RESPONSE: Residential bundle prices and takes rates are based upon April 2005 data. Residential Bundle Prices are based on statewide average basic service rates, \$39.99 Cingular Wireless Plan, and most popular feature service. Prices set forth as broadband include dial-up internet access. Take rates are not available for video (DTV) bundles.

Business bundle prices are reflect the purchase of BellSouth Complete Choice for Business and affiliate products and services. The prices set forth above reflect a 36 month contract discount. BellSouth does not track the number of business customers that are purchasing both BellSouth products and affiliate products. Therefore, take rates cannot be calculated for business bundles.

Comments

7. Please provide any comments, suggestions or information you believe will assist staff in evaluating and reporting on the development of local exchange competition in Florida. We would appreciate any comments or information on intermodal local competition (e.g., wireless, cable telephony), reports or studies you have completed on CLEC market share, or anything else that you believe to be relevant.

RESPONSE:

Wireless Competition:

Today, there are over 11.9 million wireless subscribers* in Florida according to the FCC's December 2004 Local Telephone Competition: Status as of June 30, 2004. According to this report, the number of wireless subscribers surpassed the number wireline access lines by June 30 2004. The following chart depicts this milestone in intermodal competition:

Wireless vs. Wireline - Florida

According to the same report, Florida is served by at least 12 wireless providers*. Also, the Cellular Telecommunications and Internet Association (CTIA), in a December 2003 study, reported that wireless minutes of use per subscriber increased from 119 minutes per month at year end 1995 to 507 minutes per month at year end 2003. However, over the same period of time, the FCC reports that average minutes of use per subscriber per month jumped even higher to 599 minutes, or 10 hours of use for the average subscriber¹. Another recent report indicates the significance of wireless competition. In-Stat/MDR, a market research firm, release a February 2004 report that finds that 14.4% of US consumers currently use their wireless phones as their primary phone. Of those consumers that still use their wireline phone as their primary phone, 26.4% say they would consider replacing their wireline service with a wireless phone. They go on further to state that the data demonstrates a significant potential for wireline displacement over the next five years.

A recent report by CIBC World markets Corp issued May 3, 2005, titled *Transfer of Coverage: We Favor Wireless and Cable Over Wireline*, projects a 9.7% wireless substitution for wireline rate in the United States by year end 2005.

¹ FCC's Ninth Report, WT Docket No. 04-216, released September 28, 2004, ¶ 181, Footnote 485, NextGen VII, at 22.

Cable Competition:

Cable TV companies are well positioned to take significant market share provide telephone service to their subscribers. The largest cable telephony provider nationally is Cox Communications. It provides telephone service to over 1.4 million of its cable customers nationally. Comcast is the second largest provider nationally with 1.2 million customers. Cox and Comcast both provide cable telephone via circuit switched technology. Cox serves Ft. Walton Beach and the Gainesville/Ocala area. However, they are not currently providing cable telephony to these areas yet. Comcast serves Jacksonville and Pompano Beach. They are currently providing cable telephony to customers in these areas.

Cable TV companies are not only providing telephony to their customers via circuit switched technology but also are utilizing a new technology, VoIP, to provide local telecommunications to their customers. Advanced Cable is providing telephone service through VoIP in partnership with Vonage in Coral Springs and Weston. Bright House Networks is providing VoIP service in Tampa/Pinellas County and Orlando. Bright House Networks has partnered with Cisco and Motorola for the equipment to support VoIP.

Unlike heavily regulated telephone companies, Cable companies can provide what is known in the industry as the triple play - voice, data, and video - to their customers. Competition is increasing significantly as more and more competitors sell bundles of multiple services including the triple play. Cablevision just recently announced that it had dropped its one-year for its voice, video and data bundle to \$89.95 per month. Previously, combined introductory prices for the same three services totaled \$104.80 monthly for the first six months and \$119.80 for the second six months.

The Cable TV industry has the greatest market share in the high speed internet access market. The FCC's High Speed Report (released December 2004) reveals that Cable providers have 52% of the market for high speed internet access in Florida. It also states there are eight providers for high speed lines by coaxial cable.

Impacts of Intermodal Competition:

According to the FCC's August 2003 Trends in Telephone Service report, interstate switched access minutes of use (MOU) declined dramatically from 2000 to 2004. Total 2000 switched access minutes were 567 billion while total 2002 switched access minutes were only 486 billion. The latest Trends in Telephone Service (June 2005) continues to show that interstate switched access minutes are dropping. They dropped nearly 5% from EOY 2003 (444 billion) to EOY 2004 (422.4 billion). BellSouth interstate MOUs have also tremendously declined over this period.

* - Providers with less than 10,000 subscribers are not required to report.

Wireline Competition:

BellSouth uses the quantity of E911 listings as an estimate of CLEC lines which are not served by BST end offices. The chart below shows CLEC wireline market share. CLEC line quantities are resold lines, UNE-P lines, and CLEC E911 listings. (Note that UNE Loops are included in CLEC E911 listings.)

Grand Total		

Generally access line services transported over HICAP facilities are included in residence and business analog access line counts and BellSouth lacks the ability to segregate those lines from the total counts. An exception to this are those lines which are provisioned over PathLink (A primary rate ISDN service). An approximation of the impact of this service is included on the Business row and represents the number of PathLink facilities times 23.

NOTES/INSTRUCTIONS FOR COMPLETING TABLE-1:

- A. The purpose of this table is to obtain reetail access lines, including those of affiliates, on a VGE basis
- B. An access line connects the end-user's customer premises equipment (CPE) to the serving switch and allows the end-user to originate and/or terminate local telephone calls on the public switched telephone network (PSTN). The access line counts in Table-1 above must be based on all of your different types of access lines such as copper, fiber, hybrid fiber/copper, coaxial cable, hybrid fiber/coaxial cable, fixed-wireless (free-space optics, microwave or satellite, etc.).
- C. Each field must be populated. All entries must be made without quotation marks.

TABLE COLUMN INSTRUCTIONS:

- Column 1. List Exchanges in alphabetical order.
- Column 2. Enter the abbreviation Res for Residential lines or Bus for Business lines. **Each type must be entered in separate rows.**
- Column 3. Enter line count as voice-grade equivalents (VGE's). Report VGE Access Lines based on how you bill the customer. If you bill a customer for 1 DS1, the access line count would be 24 even if the customer is not utilizing all 24 channels. If you bill a customer for 10 channels in a DS1, then the line count would be 10. Report 2 VGE's for each ISDN-BRI and 23 VGE's for each ISDN-PRI. **Each line must be entered in separate rows.,**

NOTE: UNKNOWN RSLR CUSTOMER - Customer Service Record doesn't contain FID RESH to allow BellSouth to identify CLEC.

NOTES/INSTRUCTIONS FOR COMPLETING TABLE-2:

- A. The purpose of this table is to obtain UNE-P and Resale lines (on a VGE basis) leased to CLECs. Include lines leased under Commercial Agreements.
- B. Each field must be populated. All entries must be made without quotation marks.

TABLE COLUMN INSTRUCTIONS:

Column 1. Enter the CLEC's name.

Column 2. List exchanges in alphabetical order.

Column 3. Enter the abbreviation Res for Residential lines or Bus for Business lines. **Each type must be entered in separate rows.**

Column 4. Enter Method of Service as UNE-P or Resale. **Each method must be entered in separate rows.**

Column 5. Enter either Commercial or Non-Commercial depending on how lines are being leased by the CLEC or N/A if no agreement applies.

Column 6. Enter line count as voice-grade equivalents (VGEs). Report VGE Access Lines based on how you bill the CLEC. If you bill a CLEC for 1 DS1, the access line count would be 24 even if the CLEC is not utilizing all 24 channels. If you bill a customer for 10 channels in a DS1, then the line count would be 10. Report 2 VGEs for each ISDN-BRI and 23 VGEs for each ISDN-PRI. **Each line count must be entered in separate rows.**

NOTES/INSTRUCTIONS FOR COMPLETING TABLE-3:

- A. The purpose of this table is to obtain the actual count of lines leased to CLECs not included on Table-2.
- B. Data must be actual line counts, not VGEs.
- C. Each field must be populated. All entries must be made without quotation marks.

TABLE COLUMN INSTRUCTIONS:

Column 1. Enter the CLEC's name.

Column 2. List exchanges in alphabetical order.

Column 3. Enter Method of Service as either EEL (include only loop and not transport piece), UNE-L, or Other (i.e. tariff services such as special access local, ISDN, etc.). **Each method must be entered in separate rows.**

Column 4. For each line connected to the customer premises, enter Line Type as Analog, ISDN-BRI, ISDN-PRI, DS1, DS3, OC1, OC3, OCn (Identify value of n), xDSL (Identify x), etc. Include only those high speed lines that also provide voice. **Each type must be entered in separate rows.**

Column 5. Enter either Commercial or Non-Commercial depending on how lines are being leased by the CLEC or N/A if no agreement applies.

Column 6. Enter actual line count total, not VGEs, in the Total Lines column without duplication, e.g., Enhanced Extended Link (EEL) Loops must not be included in UNE-L counts and vice versa. **Each actual line count total must be entered in separate rows.** EXAMPLE: Enter 1 for 1 Analog loop, 2 for 2 ISDN-PRI loops, etc.
