4. Any problems encountered with survey: As noted above, a review on collection of information on 626 poles will be necessary as a result of the QA/QC review of the information collection on those poles.

5. Time estimated for completing survey: While reviews as a result of QC/QA may cause some delay, the full survey, with appropriate staffing, should be completed within the time frame reflected in the Statement Of Work (target date of October 23, 2005).
