**SECTION 3 - DESCRIPTION OF SERVICE****3.1 Computation of Charges**

3.1.1 The total charge for each completed call may be a variable measured charge dependent on the duration, distance and time of day of the call. The total charge for each completed call may also be dependent only on the duration of the call, i.e. a statewide flat rate per minute charge. The variable measured charge is specified as a rate per minute which is applied to each minute. All calls are measured in increments as set forth in the Rates Section of this tariff. Fractions of a billing increment are rounded up to a full billing increment on a per call basis. Fractions of a cent per minute are rounded up to a full cent on a per call basis.

3.1.2 Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call. The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate centers that are produced by Bell Communications Research in the NPA-NXX V&H Coordinates Tape and Bell's NECA Tariff No. 4.

Formula:

$$\sqrt{\frac{(V1-V2)^2 + (H1-H2)^2}{10}}$$
