## BEFORE THE PUBLIC SERVICE COMMISSION

In re: Petition for expedited review of growth | DOCKET NO. 041257-TL code denials by Number Pooling Administrator | ORDER NO. PSC-04-1126-PAA-TL for St. Johns exchange (Worldgolf), by SSUED: November 15, 2004 BellSouth Telecommunications, Inc.

## NOTICE OF PROPOSED AGENCY ACTION ORDER DIRECTING NEUSTAR TO PROVIDE BELLSOUTH TELECOMMUNICATIONS, INC. WITH ADDITIONAL NUMBERING RESOURCES

## BY THE COMMISSION:

NOTICE is hereby given by the Florida Public Service Commission that the action discussed herein is preliminary in nature and will become final unless a person whose interests are substantially affected files a petition for a formal proceeding, pursuant to Rule 25-22.029, Florida Administrative Code.

#### BACKGROUND

On October 21, 2004, BellSouth Telecommunications, Inc. (BellSouth) submitted an application to NeuStar requesting additional numbering resources, specifically one (1) 1,000 consecutive number block for the Worldgolf switch (STAGFLWGRS0) in the St. Johns rate center. The request was made to maintain a six-month inventory of numbers.

On October 21, 2004, NeuStar denied the request for additional numbering resources in the Worldgolf switch (STAGFLWGRS0) because the company had not met the rate center months-to-exhaust (MTE) criteria currently required to obtain such additional numbering resources. On October 27, 2004, BellSouth filed a petition for expedited review of NeuStar's denial of its application. BellSouth specifically requests a one thousand block of consecutive numbers to meet the needs of two (2) specific customers, each requiring 300 consecutive numbers. One of the customers requires its numbering format to be NPA-NXX-7XXX in order to meet its needs.

We are vested with jurisdiction pursuant to Sections 364.01 and 364.16(4), Florida Statutes, and 47 U.S.C. §151, and 47 C.F.R. §52.15(g)(3)(iv).

## **ANALYSIS**

Prior to March 31, 2000, carriers submitting an application for additional numbering resources had to certify that existing codes associated with that switch, Point of Interface (POI), or rate center would exhaust within 12 months. In jeopardy Numbering Plan Areas (NPAs), applicants seeking additional numbering resources had to certify that existing NXX codes would exhaust within six months.

Pursuant to Order No. FCC 00-104<sup>1</sup> applicants must now show the MTE criteria by rate center instead of by switch, and have no more than a six-month inventory of telephone numbers. Pursuant to 47 C.F.R. § 52.15(g)(3)(iii):

All service providers shall maintain no more than a six-month inventory of telephone numbers in each rate center or service area in which it provides telecommunications service.

We believe that the new MTE criteria creates a disadvantage for carriers with multiple switch rate centers because it is now based on rate centers, rather than switches. One switch in a multiple-switch rate center may be near exhaust while the average MTE for the rate center is above six months, thus preventing a carrier from obtaining additional numbering resources for the switch near exhaust.

We conclude that the denial of additional numbering resources also poses a possible barrier to competition. A customer desiring service from one company may have to turn to another carrier simply because BellSouth cannot meet the MTE rate center requirement. Another carrier who may have just one switch in the rate center, would have an advantage and may be able to obtain the additional numbering resources to provide the service. In Order No. DA 01-386<sup>2</sup>, the FCC stated:

Under no circumstances should consumers be precluded from receiving telecommunications services of their choice from providers of their choice for want of numbering resources.

FCC No. DA 01-386 at ¶11.

A procedure is available to carriers who are denied additional numbering resources because of the rate center MTE requirement. Addressing additional numbering resources denials, 47 C.F.R. § 52.15(g)(3)(iv), states, in part:

The carrier may challenge NeuStar's decision to the appropriate state regulatory commission. The state regulatory commission may affirm or overturn the NeuStar decision to withhold numbering resources from the carrier based on its determination of compliance with the reporting and numbering resource application requirements herein.

ORDER NO. PSC-04-1126-PAA-TL DOCKET NO. 041257-TL PAGE 3

In processing the company's petition as contemplated by 47 C.F.R. § 52.15(g)(3)(iv), we have required the company to provide this Commission with the following:

- 1) The customer's name, address, and telephone number.
- 2) The utilization thresholds for every switch in that particular rate center where additional numbering resources are sought.
- 3) The MTEs for every switch in that particular rate center where additional numbering resources are sought.

Upon consideration of the information provided, it has been determined that the company has met the following criteria:

- 1. The carrier has demonstrated that it has customers in need of immediate numbering resources, or has a switch in a multi-switch rate center which has a MTE of less than six months;
- 2. The carrier has shown that it is unable to provide services to a potential customer because of NeuStar's denial of the numbering resources, or it will be unable to provide services to customers from a switch in a multiswitch rate center because its supply of numbers is less than six months; and
- 3. A potential customer cannot obtain service from the provider of his/her choice because the carrier does not have the numbers available, or customers will not be able to have a choice of providers because a provider will run out of numbers for that switch in a multi-switch rate center within six months.

#### CONCLUSION

Based on the foregoing, we find it appropriate to overturn NeuStar's decision to deny additional numbering resources, and direct NeuStar to provide BellSouth with additional numbering resources consisting of one (1) 1,000 consecutive number block<sup>3</sup> for the Worldgolf switch (STAGFLWGRS0) in the St. Johns rate center as soon as possible.

<sup>&</sup>lt;sup>3</sup> Of this block, three hundred (300) consecutive numbers shall be provided in the format to be NPA-NXX-7XXX in order to meet its needs.
