See TCG South Florida Price List Section 4 for service description – Attachment 1.)

- (b.) Where such packages are being offered (exchanges or cities)

**Response:** Services are offered throughout the entire state of Florida.

- (c.) Whether they are provided through your company itself, an affiliate, or a business partner

**CONTAINS CONFIDENTIAL AND PROPRIETARY INFORMATION**

**Response:** Service offerings are provided by the company itself with the exception of AT&T One which is offered in partnership with AT&T Wireless.

(d.) Examples of plan pricing or price ranges

**Response:** See Attachments 2, 3, 4.

(e.) Terms and conditions (for example, is subscribing to both local telephone and long distance a condition of providing service?)

**Response:** Our business offerings bundle local and long distance services.

13. Have you experienced any significant barriers in entering Florida's local exchange markets? Please list and describe any major obstacles or barriers encountered that you believe may be impeding the growth of local competition in the state, along with any suggestions as to how to remove such obstacles.

**Response:**

The UNE rates currently charged by Verizon, Sprint and BellSouth continue to be in excess of the appropriate TELRIC rates mandated by the FCC's pricing rules. In particular, the UNE rates charged by Sprint and Verizon prohibit CLECs from economically providing any residential service in these ILECs' respective territories. The UNE rate levels are a clear barrier to entry.

AT&T continues to experience numerous significant issues with BellSouth regarding the company codes used by AT&T on its orders for service. Specifically, AT&T is currently addressing the following "coding" issues with BellSouth:

--HDSL orders were held up due to BellSouth's prohibition against AT&T's use of multiple company codes. AT&T has had to modify its procedures significantly so that it could order to order these services. It is unclear how long this work-around will be accepted by BellSouth.

--BellSouth is indicating they will no longer support AT&T's orders for UNE-loops when using multiple codes or even the work-around that BellSouth had put in place using secondary Access Carrier Terminal Locations (ACTLs).

--BellSouth is proposing to charge \$175 per ASR for the transition of the MediaOne switches in Florida to AT&T codes.

Additionally AT&T is working with Comcast in attempting to obtain a workable resolution with BellSouth regarding whether, how, and at what cost certain

## CONTAINS CONFIDENTIAL AND PROPRIETARY INFORMATION

information on the directory listing records of Comcast (former AT&T Broadband) end-users should be changed.

BellSouth's change control process continues to fail to meet the needs of the CLECs, with insufficient resources, lengthy implementation intervals, and untimely correction of defects.

14. Have you experienced any difficulties involving any agreements you may have with incumbent LECs? If so, please describe any significant problems encountered.

### **Response:**

Yes. The following are three examples:

Of the last nineteen (19) months of BellSouth self-reported performance (PMAP) data, BellSouth has failed to meet parity for the % troubles in 30 days measure for thirteen (13) months. AT&T has been addressing its concerns around this issue with BellSouth since early 2002. Although BellSouth has met parity during the last four (4) months of reported data, BellSouth's service to AT&T has gotten worse, not better. BellSouth is in parity only because its performance for its retail customers has gotten worse.

Service issues around the UNE-P platform are a top priority for AT&T. AT&T has been dealing with this issue with BellSouth for an extended period of time. Most recently, BellSouth implemented a trial whereby they pre-tested the UNE-P service prior to conversion. When problems were detected, BellSouth dispatched a technician prior to the conversion to AT&T and fixed any problems found. BellSouth led AT&T to believe that the pre-test would likely be rolled out across the region after the conclusion of the trial. However, its in final report, BellSouth stated that BellSouth will remain in a trial mode, but will begin a second Phase. In Phase 2, BellSouth will continue to track and manually implement the adjusted process on a limited basis region wide.

Additionally, AT&T is receiving faxed jeopardy notices on electronic HDSL2 orders sent to BellSouth. BellSouth is obligated via the Interconnection Agreement to provide all responses to AT&T orders back to AT&T in the manner in which the order is sent. AT&T is being told on the day of port that the order is clarified or canceled and that the LCSC has faxed the notification. AT&T is neither expecting manually faxed jeopardy notices, nor should BellSouth be sending them. Attachment 7, Section 3.15 of the Interconnection Agreement clearly states that BellSouth will provide electronic Jeopardy notifications for LSRs that are sent electronically.

The BellSouth contract negotiator agrees that contract language states that if AT&T/TCG submits orders electronically, BST will provide electronic jeopardy

**CONTAINS CONFIDENTIAL AND PROPRIETARY INFORMATION**

notifications, and if AT&T/TCG submits orders manually, BST will provide manual jeopardy notifications.

AT&T proposed an alternative solution, advising BellSouth that AT&T would be willing to accept an e-mail notification for these Jeopardy Notices. BellSouth refused to consider the e-mail solution, and does not plan to implement a permanent solution until August 2004.

AT&T has submitted this issue to Change Control as a defect change request (CR 1289). As of August 5, 2003, BellSouth has rejected the request. AT&T has escalated the issue as directed by the Change Control process.

Finally, BellSouth cannot pass the call identification information for calls placed by AT&T customers using AT&T Digital Link (ADL) Service so that the called party from AT&T's customers will see the identifying names or numbers of the calling party on their caller ID screens, as required by the interconnection agreement.

15. Please provide any additional comments or information you believe will assist staff in evaluating and reporting on the development of local exchange competition in Florida. This information may include comments on alternative methods to evaluate the level of competition in Florida (e.g., use of the E911 databases, etc.) as well as comments or information on intermodal local competition (e.g., wireless, cable telephony).

**Response:** Local competition in Florida is still nascent and for the most part is limited to intramodal competition. Intermodal competition is scant at best. AT&T understands anecdotally that there may be some substitution of wireless service for some residential wire line service. However, AT&T does not view this as any reliable indicator of sustainable intermodal competition. AT&T is unaware of any other intermodal competition occurring in Florida with the exception of Comcast's provision of local service through cable telephony. It is AT&T's understanding that Comcast has ceased providing any service to new customers and is merely serving existing customers.

16. For the year ending December 31, 2002, please identify your total revenue from local service, broken out by business and residence.

**Response:** AT&T's total revenue as reported in its regulatory assessment fee filings for AT&T and TCG are as follows:

AT&T:           \$ [Redacted]  
TCG:            \$ [Redacted]

**CONTAINS CONFIDENTIAL AND PROPRIETARY INFORMATION**

17. As of December 31, 2002, how much money (in thousands of dollars) have you invested in your network serving Florida customers?

**Response:** Information unavailable at this time.

18. Has your company filed either Chapter 7 or Chapter 11 bankruptcy in the past? Are you currently operating under Chapter 7 or Chapter 11 protection? If so, please provide relevant dates and details about the filing, including which chapter.

**Response:** No.

19. If your company filed a Form 477 with the Federal Communications Commission in March 2003, please enclose a copy of the completed form with your response to this data request. (NOTE: This form only applies to CLECs with a minimum of 10,000 access lines.)

**Response:** Please see Attachment 5.

20. If your company is publicly traded, please provide a copy of your (or your parent company's) most recent annual report to stockholders, and Form 10-K.

**Response:** Please see Attachments 6 and 7.

| *AT&T does not track the CLEC lines for each switch by exchange/wire center. The information provided on the NANPA website was inconclusive. AT&T is making every effort to provide the total number of access lines from its switches; however, this information will not be available by exchange/wire center. |              |                      |                   |      |        |                                |                              |                               |
|  |              |                      |                   |      |        |                                |                              |                               |

|  |  |  |  |  |  |  |  |
| <b>NOTES/INSTRUCTIONS FOR COMPLETING TABLE-4:</b>  |  |  |  |  |  |  |  |
| 1. An access line connects the end-user's customer premises equipment (CPE) to the serving switch (in this case, the CLEC's switch) and allows the end-user to originate and/or      |  |  |  |  |  |  |  |
| 2. Access line data must be calculated as voice-grade equivalents (VGEs). A VGE is defined as a line or channel (wireline or wireless) that connects the end-user's CPE to the       |  |  |  |  |  |  |  |
| ***DO NOT INCLUDE LINES OR CHANNELS THAT DO NOT HAVE SWITCH PORT ASSIGNMENTS SUCH AS PRIVATE LINES.***   |  |  |  |  |  |  |  |
| EXAMPLE: A channelized DS1 can support 24 voice-grade channels, i.e., 24 DS0s. However, if only 20 of the 24 DS0s have switch port assignments, then 20 would be entered into        |  |  |  |  |  |  |  |
| 3. Exchanges should be listed in alphabetical order.   |  |  |  |  |  |  |  |
| 4. Residential and business access line counts may be obtained by querying your billing database, provisioning database, the NANPA's website, etc. It is easy to use the data at the |  |  |  |  |  |  |  |
| 5. Enter location (street address, city, state, and zip code) of your switch that is actually being used to provide local exchange telecommunications service.                       |  |  |  |  |  |  |  |
| 6. Enter quantity, type (circuit or packet), and manufacturer of your switch that is actually being used to provide local exchange telecommunication service.                        |  |  |  |  |  |  |  |
| 7. Enter quantity, type (curcuit or packet), and manufacturer of your proposed switch to be used to provide local exchange telecommunications service.                               |  |  |  |  |  |  |  |
| 8. Enter proposed installation date (mm/yy) of proposed switch to be used to provide local exchange telecommunications service.  |  |  |  |  |  |  |  |
| 9. Enter column totals without duplication.  |  |  |  |  |  |  |  |
