Re: Petition from Natura Homeowners

Dear Ms. Gervasi:

Charles Beck told us you need additional information concerning Natura's Homeowners petition to the Florida Public Service Commission seeking to have the commission initiate a show cause proceeding against Aloha Utilities to delete our area from the company's certificate of authority. We are therefore enclosing a copy of original petition letter to the Public Service Commission dated January 27, 2005 and our letter dated February 8, 2005 to you. .

We are asking you to open up a new docket. All the information you requested is in the letters. In our original petition letter received on January 31, 2005, we enclosed the original petition signatures, a map indicating our area and a homeowner's list of names.

This afternoon, I attended Pasco County Florida's Ad Hoc Committee Re Aloha Utilities and they adopted Aeration to solve the sulfur problem by a 5 to 7 vote. Aloha's representatives voted no. Again let me emphasis that Aloha is stalling and has no intention of improving the water supply. The method that they are proposing has never been used and not approved as a way of eliminating sulfur, which causes black water and corrodes water pipes. Aloha has been allowed for the last 10 years to provide an inferior product to us. We have a right to expect water that is not discolored and smells and tastes bad. We do not wish to wait another 10 years for Aloha to clean up their product.

We are therefore asking the Public Service Commission to take up our petition and deleted Aloha as our water provider.

I hope this information will help to you initiate a new docket

Sincerely,

Roslyn B. Wrona

Re: Letter and Petition signed by Natura  
Homeowners, dated January 27, 2005

Dear Ms. Gervasi:

We received your letter dated February 2, 2005, regarding our petition to become a part of PSC Docket 050018-WS. Since we cannot become part of this Docket, would you open up a new Docket on behalf of the homeowners in Natura, who wish to terminate Aloha Water Utilities as our water provider and instead be serviced by Pasco County Water Utilities.

Aloha has stonewalled any improvement for almost 10 years and we believe that the methods being proposed to cleanup the water, will be inadequate. We are also on wells number 8 and 9, as are the Seven Springs communities listed in your letter. As stated in our petition, the water comes out blackish from the faucets and showerheads, with a strong sulfur odor. These wells are not providing us with acceptable water.

Thank you for your attention to this matter

Sincerely,

Roslyn B. Wrona

RE: **Aloha Utilities Inc.—PSC DOCKET 050018-WS**

Gentlemen:

We are a small subdivision off Seven Springs Blvd., in the Seven Springs area of Aloha's service territory, behind Natures Hideaway subdivision (map enclosed). There are 64 homes in our subdivision, and 51 of the homeowners have signed the enclosed petition. I am sending you this petition on behalf of Natura homeowners who want to terminate Aloha Utilities Inc. as our water provider and instead have Pasco County Water Utility Service supply our drinking water.

Aloha has supplied water to our community, but it comes out blackish from our faucets and showerheads, with a very strong sulfur odor and a strong chlorine taste. In other words, it is unusable and undrinkable. Several of the homeowners have complaints of damaged and corroded water pipes and shortened lives for their appliances.

Please include us in the new Docket 050018-WS, which you will consider in the very near future, to terminate Aloha Water Utilities' license to provide drinking water to some communities that have filed petitions. We also deserve to have better water in our homes.

Enclosed is the signed petition from our homeowners and a list of names and addresses.

Thank you for your consideration.

Sincerely,

Roslyn B. Wrona
