Re: Data Request Regarding Implementation of Requirements Arising From Federal Communication Commission's Triennial Unbundled Network Element Review - Local Circuit Switching for Mass Market Customers (Docket No. 030851-TP) and High-Capacity Loops and Transport (Docket No. 030852-TP) (Responses due by December 3, 2003)

On February 20, 2003, the Federal Communications Commission (FCC) adopted new rules concerning an incumbent telecommunications exchange carrier's (ILEC) obligations to make unbundled network elements (UNEs) available to competing carriers. The *Triennial Review Order*³³⁸ adopts rules which establish a new standard for determining the existence of impairment under section 251(d)(2) of the 1996 Telecommunications Act and sets forth a new list of UNEs. Additionally, the FCC requires state commissions to conduct a granular analysis within 9 months of the effective date of the order (i.e., July 2, 2004) to determine whether ILECs in that state must continue to provide access to certain network elements. To this end, the Florida Public Service Commission must determine whether ILECs in Florida must continue to provide competing carriers in all markets with access to: (1) high-capacity loops; (2) mass market switching; and (3) dedicated transport.

On August 22, 2003, the Commission opened two dockets to address the implementation of the *Triennial Review Order*. The attached data request addresses targeted trigger-related information, pursuant to the unbundling requirements specified in 47 CFR §51.319. Providing the
