Mr. Bob Casey
Regulatory Analyst Supervisor
Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32309-0850

Dear Mr. Casey:

As a certified CLEC in Florida since 1997, we are providing telephone service to customers in seven LATAs throughout the State at this time, and we are expanding our service offering in LATA 460 with the placement of a Digital Switch in the City of Hialeah. As we construct the switch, we will need to assign an LRN (Local Routing Number) to send and receive calls to and from other Local Exchange Carriers.

The Miami Rate Center, which includes Hialeah, has two Supra switches. They are Red Road and Golden Glades switches and each switch has an LRN with a total of 11,000 numbers for assignment of telephone service to our customers.

With the placement of the new Hialeah switch, we will need an LRN. However, our utilization of 11% on existing numbers does not meet the FCC Guidelines of 75% in order to receive a growth NXX code. Likewise, our months to exhaust of existing numbers is more than the 6 months specified in the guidelines.

However, the FCC Guidelines states that a new code can be issued to the Service Provider (CLEC) if the State Public Service Commission approves the code issuance.

With this letter we are asking you to approve the issuance of a new NXX code to be assigned to the Hialeah switch for LRN capability and for telephone services to our customers in that location.

Your assistance with this matter will be greatly appreciated. If you have any questions, please contact me at the number provided.

Sincerely,

A handwritten signature in black ink, appearing to read "Carl G. Forbes", is written over a light gray rectangular background.

Carl G. Forbes
