Sprint

Docket No. 041144-TP

4

3

Late-filed Hearing Exhibit No. ~~3~~ (Sprint-~~A~~)

Title: Description of Call-Forwarded Traffic/Access Charge Applicability

For the Customer X traffic, is the call a forwarded call within an exchange, or are the calls forwarded from customer X's location in Orlando to the location in Tallahassee? In other words, is a call from Orlando to Tallahassee forwarded from the point where it picks up the call in Orlando to Tallahassee, or once the call reaches Tallahassee, is it considered to be a forwarded call from Customer X's Tallahassee phone number to a Sprint customer's Tallahassee number? For either scenario, where would access charges be paid?

Sprint's Response:

CALL SCENARIO#1: Customer #1 in Orlando calls Customer #2 in Tallahassee (Originating and Terminating Access Charges would apply). Customer #2 has their phone forwarded to Customer #3 in Tallahassee (Terminating Reciprocal Compensation would apply).

CALL SCENARIO#2: Customer #1 in Miami calls Customer #2 in Orlando (Originating and Terminating Access Charges would apply). Customer #2 has their phone forwarded to Customer #3 in Tallahassee (Originating and Terminating Access would apply)

In a Normal Call forwarding (Redirect) Scenario, the call information in the SS7 would be reflected in several fields. In a normal call forwarding scenario, the terminating SS7 record shows the following four telephone number fields:

Customer #1s telephone number is in the calling number field

Customer #3s telephone number is in the called party number field

Customer #2s telephone number is in the Charge Party # field and original called number field.

Redirect Count would be greater than zero indicating the call as being forwarded.

In the SS7 call detail records Sprint has provided and analyzed for this proceeding, Customer X's phone number does not appear as the called number and the redirect count is not populated; consequently Customer X could not and did not forward calls.

Customer X's two phone numbers, 850-201-0579 and 239-689-2995, were non-working numbers so callers could never dial either of these numbers, therefore the calls could not have been forwarded (redirected) to another number.

Response Provided by: Christopher M. Schaffer
