4. FIPUG is an ad hoc association consisting of industrial users of electricity in Florida. The cost of electricity constitutes a significant portion of FIPUG members' overall costs of production. FIPUG members require adequate, reasonably priced electricity in order to compete in their respective markets.

5. Statement of Affected Interests. The decision that the Commission makes in this docket will determine the conservation goals and programs for Tampa Electric Company (TECo) for the next ten years. The costs of such programs are passed through to ratepayers every year through the conservation cost recovery clause. Since FIPUG members may bear a portion of such costs, its substantial interests are affected.

6. FIPUG's interests are of the type that this proceeding is designed to protect. Agrico Chemical Company v. Department of Environmental Regulation, 406 So.2d 478 (Fla. 2d DCA 1981). The purpose of the proceeding is to review conservation goals and programs which ultimately ratepayers will fund. The purpose of the proceeding thus coincides with FIPUG's interest, which is to ensure that members' electrical bills reflect prudent, economical choices.

7. Disputed Issues of Material Fact. At this point in time, FIPUG does not yet know whether there will be any disputed issues of material fact. Such a determination can only be made after a review of TECo's filings.

8. Statement of Ultimate Facts Alleged. FIPUG alleges that conservation goals and the programs approved to implement such goals must be cost-effective for ratepayers

WHEREFORE, FIPUG requests the Commission enter an order allowing it to intervene as a full party in this docket.
