TARIFF FORMAT SHEETS

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the FL PSC. For example, the 4th revised Sheet 14. Because of various suspension periods, deferrals, Etc., the FL PSC follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
 - 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a) I.
 - 2.1.1.A.1 (a) I. (i).
 - 2.1.1.A.1 (a) I. (i). (1).
- D. Check Sheets - When a tariff filing is made with the FL PSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the FL PSC.

SECTION 3 – SERVICE DESCRIPTION**3.1 Timing of Calls**

The customer's monthly usage charges for Carrier service are based upon the total number of minutes the Customer uses and service options subscribed to. Chargeable time begins when the connection is established between the calling station and the called station or PBX. Chargeable time ends when either party disconnects.

There are no charges incurred if a call is not completed.

3.2 Start of Billing

For billing purposes, the start of service is the day following acceptance by the Customer of Company's service or equipment. The end of service date is the last day for which service was provided by the Company or the last day of any required notification period, whichever is later.

3.3 Interconnection

Service furnished by the Company may be interconnected with services or facilities of other authorized communications resellers or common carriers and with private systems, subject to the technical limitations established by the Company. Service furnished by the Company is not part of a joint undertaking as described in Section 2.2 of this tariff. Any special interface equipment of the Company and other participating underlying carriers or common carriers shall be provided at the Customer's expense.

Interconnection with the facilities or services of underlying carriers shall be under the applicable terms and conditions of the underlying carriers' tariff. The Customer is responsible for taking all necessary legal steps for interconnecting his End User by providing terminal equipment or communications systems for establishing interconnection with the Company. The Customer shall secure all right-of-ways, and other arrangements necessary for interconnection.

3.4 Terminal Equipment

The Company's service may be used with or terminated in CPE terminal equipment or communication system, such as PBX's, Key Systems, teleprinters, handsets, or data sets. Such terminal equipment will be furnished and maintained at the expense of the providing customer, except as otherwise agreed in advance and in writing. The Customer is responsible for all cost at their premises, including personnel, wiring, electrical power, and the like incurred in the use of the Company's service. When such CPE terminal equipment is used, the equipment shall comply with the generally accepted minimum protective criteria of the telecommunication industry.

SECTION 3 – SERVICE DESCRIPTION (continued)**3.5 Calculation of Distance**

Usage charges for any mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call(s).

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The company uses the rate centers and associated vertical and horizontal coordinates that are generally accepted within the industry:

Formula:
$$\sqrt{\frac{(V1-V2)^2 + (H1-H2)^2}{10}}$$

3.6 Minimum Call Completion Rate

The Customer can expect a call completion rate of 99% for Intrastate and Interstate domestic U.S. calls attempted during peak use periods for all Feature Group D "1+" services.

3.7 Network Management

The Company will administer its network to provide acceptable service levels to all telecommunications users of the Company's network services. Generally, service levels are considered acceptable only when both End Users and Customers are able to establish connections with little or no delay encountered within the Company's network. The Company maintains the right to apply protective controls, (i.e., those actions, such as call gapping, which selectively cancel the completion of any traffic carried over its network), including that associated with a Customer's service. Generally, such protective measures would only be taken as a result of occurrences such as a failure or overload of Company or customer facilities, natural disasters, mass calling or national security demands.
