The Parties have not discussed the definition for "End User" other than in the context of high-capacity EELs. Since the issue as stated by the CLECs and raised in the General Terms and Conditions of the Agreement has never been discussed by the Parties, the issue is not appropriate for arbitration. The term End User should be defined as it is customarily used in the industry; that is, the ultimate user of the telecommunications service.

BellSouth's failure to perform as required is its own responsibility and BellSouth should bear any and all risks associated with such failures. 				<p>YES, either Party should be able to petition the Commission, the FCC or a court of law for resolution of a dispute. Given the difficulties experienced in achieving efficient regional dispute resolution, and the ongoing debate as to whether state commissions have jurisdiction to enforce agreements (CLECs do not dispute that Commission) and as to whether the FCC will engage in such enforcement (or not), no legitimate dispute resolution venue should be foreclosed. There is no question that courts of law have jurisdiction to entertain such disputes (see GTC, Sec. 11.5); indeed, in certain instances, they may be better equipped to adjudicate a dispute and may provide a more efficient alternative to litigating in up to 9 different jurisdictions or to waiting for the FCC to</p>	<p>This Commission or the FCC should resolve disputes as to the interpretation of the Agreement or as to the proper implementation of the Agreement. 12	G-12	32.2	<i>Should the Agreement explicitly state that all existing state and federal laws, rules, regulations, and decisions apply unless otherwise specifically agreed to by the Parties?</i>	YES, nothing in the Agreement should be construed to limit a Party's rights or exempt a Party from obligations under Applicable Law, as defined in the Agreement, except in such cases where the Parties have explicitly agreed to a limitation or exemption. This is a basic legal tenet and is consistent with both federal and Georgia law (agreed to by the parties), and it should be explicitly stated in the Agreement in order to avoid unnecessary disputes and litigation that has plagued the Parties in the past.	This Agreement is intended to memorialize the Parties' mutual agreement with respect to their obligations under the Act and applicable FCC and Commission rules and orders. No, consistent with the FCC’s errata to the Triennial Review Order, there is no requirement to commingle UNEs or combinations with services, network elements or other offerings under Section 271 of the Act.

(B) BellSouth should perform line conditioning in accordance with FCC Rule 47 C.F.R. 51.319(a)(1)(iii).	(A) Line Conditioning is defined as routine network modification that BellSouth regularly undertakes to provide xDSL services to its own customers.  (B) BellSouth should perform line conditioning functions as defined in 47 C.F.R. 51.319(a)(1)(iii) to the extent the function is a routine network modification that BellSouth regularly undertakes to provide xDSL to its own customers.

37	2-19	2.12.2	<i>Should the Agreement contain specific provisions limiting the availability of Line Conditioning to copper loops of 18,000 feet or less?</i>	NO, the agreement should not contain specific provisions limiting the availability of Line Conditioning to copper loops of 18,000 feet or less in length.	Yes, current industry technical standards require the placement of load coils on copper loops greater than 18,000 feet in length to support voice service and BellSouth does not remove them for BellSouth retail end users on copper loops of over 18,000 feet in length; therefore, such a modification would not constitute a routine network modification and is not required by the FCC.
38	2-20	2.12.3, 2.12.4	<i>Under what rates, terms and conditions should BellSouth be required to perform Line Conditioning to remove bridged taps?</i>	Any copper loop being ordered by CLEC which has over 6,000 feet of bridged tap will be modified, upon request from CLEC, so that the loop will have a maximum of 6,000 feet of bridged tap. This modification will be performed at no additional charge to CLEC. Line conditioning orders that require the removal of other bridged tap should be performed at the rates set forth in Exhibit A of Attachment 2.	For any copper loop being ordered by CLEC which has over 6,000 feet of combined bridged tap will be modified, upon request from CLEC, so that the loop will have a maximum of 6,000 feet of bridged tap. This modification will be performed at no additional charge to CLEC. Line conditioning orders that require the removal of bridged tap that serves no network design purpose on a copper loop that will result in a combined level of bridged tap between 2,500 and 6,000 feet will be performed at the rates set forth in Exhibit A of this Attachment. CLEC may request removal of any unnecessary and non-excessive bridged tap (bridged tap between 0 and 2,500 feet which serves no network design purpose), at rates pursuant to BellSouth's Special Construction Process contained in

					BellSouth's FCC No. 2 as mutually agreed to by the Parties. BellSouth is only required to perform line conditioning that it performs for its own xDSL customers and is not required to create a superior network for CLECs. Moreover, this issue is not appropriate for arbitration in this proceeding because it involves a request by the CLECs that is not encompassed within BellSouth's obligations pursuant to Section 251 of the Act.

BellSouth should provide CLEC Loop Makeup information on a facility used or controlled by another CLEC only upon receipt of an LOA authorizing the release of that information from the CLEC using the facility.
