Discussion of Issues

Issue 1: Should Progress Energy Florida's proposed standard form underground conversion agreement tariff be suspended?

Recommendation: Yes. (Wheeler)

Staff Analysis: On January 14, 2005, PEF requested approval of a standard form underground conversion agreement to be included in its tariff. The agreement would be used when applicants request that existing overhead electric distribution facilities be relocated underground. Staff is recommending that the tariff be suspended to allow staff sufficient time to review the petition in order to present the Commission an informed recommendation on the tariff proposal.

Pursuant to Section 366.06(3), Florida Statutes, the Commission may withhold consent to the operation of all or any portion of a new rate schedule, delivering to the utility requesting such increase a reason or written statement of good cause for doing so within 60 days. Staff believes that the reason stated above is good cause consistent with the requirement of Section 366.06(3), Florida Statutes.
