and security improvements, and rehabilitative work to plant grounds. Within that same period of time, there have been no major changes in operational methods.

The Company proposes to make major pro forma plant additions, including the installation of an odor control system, repairs and replacements to wastewater facilities and an investigation of the possible sources of groundwater infiltration in three selected subdivisions. The MFRs will include pro forma adjustments for increases in salaries and salary-related benefits, purchased power and other costs, which will be requested in this proceeding. The pro formas are non growth-related.

Pursuant to Section 367.081(8), Florida Statutes, the Company requests that the Commission process this petition for rate relief using the proposed agency action procedure. The Company also will request interim rates based on the historic test year.
