RE: PSC INQUIRY 494349E

Petition of Appeal

The following commissioners participated in the disposition of this matter:

Braulio Baez
J. Terry Deason
Lila A. Jaber
Rudolph "Rudy" Bradley
Charles M.

We are appealing the decision that the commission has made because we believe that it was unjustly and a paralyzed decision.

FPL has not found valid facts in none of their evidence, evidence that has been made up and manipulated.

FPL has not demonstrated that the meter was changed November 1, 1979, it is solely they did.

The commission has not been impartial, because the evidence that was presented by FPL, a lot of it has been false, and there's proof that they have invented such evidence.

In the final resume the Commission hasn't documented nothing that can perjure FPL and that have been proven.

Inresponsibly they put us at risk of an accident of incalculable dimensions.

The commission has not manifested in what is our electronic equipment losts due to technicians when they did not connect the neutral.

The commission has not manifested in what is penetration of your personnel in my property against our will.

When they did this act they destroyed the door that gave us access to the backyard and they left mud all over the deck to our pool. They did this to change the meter, using a method that is used in other countries such as Cuba and Iraq, where there's no rights, and is totalitarian.

The commission has given that right that is unconstitutional, and you have misrepresented my position giving the understanding that I am a violent man.

I refused to let him in because I wanted in writing, what he was going to be working on and I don't find anything wrong with that.

I ask myself, why did they have to change the meter that day?

Could the meter have put FPL at risk?

I had already complained to Carmen Peña that I could see that the meter was moving pretty fast, even though we turned off most of the lights in the house.

I would like the opportunity for an appeal, and be represented by a lawyer because we know that it is difficult to accuse somebody without evidence.
