- After the August 13, 2004 hurricane designated as Charley; the State and Charlotte County Florida required an upgrade to my septic system before I could obtain an occupancy permit for my new home located at 29153 Tamayo, Punta Gorda, FL 33982. The water and sewage systems were permitted by the state and county and complied with all the standards set forth by these government agencies. By these standards these systems are adequate.
- By having our own wells we better our chances of having a viable water source in case of another natural disaster, rather than depend on a single privately owned source.
- I also object to MSM Utilities, LLC (a private development company) attempting to coerce me, thru state intervention, to underwrite their cost of further developing the property, which at this time is under the jurisdiction of the two aforementioned water certificates.
- The property owners in this area have suffered financially because of the hurricane last year. Most of these property owners are retired or low-income families whose financial status does not afford a service that only benefits a private corporation. This annexation would add significant cost to these properties and more tax liability.

Respectfully,

Robert C. Brown
