To Whom It May Cocern:

This letter is to inform that we object to Gistro,Inc. Being given a wastewater certificate. We moved into the Bonita Preserve approximately a year and a half ago and had never heard of this company, so we spoke to people in the area who have lived here for a long time. We were told that this company owned two lift stations and had a plant and were initially in charge of sewage. We were then told that there were many problems with the plant and that there was often sewage running down the streets. We do not want to have sewage in our streets. We currently pay Bonita Springs Utilities for water and sewage and have never had any problems. We urge that you do not give Gistro, Inc. the certificate.

Thank You
Ernesto Augusto
