Shonda

Attached is a list of the PONs associated with this matter we've talked about several times over the past few weeks. As you know it is not project managed, however from an account team standpoint I wanted to help Allegiance anyway I could to move these orders through our system. I thought by having these in a list it might make it easier for all involved.

I did notice that the PONs have notes that the RPON does not exist, however I did find all the RPONs in Exact. Let me know if there are any problems or concerns.

Thanks !!!

Subject: MIAMI CUT - 9/30 - 12:01 AM
Importance: High

All,

We are finally ready to cut this one Miami circuit.

1
2
3
4

XO ORDER NUMBER:

CIRCUIT ID: (

CONFERENCE BRIDGE: 2142922420 on 9/29 at 12:01 am

Tammy and Daphne,

Please ensure your techs call into the bridge at 12:01 am on 9/30 and please provide the tech's name and back up numbers incase there is an emergency. Please respond to this email. So James and Nina have the back up numbers.

Daphne,

Before when working with Robbie, he stated to please call him to ensure he has this circuit wired back up before the cut. I think he had it disconnected for testing. This may already be done, but please please call him to ensure this circuit is ready to cut.

Thanks to everyone for your patience in getting this scheduled.

Deb

Daphne,

1 Can we reschedule circuit now? This our order number This is the one circuit
we worked with Robby, our techs and Global's on pre-testing.

Robby,

This is the circuit you asked me to let you know when it would cut and you would "wire back up", so we could cut it over.

Daphne,

2 The other circuit will need to be cancelled.

Please let me know.

Thanks,

Debbie.

Sent: Friday, February 18, 2005 12:20 PM
To: Willis, Michael
Subject: XO / Global Crossing Project Status

Here is the concluding status on the XO / Global Crossing Atlanta and Miami projects.

Atlanta

7/6/04 XO requested that 56 Global Crossing SPA circuits be moved to XO's network; and keep them as SPA; and not wait for the responses from the Professional Services (NBR) process. A spreadsheet was also sent.

7/16/04 As a result of the NBR decision, XO decided to move forward with this project and leave circuits as SPA

7/23/04 Spreadsheet sent

7/26/04 Conf call held with XO and BST to discuss project; advised XO of items that need to be added to the spreadsheet; spreadsheet now had 42 circuits

8/23/04 spreadsheet has 36 circuits

8/27/04 Conf call held; items discussed: the circuit's ACNA was to change; LOA needed from Global Crossing to allow XO to issue disco PON; will see if XO can submit ASRs on 9/1/04; targeted due dates 9/22/04, 9/23/04, 9/24/04

8/30/04 conf call held; concerns with timeframes and that XO not going to meet dates already established; 21 of the (now) 35 circuits can't be merged over until late Oct, probably 10/20 or 10/22; XO to send ASRs on 8/31

9/8/04 XO had to correct the PONs; due dates changed to 9/23/04 and 9/24/04 or 9/28/04 or 9/29/04

35 circuits submitted on last spreadsheet

2 were never changed

2 are no longer billing

17 Global Crossing circuits changed to AFY ACNA

14 Global Crossing circuits changed to TQW ACNA

due dates ranged between 9/28, 9/29, 10/13, 10/15, 11/17, 11/23, 12/14, 1/14/05

Miami

5/24/04 PONs submitted to ICSC from Allegiance to hot cut 16 SPA DS1 circuits from Global Crossing to Allegiance; end link would not be changing

6/1/04 discussion with customer and ICSC on how these PONs need to be submitted and LOA is needed from Global Crossing for this project

6/11/04 PONs were re-submitted to ICSC and list (later became a spreadsheet) was sent; 16 circuits were on the list; spreadsheet was shared with ICSC; due date ranges were 7/7/04, 7/8/04, 7/9/04

Due dates were supposed to 7/14/04, 7/15/04, 7/16/04

7/19/04 3 orders were cancelled; 5 are pending; 8 are completed

7/20/04 2 pending status orders became missed appointment

8/3/04 3 remaining orders were supposed to 8/11/04

8/13/04 2 remaining orders are pending with a due date of 8/11/04; other one order was cancelled

8/18/04 conf call held with XO, Global Crossing and BST to plan on how / when to cut over these two orders

9/14/04 1 order was cancelled; 1 order was rescheduled to 9/30/04

16 circuits submitted on spreadsheet

12 Global Crossing circuits changed to AFY ACNA

4 Global Crossing circuits (the orders associated with them) were cancelled; not converted

The final version of each spreadsheet is attached.

Sue,

I have spoken with Kim regarding this issue. I have contacted Scott Kunze at professional services. He should be letting me know something today on getting this process started and the charges for this project. Go ahead and send me the Spread sheet with all the relevant information. I will get it to the right people in professional services.

thanks

Subject: RE: BellSouth Coordinated Hot Cut
Importance: High

Hartford,

Ok, but if it meets the criteria, and we believe it does because its >= 30 DS 1s, don't we have to get an NBR to give us a cost for BellSouth to manage the hot cuts for XO?

Or is there a way to order a coordinated cutover?

So if XO does the order and manages the coordinated cut the cost would be

- 1) Disconnect NRC if applicable
- 2) Install NRC if applicable
- 3) Service Order (ASR) charges

If BellSouth manages, there would be the professional services fees detailed in the NBR? How can we get that quoted to us?

Thanks

Gary Case

If you are converting access circuits to une loops that would be a disconnect and a new pons issued. For it to be project managed it would have fall under the criteria of project management. You can review the interval guide located in the 14.0 LOH to review the criteria.

Hey Hartford, the saga continues. It's XO's intent to convert these Global Crossing Special access circuits to XO UNE circuits. If I recall correctly, this will involve a project. It is our hope to have this completed within 30 - 60 days. Can you provide a summary of the process, any further documentation needs and any pricing associated with the project?

Thanks.

I have spoken with the Project manager and we need to know what the requested due date is as well as the new cfa.
