TARIFF FORMAT

A. Sheet Numbering: Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between pages 11 and 12 would be page 11.1.

B. Sheet Revision Numbers: Revision numbers also appear in the upper right corner of each sheet where applicable. These numbers are used to indicate the most current page version on file with the Commission. For example, 4th Revised Sheet 13 cancels 3rd Revised Sheet 13. Consult the Check Sheet for the sheets currently in effect.

C. Paragraph Numbering Sequence: There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1
- 2.1.1
- 2.1.1.A
- 2.1.1.A.1
- 2.1.1.A.1.(a)
- 2.1.1.A.1.(a).I
- 2.1.1.A.1.(a).I.(i)
- 2.1.1.A.1.(a).I.(i).(1)

D. Check Sheets: When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current Revision Number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on Commission file.

SECTION 3 - DESCRIPTION OF SERVICE

3.1 Computation of Charges

3.1.1 The total charge for each completed call may be a variable measured charge dependent on the duration, distance and time of day of the call. The total charge for each completed call may also be dependent only on the duration of the call, i.e. a statewide flat rate per minute charge. The variable measured charge is specified as a rate per minute which is applied to each minute. All calls are measured in increments as set forth in the Rates Section of this tariff. Fractions of a billing increment are rounded up to a full billing increment on a per call basis. Fractions of a cent per minute are rounded up to a full cent on a per call basis.

3.1.2 Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call. The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate centers that are produced by Bell Communications Research in the NPA-NXX V&H Coordinates Tape and Bell's NECA Tariff No. 4.

Formula:

$$\sqrt{\frac{(V1-V2)^2 + (H1-H2)^2}{10}}$$

Issued: October 10, 2003

Effective:

By:

David Byron, Chief Operating Officer
Two Executive Drive, Suite 900
Fort Lee, New Jersey 07024

3.1.3 Timing begins when the called party answers and two way communication is possible, as determined by standard industry methods generally in use for ascertaining answer, including hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. Timing for each call ends when either party hangs up.

3.1.4 The Company will not bill for uncompleted calls.

3.2 Customer Complaints and/or Billing Disputes

Customer inquiries or complaints regarding service or accounting may be made in writing or by telephone to the Company at:

Effective:

3.2 Continued

Any objection to billed charges should be reported promptly to the Company or its billing agent. Adjustments to Customers' bills shall be made to the extent that records are available and/or circumstances exist which reasonably indicate that such charges are not in accordance with approved rates or that an adjustment may otherwise be appropriate. A Customer who is unable to resolve a billing dispute with the Company may contact the Commission by telephone at 1-800-342-3552 to intervene in the billing dispute.

3.3 Level of Service

A Customer can expect end to end network availability of not less than 99% at all times for all services.

3.4 Billing Entity Conditions

3.5.2 Travel Cards

3.5.4 Company Prepaid Calling Cards

This service permits use of Prepaid Calling Cards for placing long distance calls. Customers may purchase Company Prepaid Calling Cards at a variety of retail outlets or through other distribution channels. Company Prepaid Calling Cards are available at a variety of face values. Company Prepaid Calling Card service is accessed using the Company toll-free number printed on the card. The caller is prompted by an automated voice response system to enter his/her Authorization Code, and then to enter the terminating telephone number. The Company's processor tracks the call duration on a real time basis to determine the number of Telecom Units consumed. The total consumed Telecom Units and applicable taxes for each call are deducted from the remaining Telecom Unit balance on the Customer's Company Prepaid Calling Card.

All calls must be charged against Prepaid Calling Card that has a sufficient Telecom Unit balance. A Customer's call will be interrupted with an announcement when the balance is about to be depleted.

When the balance is depleted, the Customer can either call the toll-free number on the back of the Company Prepaid Calling Card and "recharge" the balance on the card using a nationally recognized credit card, or the Customer can throw the card away and purchase a new one. Calls in progress will be terminated by the Company if the balance on the Company Prepaid Calling Card is insufficient to continue the call.

Section 3.5.4 Continued

A card will expire on the date indicated on the card, or if no date is specified, 12 months from the date of first usage, or the date of last recharge, whichever is later. The Company will not refund unused balances.

A credit allowance for Company Prepaid Calling Card Service is applicable to calls that are interrupted due to poor transmission, one-way transmission, or involuntary disconnection of a call. To receive the proper credit, the Customer must notify the Company at the designated toll-free customer service number printed on the Company Prepaid Calling Card and furnish the called number, the trouble experienced (e.g. cut-off, noisy circuit, etc.), and the approximate time that the call was placed.

When a call charged to a Company Prepaid Calling Card is interrupted due to cut-off, one-way transmission, or poor transmission conditions, the Customer will receive a credit equivalent of one Telecom Unit.

Credit allowances for calls pursuant to the Company Prepaid Card Service do not apply for interruptions not reported promptly to the Company or interruptions that are due to the failure of power, equipment or systems not provided by the Company.

Credit for failure of service shall be allowed only when such failure is caused by or occurs due to causes within the control of the Company.

The Company will block all calls beginning with the NPA "900" and NXX "976" calls, therefore such calls can not be completed.
